01004284 To achieve Outcome 2.1 Landscape-seascape strategic objectives advanced through community-led grants, the programme will provide grant financing to the different initiatives highlighted in the CPSs, as well as seek further funding to co-finance them. Although one-off co-financing will be welcomed, the SGP OP8 will seek to establish partnerships at global, country and landscape levels for ongoing programmatic support to landscape-seascape strategies. These partnerships will be pursued with donors, public sector institutions and the private sector across these three levels.65. The programme will seek to establish collaborative partnerships with local governments, particularly where devolved budgeting is national policy, as well as with national governmental and non-governmental entities. The SGP OP8-Part 1 will also work to engage MSMEs and other private sector entities in financing landscape-seascape strategies in relation to the different links of key value chains; as such, the programme will support the participatory formulation of value chain strategies for sustainably produced agricultural, livestock or fisheries products, as well as value-added products from sustainable harvests of non-timber forest products and the like.66. The essential principle underpinning Outcome 2.1 is that local CSOs/CBOs, particularly those representing the most vulnerable and marginalized, are only in a position to adopt new production practices or technological innovations that enhance sustainability, resilience and global environmental benefits if the risk of failure is nominal and the socio-economic benefits relatively significant. While a one-off grant provides a single capital infusion to an organization of producers or other local actors,	Outcome 2.1_CORE	10/16/2024	10/16/2028		62000	Global Environment Fund Trustee	72600 - Grants	45,682.00
