UNITED NATIONS DEVELOPMENT PROGRAMME

PROJECT DOCUMENT

Uzbekistan

Project Title: Support to effective, resilient and inclusive governance systems for health

Project Number: 00119180

Implementing Partner: Ministry of Health of the Republic of Uzbekistan

Start Date: 01.12.2019 End Date: 31.12.2025 LPAC Meeting date: 26.12.2019

Brief Description

Overall goal of the project is to support the Government of Uzbekistan in strengthening the capacity of the national healthcare system on effective implementation of inclusive programmes and supply chain management. The project is expected to contribute to the establishment of an effective system of provision of medicines and medical supplies to population including vulnerable groups, improved access to prevention services, high quality medicines and health products for diagnostics and treatment of HIV, COVID-19, tuberculosis, non-communicable diseases (NCDs) and other socially significant diseases, and increased capacity of health sector professionals to plan, forecast and budget healthcare and patient needs. The project will also help to strengthen the capacity of the Ministry of Health, Service for Sanitary and Epidemiological Welfare and Public Health, Republican AIDS Center, Republican Specialized Scientific and Practical Medical Center for Phthisiology and Pulmonology, and other medical institutions in planning and managing the health system.

The outcome of the project is to assist the Government in the implementation of national reform agenda in further development of the health sector in line with Action Strategy for 2017-2021, in line with Concept of Health sector Development for 2019-2025, and SDGs 3 and 16.

Key partners are the Ministry of Health, Service for Sanitary and Epidemiological Welfare and Public Health, Republican AIDS Center and other relevant agencies and stakeholders engaged in health sector development in Uzbekistan.

UNDAF 2016-2020 - Outcome 4.

UNSDCF 2021-2025 - Outcome 4.

UNDP Strategic Plan 2018-2021

Outcome 1: Promote poverty reduction in all forms and dimensions.

Intermediate Result (Governance) 1.2.1 Strengthened capacity at national subnational levels to promote inclusive local economic development, provision of basic services, incl. on HIV / AIDS.

1. I. SITUATION ANALYSIS

The Global Agenda 2030 for Sustainable Development has set an ambitious target to end AIDS, tuberculosis and malaria as public health threats by 2030 (SDG 3). The achievement of this target will be possible only if effective, cost-efficient and sustainable national response to these three diseases are designed and implemented with meaningful involvement of affected people and communities, and making sure that no one is left behind.

The formation of a healthy lifestyle among the population, the protection of motherhood and childhood are one of the main strategic policy directions of the Government of Uzbekistan. In this regard, over the past two years, the country has taken a number of serious measures to create a unified healthcare management system, develop the private sector in the healthcare system, improve the quality of medical services and create favorable conditions for the formation of a healthy generation.

As part of measures to reform the healthcare system implemented in the republic, it was possible to achieve certain results in the formation of a modern system of medical care for the population, including the prevention, diagnosis and treatment of the disease caused by the human immunodeficiency virus (hereinafter - HIV infection).

At the same time, systemic shortcomings and problems that have accumulated in recent years in the organization of health care activities hinder the effective solution of tasks to further improve the system of public health protection.

A full-fledged **concept defining strategic goals in planning and managing the healthcare sector** has not been implemented. This is crucial to ensure that the ongoing reforms are not fragmented and allow to meet the expectations and demands of the population on the quality of healthcare.

The estimated health financing system is based on outdated mechanisms that are not in line with international practice, which leads to **inefficient use of financial resources** and chronic underfunding of the sector, including procurement in the field of antiretroviral drugs.

Box 1.

The country also has a number of problems in terms of organizing and planning the procurement of medicines and medical supplies. In particular:

- lack of a single organizational scheme for the procurement and distribution of medical goods;
- gaps in procurement planning mechanisms. Procurement planning is carried out in the process of forming the draft state budget, which imposes its limitations, first of all, with the forecast procurement period, which does not exceed one year;
- lack of methodological support for the public procurement system;
- the opacity of the public procurement system;
- policed procurement methods are not sufficiently regulated;
- imperfection of legislation in the field of public procurement.

