Project: 01004354 **Report Date:** 7/1/2026

Project Title: Liberia's smallholder fishers and farmers are experiencing increasing climate change related risks to their livelihoods. Flooding of agricultural land after heavy

01004354 Liberia's smallholder fishers and farmers are experiencing increasing climate change related risks to their livelihoods. Flooding of agricultural land after heavy rainfall events, especially in combination with high average temperatures and the occurrence of extreme heat spells are a direct cause of post-harvest losses and the occurrences of crop pests and diseases. Marine heatwaves, and coastal storm surges lead to a deterioration of fish stock, coastal erosion and coastal flooding. These hazards are projected to increase in frequency, intensity and duration. The capacity of smallholder farmers and fishermen and micro, small and medium sized enterprises (MSME's) in agriculture and fishery to absorb or overcome climate related damages, or to reduce climate related risks is low. Land, forest and coastal degradation, inadequate extension services, limited infrastructure and insufficient financial incentives and mechanisms have namely already held back smallholder agriculture and fishery sectors in terms of production, value chain development and sustaining livelihoods and food security. Alternative livelihood options in sustainable ecotourism for example are still underexplored. The project's objective is 'building climate resilience in natural-resource dependent rural communities of Liberia through systems-based, transformational adaptation in the agricultural, fisheries and ecotourism sectors.' It will increase smallholder adaptive capacity by restoring natural resources, strengthening extension services, strengthening access to finance, and strengthening sustainable value chains. It will employ a combination of interventions that focus on i) the adoption of resilient and regenerative practices among farmers and	Alternative, climate-resilient livelihoods, including ecotourism, supported by improved market access and value-added services in agricultural and coastal areas	1/1/2026	2/20/2032		62160	Global Environment Fund Trustee	75700 - Training, Workshops and Confer	28,000.00
