01005582 The Anbar Province (hereafter Anbar, or Anbar Governorate), located in Western Iraq, faces urgent needs for sustainable biodiversity management and ecosystem restoration. Over 50% of its natural landscapes are experiencing increasing land degradation and the interplay of climate change with unsustainable farming and land management practices has eroded biodiversity, as well as affected vegetative and agricultural yields; thus amplifying poverty risks among vulnerable groups – particularly women, who often have limited access to land, resources, and decision making power, and whose livelihoods depend on land resources.	Outcome 1.1: Strengthened policies, regulatory and governance frameworks for effective biodiversity conservation, sustainable land management and ecosystem restoration	2/20/2026	5/20/2032		62000	Global Environment Fund Trustee	71200 - International Consultants	30,000.00

01005582 The Anbar Province (hereafter Anbar, or Anbar Governorate), located in Western Iraq, faces urgent needs for sustainable biodiversity management and ecosystem restoration. Over 50% of its natural landscapes are experiencing increasing land degradation and the interplay of climate change with unsustainable farming and land management practices has eroded biodiversity, as well as affected vegetative and agricultural yields; thus amplifying poverty risks among vulnerable groups – particularly women, who often have limited access to land, resources, and decision making power, and whose livelihoods depend on land resources.