The low efficiency of work on the prevention and early detection of diseases, patronage and the formation of a healthy lifestyle is the reason for the increase in citizens' requests for specialized medical care. The continuity between the different levels and stages of medical care for the population, including rehabilitation treatment and therapy, is poorly developed. The current human resource management policy does not allow predicting the prospects for providing specialists at all levels of medical care, especially primary care, as well as the training of organizers and managerial personnel of the healthcare system.

The integration of medical practice with education and science against the background of the low innovative potential of specialized centers reflects the unsatisfactory level of introduction of advanced achievements of medicine in the treatment and diagnostic process. There are no uniform standards in the field of e-health,

modern software products that provide integration and effective management of medical services have not been introduced, existing information systems and technologies are fragmented and are narrowly targeted.

Disadvantages and problems exist in **HIV response among the population of Uzbekistan**. Despite the decrease in the incidence of nosocomial infections, there are drawbacks in the prevention of infections transmitted through the blood in medical institutions. No proper measures are taken to ensure timely and complete provision of medical instruments and supplies to medical institutions, especially in primary health care.

In some places, especially in remote areas, there are problems in the uninterrupted supply of medical facilities with electricity and clean drinking water, which negatively affects the quality of **instrument sterilization and the safety of treatment and preventive procedures**. The level of equipment of the sterilization departments of medical institutions does not meet the requirements when it comes down to the necessary equipment and inventory, and there is no modern approach to the methods of organizing sterilization measures. The **coverage of inpatient treatment of people living with HIV (PLHIV) in the regions and rural areas remains insufficient**, the poor material and technical base of regional AIDS centers and interdistrict HIV diagnostic laboratories has a negative impact on the quality of work.

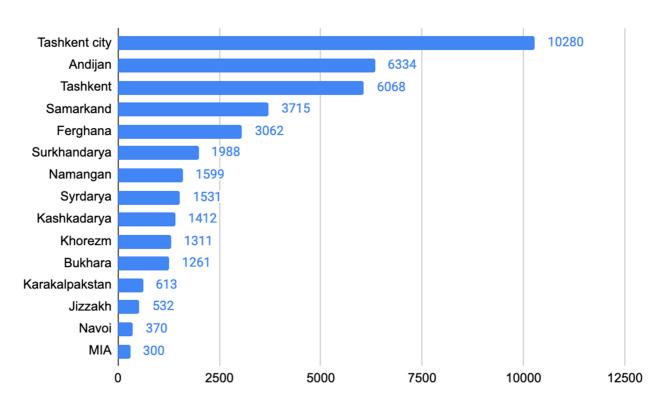

Chart 1. Number of people living with HIV in the regions of Uzbekistan as of 1 Jan 2019

As of 1 Jan 2019, 40,376 people living with HIV were registered in Uzbekistan. Women make up 45% of PLHIV. The main regions in which PLHIV are most registered are Tashkent city, Andijan and Tashkent regions (see Chart 1). The intensive indicator in the republic was 12.4 cases per 100 thousand of the population in 2018. The main route of HIV transmission is through sex (72%) and parenteral (17.5%), while the vertical decreased to 0.1%. The main cases of registration of PLHIV occur in the age group of 30-39 years (30.2%) and 40-49 years (24.3%). The prevalence of HIV among vulnerable groups is among IDUs - 5.1%, LIHI-3.2% and MSM - 3.7% for 2017. Annually, about 5.0 million remedies are distributed through Trust Cabinets for groups at higher risk of HIV infection. More than 75 thousand people were referred to narrow specialists (narcologists, obstetrician-gynecologists, dermatovenereologist, therapists, psychologists, etc.).

Non-communicable diseases in Uzbekistan cause 78% of all deaths every year¹. In 2017, the diseases of the circulatory system (69%), including coronary heart disease, arterial hypertension and their complications (myocardial infarction, cerebral infarction), took first place in the overall structure of the indicators of

¹ The concept for the prevention of noncommunicable diseases, supporting a healthy lifestyle and increasing the level of physical activity of the population for 2019 - 2022. http://lex.uz/docs/4111360

mortality standardized by gender and age. They are followed by malignant neoplasms (8%), diabetes mellitus (3%) and chronic respiratory diseases (3%).

