00110698 This project is to enable China to fulfill its commitments under the UNFCCC to prepare its fourth National Communication (4NC) Report, third Biennial Update Report (3BUR), fourth Biennial Update Report (4BUR). Based on the experience and lessons learned from the previous NCs and BURs, the project will broaden and consolidate the network of stakeholders, including those in the government, research and education institutions, associations, social groups, enterprises, individuals, enhance technical capacity of national experts, and strengthen the institutional frameworks. Furthermore, the project will place greater emphasis on relevant policies on mitigation of and adaptation to climate change and the results of their implementation, promote the establishment and improvement of the domestic systems for measurement, report and verification, so as to enable China to effectively address climate change in the process of pursuing national sustainable development. The project will develop comprehensive national GHG inventory of 2017, 2018 and 2020, with extended categories and sources of GHG emissions and reduced uncertainties of the inventory. It will also introduce the activities of enhancing public awareness on climate change.
