Annual Work Plan

B0396 - Cambodia - Phnom-Penh

Project: 01005543

Report Date: 7/2/2026

Project Title: The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy.

Year: 2026

Output	Key Activities	Timeframe		Responsible Party	Planned Budget			
		Start	End		Fund	Donor	Budget Descr	Amount US\$
01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication.	Activity1.1.1 At least 3 targeted regulatory and policy measures to reduce the production and consumption	3/4/2026	12/31/2030		30000	UNITED NATIONS ENVIRONMEN T PROGRAMME	67400 - Labour Cost – IP Staff	10,000.00

01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication. 01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication. 01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication. 01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication. Project: 01005543

Report Date: 7/2/2026

Project Title: The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy.

Year: 2028

Output	Key Activities	Timeframe		Responsible Party	Planned Budget			
		Start	End		Fund	Donor	Budget Descr	Amount US\$
01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication. 01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication. 01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication. 01005543 The use of single-use plastics (SUPs) has rapidly accelerated in Cambodia, particularly in the food and beverage (F&B) and tourism sectors, resulting in negative impacts on human health, the environment, and the economy. The Royal Government of Cambodia has developed various policies and strategies to support a circular economy (CE). However, their implementation is hindered by a lack of enforceable regulations, financial instruments, capacity, and public awareness. To address these challenges, the project aims to catalyze CE approaches by: i) Strengthening the regulatory environment through policies and standards, ii) Mobilizing finance and engaging the private sector for innovation, iii) Promoting behavioural change among consumers and businesses, and iv) Ensuring national coordination and knowledge sharing. Target provinces include Phnom Penh, Siem Reap, and Preah Sihanouk for interventions in the hospitality, tourism, and F&B sectors. The project will attain the following four (4) project components: • Project Component 1: Enabling a regulatory and policy environment; • Project Component 2: Engagement of the F&B sector for innovation and mobilization of finance for CE measures; • Project Component 3: Promotion of behavior and social change towards CE solutions among citizens and the F&B private sector andnd tourism industries ; • Project Component 4: National and programme-level coordination, knowledge management and communication.