Box 2.

Noncommunicable diseases - mainly cardiovascular diseases, diabetes, cancer and chronic respiratory diseases - are now the most common cause of death in the world. 38 million people die from NCDs annually, including 16 million prematurely, under the age of 70 years. NCDs bear the same, if not more, burdens on low- and middle-income countries (LMICs). They account for more than 80% of premature deaths from NCDs².

According to the World Health Organization, in 2016, the economic damage caused by noncommunicable diseases amounted to about 9.3 trillion UZS, which is equivalent to 4.7 percent of the country's gross domestic product.

Experts note that 31 percent of premature mortality from noncommunicable diseases in Uzbekistan can be prevented or delayed by preventing risk factors and improving the organization and provision of medical care for patients suffering from noncommunicable diseases.

Over the years, the country adopted the Concept of development of the healthcare system of the Republic of Uzbekistan for 2019-2025 in order to formulate new concept models of organizing and financing health care, providing a radical increase in the effectiveness, quality and accessibility of medical care to the population, introducing modern achievements of medical science and technology, as well as in accordance with the objectives of the Strategy of Action in five priority areas for the development of the Republic of Uzbekistan in 2017 – 2021. This concept has been developed in accordance with the regulatory legal acts of the Republic of Uzbekistan governing activities in the healthcare sector, as well as international treaties in the field of public health under the framework of the regional Health 2020 policy and Sustainable Development Goals 2030.

As international funding becomes more limited in certain contexts, a greater share of financing must come from domestic sources, primarily governments, in line with the principles of global solidarity and shared responsibility. Public financing of CSO-led service delivery for treatment, prevention and care programs for the three diseases is often referred to as "social contracting". It is widely recognized as an effective and cost-efficient approach to reinforce national responses to health challenges.

2. II. STRATEGY

Based on the situational analysis and in accordance with national priorities for health development, the Project proposes the following strategy for addressing existing problems and challenges (theory of change):

By 2025, the most vulnerable benefit from enhanced access to gender- sensitive quality health, education and social services By 2020, the population will use quality, equitable and affordable health services throughout their life cycle The government is assisted in developing effective, sustainable, and inclusive health management systems, and in minimizing the impact of COVID-19 on the successful implementation of health programs National healthcare system is strengthened for effective supply chain management and inclusive programs National capacity of the Republic of Uzbekistan is The national capacity of the health care system of the strengthened for effective supply chain management Republic of Uzbekistan is strengthened to effectively and inclusive programs to combat HIV, tuberculosis respond to the COVID-19 pandemic and other diseases 3. Increased 1. The basis for 2. The health 4. Effective, 5. Effective, transparency, the introduction transparent, and transparent and system is efficiency and of effective strengthened and favorable favorable quality of the focused on the conditions have mechanisms of conditions have national system of prevention and been created for been created to state-social central planning, partnership has control of implementing implement forecasting, been created noncommunicable programs and COVID-19 procurement, projects to combat and oncological response storage and diseases the spread of HIV programs and distribution of and tuberculosis projects drugs and medical goods

The project will contribute to the achievement of the Outcome 4 of the United Nations Sustainable Development Cooperation Framework 2021-2025 – By 2025, the most vulnerable benefit from enhanced access to gender- sensitive quality health, education and social services (program outcome). To this end, assistance will be provided to the Government of Uzbekistan in the development of effective, sustainable and inclusive health management systems, and the impact of COVID-19 on the successful implementation of health programs will be minimized (project outcome).

This project outcome will be achieved by strengthening the national capacity of the health care system of the Republic of Uzbekistan in two key areas: (1) effective supply chain management and implementation of inclusive programs to fight HIV, tuberculosis and other diseases; (2) effective response to the COVID-19 pandemic and its negative impact on the implementation of health projects and programs.

In particular, the project envisages the following interventions (components):

1. Create foundations for the introduction of effective mechanisms of state-social partnership to expand access to healthcare services and improve their quality, ensure the involvement of citizens and NGOs, and increase the efficiency of the use of public funds.

