Annual Work Plan

B0302 - Benin - Cotonou

Project: 01000229 **Report Date:** 7/1/2026

Project Title: The project will: i) promote sustainable, climate resilient production systems in degraded lands and deforestation hotspots in Benin; ii) facilitate the developm

Year: 2023

Output	Key Activities	Timeframe		Responsible Party	Planned Budget			
		Start	End		Fund	Donor	Budget Descr	Amount US$
01000229 The project will: i) promote sustainable, climate resilient production systems in degraded lands and deforestation hotspots in Benin; ii) facilitate the development of green infrastructure, selected through integration of climate scenarios and resilience potential under current climatic stressors, to strengthen the Green Belt as a nature-based solution against desert advancement and support communities in climate change adaptation in the north of the country; iii) strengthen the protection and preservation of forest ecosystems located in large agricultural production basins;iv) identify and promote gender responsive, climate resilient value chains and increase productivity and competitiveness of the horticultural sectors, and;v) facilitate the mobilization of innovative financing and the involvement of private sector for the scaling up and sustainability of climate resilient agriculture, climate risk informed sustainable land and forest management, including facilitating market and credit access for producers involved in the resilient development of livelihoods. The project will address a range of barriers and challenges and will be carried out at national, communal, and local site levels where degraded lands have been targeted for improved, climate risk-informed land management practices to support the achievement of Benin's LDN goals and to help meet national NDC objectives for climate change adaptation. Annual Work Plan

B0302 - Benin - Cotonou

Project: 01000229 **Report Date:** 7/1/2026

Project Title: The project will: i) promote sustainable, climate resilient production systems in degraded lands and deforestation hotspots in Benin; ii) facilitate the developm

Year: 2024

Output	Key Activities	Timeframe		Responsible Party	Planned Budget			
		Start	End		Fund	Donor	Budget Descr	Amount US$
01000229 The project will: i) promote sustainable, climate resilient production systems in degraded lands and deforestation hotspots in Benin; ii) facilitate the development of green infrastructure, selected through integration of climate scenarios and resilience potential under current climatic stressors, to strengthen the Green Belt as a nature-based solution against desert advancement and support communities in climate change adaptation in the north of the country; iii) strengthen the protection and preservation of forest ecosystems located in large agricultural production basins;iv) identify and promote gender responsive, climate resilient value chains and increase productivity and competitiveness of the horticultural sectors, and;v) facilitate the mobilization of innovative financing and the involvement of private sector for the scaling up and sustainability of climate resilient agriculture, climate risk informed sustainable land and forest management, including facilitating market and credit access for producers involved in the resilient development of livelihoods. The project will address a range of barriers and challenges and will be carried out at national, communal, and local site levels where degraded lands have been targeted for improved, climate risk-informed land management practices to support the achievement of Benin's LDN goals and to help meet national NDC objectives for climate change adaptation. Project: 01000229 **Report Date:** 7/1/2026

Project Title: The project will: i) promote sustainable, climate resilient production systems in degraded lands and deforestation hotspots in Benin; ii) facilitate the developm

Year: 2024

Output	Key Activities	Timeframe		Responsible Party	Planned Budget			
		Start	End		Fund	Donor	Budget Descr	Amount US$
01000229 The project will: i) promote sustainable, climate resilient production systems in degraded lands and deforestation hotspots in Benin; ii) facilitate the development of green infrastructure, selected through integration of climate scenarios and resilience potential under current climatic stressors, to strengthen the Green Belt as a nature-based solution against desert advancement and support communities in climate change adaptation in the north of the country; iii) strengthen the protection and preservation of forest ecosystems located in large agricultural production basins;iv) identify and promote gender responsive, climate resilient value chains and increase productivity and competitiveness of the horticultural sectors, and;v) facilitate the mobilization of innovative financing and the involvement of private sector for the scaling up and sustainability of climate resilient agriculture, climate risk informed sustainable land and forest management, including facilitating market and credit access for producers involved in the resilient development of livelihoods. The project will address a range of barriers and challenges and will be carried out at national, communal, and local site levels where degraded lands have been targeted for improved, climate risk-informed land management practices to support the achievement of Benin's LDN goals and to help meet national NDC objectives for climate change adaptation. Annual Work Plan

B0302 - Benin - Cotonou

Project: 01000229 **Report Date:** 7/1/2026

Project Title: The project will: i) promote sustainable, climate resilient production systems in degraded lands and deforestation hotspots in Benin; ii) facilitate the developm

Year: 2026

Output	Key Activities	Timeframe		Responsible Party	Planned Budget			
		Start	End		Fund	Donor	Budget Descr	Amount US$
01000229 The project will: i) promote sustainable, climate resilient production systems in degraded lands and deforestation hotspots in Benin; ii) facilitate the development of green infrastructure, selected through integration of climate scenarios and resilience potential under current climatic stressors, to strengthen the Green Belt as a nature-based solution against desert advancement and support communities in climate change adaptation in the north of the country; iii) strengthen the protection and preservation of forest ecosystems located in large agricultural production basins;iv) identify and promote gender responsive, climate resilient value chains and increase productivity and competitiveness of the horticultural sectors, and;v) facilitate the mobilization of innovative financing and the involvement of private sector for the scaling up and sustainability of climate resilient agriculture, climate risk informed sustainable land and forest management, including facilitating market and credit access for producers involved in the resilient development of livelihoods. The project will address a range of barriers and challenges and will be carried out at national, communal, and local site levels where degraded lands have been targeted for improved, climate risk-informed land management practices to support the achievement of Benin's LDN goals and to help meet national NDC objectives for climate change adaptation.
