Project Title: The objective of the Child Project, which is part of the GEF-8 Amazon Sustainable Landscapes Program Phase 3 (ASL3), is to strengthen integrated lan

01004118 The objective of the Child Project, which is part of the GEF-8 Amazon Sustainable Landscapes Program Phase 3 (ASL3), is to strengthen integrated landscape conservation and sustainable management in the West Suriname intact forest landscape. This will be achieved through four interrelated components that will allow West Suriname Amazon intact forests to be effectively conserved and managed, implementing a sustainable inclusive nature-based economy, enhancing governance and landscape planning for conservation and sustainable development, and knowledge management and regional collaboration. This strategy is in line with the ASL 3 Program strategy; in addition, the Child project will work with the regional Coordination Platform through planned activities under knowledge management and regional collaboration, which will include Brazil who shares the same forest. The barriers to be addressed are: insufficient institutional framework, co-management and financing in areas under different protection regimes; insufficient fund allocation, technical assistance and incentives towards sustainable livelihoods and production; weak governance and incomplete legal framework towards integrated landscape planning, PA management, and wildlife and forest conservation; and Insufficient integration of scientific traditional knowledge in decision making, knowledge sharing, and awareness. This strategy will reduce deforestation and the degradation of intact forest landscapes in West Suriname delivering global environmental benefits including 148,386 hectares (ha) of terrestrial PAs created or under improved management, 168,000 ha of landscapes under improved practices, and 16,564,051 tCO2e of	Effective management of the Central Suriname Nature Reserve, including participatory updating of CSNR management and designation of ITPs as park rangers and monitoring, law enforcement, and sustainable funding for new PAs and OECMs and with	6/10/2025	6/9/2030		62000	Global Environment Fund Trustee	71300 - Local Consultants	24,000.00

Project Title: The objective of the Child Project, which is part of the GEF-8 Amazon Sustainable Landscapes Program Phase 3 (ASL3), is to strengthen integrated lan

01004118 The objective of the Child Project, which is part of the GEF-8 Amazon Sustainable Landscapes Program Phase 3 (ASL3), is to strengthen integrated landscape conservation and sustainable management in the West Suriname intact forest landscape. This will be achieved through four interrelated components that will allow West Suriname Amazon intact forests to be effectively conserved and managed, implementing a sustainable inclusive nature-based economy, enhancing governance and landscape planning for conservation and sustainable development, and knowledge management and regional collaboration. This strategy is in line with the ASL 3 Program strategy; in addition, the Child project will work with the regional Coordination Platform through planned activities under knowledge management and regional collaboration, which will include Brazil who shares the same forest. The barriers to be addressed are: insufficient institutional framework, co-management and financing in areas under different protection regimes; insufficient fund allocation, technical assistance and incentives towards sustainable livelihoods and production; weak governance and incomplete legal framework towards integrated landscape planning, PA management, and wildlife and forest conservation; and Insufficient integration of scientific traditional knowledge in decision making, knowledge sharing, and awareness. This strategy will reduce deforestation and the degradation of intact forest landscapes in West Suriname delivering global environmental benefits including 148,386 hectares (ha) of terrestrial PAs created or under improved management, 168,000 ha of landscapes under improved practices, and 16,564,051 tCO2e of	Effective management of the Central Suriname Nature Reserve, including participatory updating of CSNR management and designation of ITPs as park rangers and monitoring, law enforcement, and sustainable funding for new PAs and OECMs and with	6/10/2025	6/9/2030		62000	Global Environment Fund Trustee	72200 - Equipment and Furniture	4,000.00

Project: 01004118 **Report Date:** 7/1/2026

Project Title: The objective of the Child Project, which is part of the GEF-8 Amazon Sustainable Landscapes Program Phase 3 (ASL3), is to strengthen integrated lan

01004118 The objective of the Child Project, which is part of the GEF-8 Amazon Sustainable Landscapes Program Phase 3 (ASL3), is to strengthen integrated landscape conservation and sustainable management in the West Suriname intact forest landscape. This will be achieved through four interrelated components that will allow West Suriname Amazon intact forests to be effectively conserved and managed, implementing a sustainable inclusive nature-based economy, enhancing governance and landscape planning for conservation and sustainable development, and knowledge management and regional collaboration. This strategy is in line with the ASL 3 Program strategy; in addition, the Child project will work with the regional Coordination Platform through planned activities under knowledge management and regional collaboration, which will include Brazil who shares the same forest. The barriers to be addressed are: insufficient institutional framework, co-management and financing in areas under different protection regimes; insufficient fund allocation, technical assistance and incentives towards sustainable livelihoods and production; weak governance and incomplete legal framework towards integrated landscape planning, PA management, and wildlife and forest conservation; and Insufficient integration of scientific traditional knowledge in decision making, knowledge sharing, and awareness. This strategy will reduce deforestation and the degradation of intact forest landscapes in West Suriname delivering global environmental benefits including 148,386 hectares (ha) of terrestrial PAs created or under improved management, 168,000 ha of landscapes under improved practices, and 16,564,051 tCO2e of	Effective management of the Central Suriname Nature Reserve, including participatory updating of CSNR management and designation of ITPs as park rangers and monitoring, law enforcement, and sustainable funding for new PAs and OECMs and with	6/10/2025	6/9/2030		62000	Global Environment Fund Trustee	72100 - Contractual Services-Companies	46,000.00