- 2. Strengthen the health system and focus on the prevention and control of noncommunicable and oncological diseases and their underlying social determinants through needs-based primary health care and universal health coverage.
- 3. Increase transparency, efficiency and quality of the national system of centralized planning, forecasting, procurement, storage and distribution of drugs and medical goods.
- 4. Create effective, transparent and favorable conditions for the implementation of programs and projects to counteract the spread of HIV and tuberculosis, access of MARPs and PLHIV to the prevention and antiretroviral therapy programs based on the UN standard 90-90-90, Treatment for all.
- 5. Create effective, transparent and favorable conditions for the implementation of programs and projects to combat the spread of COVID-19 and reduce the negative impact of the COVID-19 pandemic on the successful implementation of health programs.

Within the framework of the **first component**, the project will:

- Review and analyze legislation and legal mechanisms for the development of social partnership/contracting in the health sector;
- Develop and pilot modern models of state and social partnership, providing for social and medical care at home and several other measures;
- Organize and implement joint research to create methodological guidelines on the piloting and development of social partnership/contracting in the field of healthcare;
- Organize and conduct training, scientific and practical events and consultations, and study tours on the development of social partnership in the health sector;
- Develop a mechanism for holding competitions and providing grants for NGOs in the framework of pilot projects of social partnership in the field of healthcare.

Within the framework of the **second component**, the project will:

- Review and analyze legislation and legal mechanisms in the field of prevention of noncommunicable diseases:
- Develop legal frameworks, standards and criteria for medical events (medical examination, national screenings, consultations, etc.) aimed at early detection of factors leading to the development of noncommunicable and oncological diseases;
- Foster partnerships with public organizations in the formation of a healthy environment and raising public awareness on early detection of NCDs and cancers;
- Develop recommendations on improving state policy and legislation on the regulation of the main determinants of NCDs (in the field of alcohol and tobacco production, fast food, foods with high sugar content, etc.);
- Facilitate reducing modifiable risk factors for noncommunicable diseases and their underlying social determinants by creating conditions increasing overall public health.

Within the framework of the third component, the project will:

- Review the public system of procurement of medicines and develop recommendations to improve legislation in this domain;
- Develop unified mechanism and standards to determine the needs of healthcare organizations in medicines, equipment, consumables and spare parts;
- Design and develop digital solutions to manage accounting, distribution and consumption of medicines;
- Assist in the construction and launch of central warehouses and equip them with vehicles in accordance with international standards;
- Train the Ministry of Health system specialists on modern methods of supply chain management;
- Develop legal and institutional frameworks for access to international platforms and tenders for the purchase of imported medicines and medical products.

Within the framework of the **fourth component**, the project will:

- Assist the Ministry of Health, Service for Sanitary and Epidemiological Welfare and Public Health, Republican Center for Combating AIDS, Republican Specialized Scientific and Practical Medical Center for Phthisiology and Pulmonology in the management and implementation of international and state grant programs on prevention and treatment of HIV, tuberculosis and others diseases;
- Develop and implement HIV and tuberculosis prevention, treatment, care and support programs for vulnerable groups (migrants, their families, PLHIV, youth, prisoners) and the general population;
- Assist in the uninterrupted supply of medicines, medical equipment and goods, diagnostic test systems, and antiretroviral drugs for the prevention and treatment of HIV infection;
- Assist in the development and implementation of the national plan on treatment of HIV and tuberculosis, including treatment schemes, planning, provision of medical services, monitoring and reporting on the results of treatment for all in need (adults and children) and pregnant women;
- Develop and disseminate information materials and raise awareness of the population on HIV infection, tuberculosis in the framework of social partnership with NGOs, local communities and interested government agencies and khokimiyats;
- Assist in the creation of a unified national e-health management system, including development of digital solutions at various levels and for specialized centers of the Ministry of Health.

