Project Title: Papua New Guinea (PNG) encompasses vast marine ecosystems with globally significant biodiversity. However, sustainable management of these ecosystems

01003740 Papua New Guinea (PNG) encompasses vast marine ecosystems with globally significant biodiversity. However, sustainable management of these ecosystems is constrained by population growth, coastal development, and climate change. This project will strengthen the protection and sustainable use of coastal and marine ecosystems through: 1) Implementing natural capital accounting, addressing cross-cutting upstream challenges through integrating the value of marine ecosystems into economic decision-making; 2) Establishing and improving Marine Protected Areas (MPAs) and adopting Marine Spatial Planning for improved policy coherence and better governance of coastal resources; 3) Addressing landscape level challenges in the tourism, food-fisheries, and urban development sectors through implementation of Nature-based Solutions and demonstrating public-private-community partnerships, with active engagement of local communities through Free, Prior, and Informed Consent (FPIC); and 4) Fostering knowledge sharing and learning by developing a community of practice and disseminating best practices both nationally and globally. The project will scale up successful pilots, leveraging past interventions to expand global environmental benefits. It will also coordinate capacity-building initiatives for key stakeholders, ensuring the long-term sustainability of conservation efforts. These efforts will be complemented by ongoing monitoring and evaluation to assess project impacts and support adaptive management. Through these activities, the project aims to place 3.9 million hectares of marine areas under improved management, restore 20,000 hectares of mangroves, move over-exploited fisheries to sustainable levels, and avoid 19	Activity 1: Natural capital accounting & ecosystem services	1/2/2025	5/14/2031		62000	Global Environment Fund Trustee	71600 - Travel	2,500.00

Project Title: Papua New Guinea (PNG) encompasses vast marine ecosystems with globally significant biodiversity. However, sustainable management of these ecosystems

01003740 Papua New Guinea (PNG) encompasses vast marine ecosystems with globally significant biodiversity. However, sustainable management of these ecosystems is constrained by population growth, coastal development, and climate change. This project will strengthen the protection and sustainable use of coastal and marine ecosystems through: 1) Implementing natural capital accounting, addressing cross-cutting upstream challenges through integrating the value of marine ecosystems into economic decision-making; 2) Establishing and improving Marine Protected Areas (MPAs) and adopting Marine Spatial Planning for improved policy coherence and better governance of coastal resources; 3) Addressing landscape level challenges in the tourism, food-fisheries, and urban development sectors through implementation of Nature-based Solutions and demonstrating public-private-community partnerships, with active engagement of local communities through Free, Prior, and Informed Consent (FPIC); and 4) Fostering knowledge sharing and learning by developing a community of practice and disseminating best practices both nationally and globally. The project will scale up successful pilots, leveraging past interventions to expand global environmental benefits. It will also coordinate capacity-building initiatives for key stakeholders, ensuring the long-term sustainability of conservation efforts. These efforts will be complemented by ongoing monitoring and evaluation to assess project impacts and support adaptive management. Through these activities, the project aims to place 3.9 million hectares of marine areas under improved management, restore 20,000 hectares of mangroves, move over-exploited fisheries to sustainable levels, and avoid 19	Activity 1: Natural capital accounting & ecosystem services	1/2/2025	5/14/2031		62000	Global Environment Fund Trustee	71200 - International Consultants	33,750.00