Within the framework of the **fifth component**, the following actions will be carried out:

- Assist the Ministry of Health, Service for Sanitary and Epidemiological Welfare and Public Health, Republican Center for Combating AIDS, Republican Specialized Scientific and Practical Medical Center for Phthisiology and Pulmonology in the management and implementation of international and state grant programs on prevention and treatment of COVID-19;
- Develop and implement COVID-19 prevention, treatment, care and support programs for vulnerable groups (migrants, their families, PLHIV, youth, prisoners) and the general population;
- Assist in providing medical institutions with medicines, medical equipment and goods, test systems for the diagnosis, prevention and treatment of COVID-19;
- Implement programs for express diagnostics of COVID-19 among vulnerable groups and the general population;
- Assist in improving the efficiency of the medical waste disposal system;
- Train healthcare professionals in modern methods of diagnosis, prevention and treatment of COVID-19;
- Develop and distribute information materials and raise public awareness on COVID-19 in the framework of social partnership with NGOs, local communities and interested government agencies and khokimiyats;
- Assist in the development of digital solutions at various levels and for specialized centers of the Ministry of Health on effective COVID-19 response.

All five of these result groups will help strengthen the national capacity of the health system to effectively manage supply chains and inclusive programs, which, in turn, will allow the people of Uzbekistan access to quality, equitable and affordable health services throughout their entire life cycle.

3. III. RESULTS AND PARTNERSHIPS

Expected Results

The final goal of the project is to improve the quality and efficiency of the national healthcare system's governance, including ensuring access to quality medicines and services for the most vulnerable segments of the population, as well as to minimize the negative impact of the COVID-19 pandemic on the implementation of health programs.

Key outputs of the project are:

Output 1. National capacity of the healthcare system of Uzbekistan is strengthened for effective supply chain management and inclusive programs to combat HIV, tuberculosis and other diseases

Output 2. National capacity of the healthcare system of Uzbekistan is strengthened to effectively counter the spread of the COVID-19 pandemic

The **first output** of the project will be achieved through the implementation of the following four groups of activities:

Component 1: Enhancement of governance system for health and enabling environment for establishment of social contracting mechanisms in health sector

- 1.1. Assessment of current situation, governance system in health sector, including capacity assessment of the Ministry of Health;
- 1.2. Review best international practices and widely used approaches in human resource management for effective governance within health sector;
- 1.3. Assistance in design of mechanism and management standards in health sector, as well as key performance indicators of managerial level staff of Ministry of Health and its subdivisions;
- 1.4. Support to capacity building activities of Ministry of Health, NGOs and other agencies involved in piloting social contracting through workshops, seminars and study visits;
- 1.5. Assessment of the current situation and study of the prerequisites for the introduction of social contracting in healthcare sector;
- 1.6. Review of best international experience and various approaches to the implementation of social contracting in transitional economies, engagement of international experts and consultants;
- 1.7. Assistance in the development of draft legal acts regulating interaction of executive authorities with public and other non-governmental non-profit organizations in the field of healthcare;
- 1.8. Assistance in the development of service standards and their piloting using PSP mechanisms/models;
- 1.9. Facilitating of functional review of the Ministry of Health and identification of relevant and socially significant areas for piloting and possible scale-up of social contracting mechanisms;
- 1.10. Support for the development of a national social contracting mechanism in the health sector.

Component 2. Assisting in the development of a management system for countering non-communicable and oncological diseases

- 2.1. Drafting an action plan for prevention and control of noncommunicable diseases based on institutional analysis;
- 2.2. Assistance in the development of multisectoral national measures to combat NCDs, including the development of strategic plans and investment cases, as well as integration of issues related to combating NCDs in national and local development plans and strategies;
- 2.3. Facilitation support to the establishment of coordination platforms/agencies for addressing NCDs, oncological and other diseases;
- 2.4. Strengthening evidence-based frameworks in legislation, executive, administrative and other measures to prevent NCDs, oncological and other diseases, as well as regulation of structural driver areas of NCDs;

- 2.5. Examining issues related to the social, economic and environmental determinants of health and health inequalities;
- 2.6. Analysis and study of international best practices in combating NCDs and oncological diseases and organization of pilot initiatives in this area within social contracting tools.

Component 3: Strengthening national procurement and supply management system for medicines and other health products

- 3.1. Improving national systems for forecasting, planning and managing public procurement of medicines and health products;
- 3.2. Further development of the national system for storage and delivery of medical goods (antiretroviral drugs) based on international best practices;
- 3.3. Expanding access to key populations of high-quality medicines, diagnostic test-kits and services for the most vulnerable groups;
- 3.4. Ensure timely supply of medicines, and adequate provision of high-quality medicines at the reasonable price and short delivery time for the country;
- 3.5. Assistance in the development of technical specifications and creation of digital procurement management, monitoring and forecasting systems;
- 3.6. Assistance in the implementation and organization of the procurement activities of medicines and other health products in line with WHO prequalification standards;
- 3.7. Enhanced cooperation and an exchange of experience of national agencies of Uzbekistan, including SUE "O'zmedimpeks", AK "Dori-Darmon" and others with UNDP procurement units, including but not limited to UNDP Global Fund Health Implementation Support Team in Geneva and Copenhagen;
- 3.8. Organization of procurement training for national counterparts within the framework of the Chartered Institute of Procurement and Supply (CIPS).

Component 4: Assistance in countering the spread of HIV infection, tuberculosis and other infectious diseases in Uzbekistan

- 4.1. Assessment and study of the forecasting, planning and management system for the procurement of drugs, test systems and medical goods for HIV infection and tuberculosis;
- 4.2. Organization of procurement, delivery, customs clearance and certification of medicines and other medical supplies (in particular ART drugs, diagnostic test systems and other medical devices). In accordance with the Decree of the President of the Republic of Uzbekistan "On additional measures to counter the spread of the disease caused by HIV, and the prevention of nosocomial infections" dated June 22, 2018 No. PP-3800);
- 4.3. Assistance in the organization, management and M&E of programs and projects for the prevention, treatment, care of HIV infection, tuberculosis and other infectious diseases;
- 4.4. Conducting and organizing various studies to assess the situation and quality of services provided with the involvement of national and international consultants;
- 4.5. Enhancing the capacity of national procurement professionals in project management, planning, forecasting, effective and transparent procurement procedures, and quality assurance procedures;
- 4.6. Providing technical and expert support in planning and forecasting the country's needs for medicines (in particular ARTs, diagnostic test systems, supplies and other medical supplies;
- 4.7. Promoting the effective functioning of the Country Coordinating Committee for Cooperation with the Global Fund to Fight HIV/AIDS, Tuberculosis and Malaria" in fulfilling its main tasks and functions, and ensuring the sustainability of HIV programs until 2030;
- 4.8. Providing support and technical assistance to the Ministry of Health and its sub-bridge structures in the effective administration of international grants and programs to combat HIV infections (upon agreement and consultations);

4.9. Providing support and technical assistance to the Ministry of Health and its subordinate structures in the creation of a unified national e-health management system and its subsystems.

The **second project output** will be achieved through the implementation of the following activities:

Component 5: Helping to counter the spread of the COVID-19 pandemic in Uzbekistan

- 5.1. Assisting the Ministry of Health, the Service for Sanitary and Epidemiological Welfare and Public Health and the Republican AIDS Center, the Republican Specialized Scientific and Practical Medical Center for Phthisiology and Pulmonology in the management and implementation of international and state grants for programs for the prevention and treatment of COVID-19.
- 5.2. Development and implementation of programs for the prevention and treatment of COVID-19 among vulnerable groups and the general population.
- 5.3. Assistance in providing medical institutions with medicines, medical equipment and goods, test systems for the diagnosis, prevention and treatment of COVID-19.
- 5.4. Implementation of programs for express diagnostics of COVID-19 among vulnerable groups and the general population.
- 5.5. Providing assistance in improving the efficiency of the medical waste disposal system.
- 5.6. Training of healthcare professionals in modern methods of diagnosis, prevention and treatment of COVID-19.
- 5.7. Development and distribution of information materials and raising public awareness about COVID-19 in the framework of social partnership with NGOs, local communities and interested government agencies and khokimiyats.
- 5.8. Assistance in the creation of electronic systems at various levels and for various specialized centers of the Ministry of Health on COVID-19 response.

The implementation of the above components and activities will depend on the availability of appropriate funds in the project budget. At the same time, individual activities can be implemented earlier than others, depending on the actual mobilization of resources of the project donors.

As a result of the project implementation, it is expected to increase the efficiency of the use and distribution of resources in accordance with the real needs of medical institutions and the population, and the gradual formation of the compulsory insurance system. Studying and adapting international best practices will be key factors in financing health services and developing a national health economic model.

The project will contribute to raising the priority and relevance of the prevention of noncommunicable and oncological diseases, building the capacity of health service institutions, strengthening the quality of management, as well as the effectiveness of multisectoral activities. Reducing the costs, morbidity, consequences and deaths arising from the development of noncommunicable diseases and cancers is expected by minimizing the modifiable risk factors for noncommunicable diseases and cancers and their underlying social determinants by creating conditions that promote health. At the same time, it is necessary to provide effective models for involving public organizations in the prevention and reduction of the burden of non-communicable and oncological diseases.

As part of the project, a modern National System for the supply of drugs, medical goods and equipment will be developed. For this, various models and experiences of effective mechanisms in this area will be studied and a single center will be created that will carry out planning, forecasting, procurement, storage, distribution and delivery of drugs, medical goods and equipment. Special attention will be paid to the issues of transparency of procurement and prevention of corruption. As a result, effective management of public funds allocated for procurement, timely provision of medical institutions, and prevention of shortages and surpluses of drugs will be ensured.

Counteracting the spread of HIV infection will be one of the priority areas of the Project. Within the framework of the Project, various programs and projects will be organized and implemented in the areas of prevention, treatment, care and support of PLHIV. New innovative approaches will be developed to combat HIV infection among the general population, UGV and PLHIV. All registered PLHIV (adults and children),

pregnant women with HIV infection will be provided with access to ART by purchasing high-quality medicines recommended by WHO.

Resources Required to Achieve the Expected Results

During the implementation of the project, along with the project team and human resources, a number of cost categories will be required for the effective functioning of the project. These costs include:

The project will mobilize funds from donors (the Global Fund, bilateral donors, IFIs, etc.) and the state budget, using an approach based on a single de The project will mobilize donor funds (Global Fund to Fight HIV/AIDS, Tuberculosis and Malaria, bilateral donors, IFIs, etc.) and the state budget, using a single platform approach for decision-making (MEA Secretariat support) and global procurement channels, as well as access to international expertise and knowledge. The project will also use the knowledge and experience of working groups on the implementation of the UN Framework Cooperation Program in Uzbekistan for 2021-2025. The knowledge and expertise of UNDP health specialists from the UNDP Regional Center in Istanbul and UNDP offices in Geneva and Copenhagen will be attracted.

In the implementation of the project, along with the remuneration of the project team and human resources, a number of cost categories will be required for the effective operation of the project. These costs include:

<u>General expenses</u>: Cargo insurance, cargo handling and storage at the airport, customs warehousing, certification, sampling for testing in the laboratory, obtaining certificates of conformity for each series of drugs, conclusions of the sanitary and epidemiological services and other expenses associated with the purchase, transportation and customs clearance of such goods. This also includes rental of premises, office equipment (during the period when the office will not be provided by the national party), expenses for security, insurance, utility bills (if applicable) services necessary to support project activities;

<u>Material expenses</u>: Include office supplies, stationery, computer equipment, Internet connection, telephone equipment, etc.;

Separate areas and components of the project require the attraction of additional funds from international donors. In this regard, UNDP and the Ministry of Health/ Service of Sanitary and Epidemiological Welfare and Public Health of the Republic of Uzbekistan, on the one hand, and the Republican AIDS Center will make joint efforts (preparation of joint applications) to attract the resources of international partners.

Partnerships

UNDP will involve a wide range of national and international partners in the project implementation process.

Within the framework of the project, UNDP will work closely with a wide range of national partners, such as the Cabinet of Ministers of the Republic of Uzbekistan, the Ministry of Finance, the Agency for Sanitary and Epidemiological Well-being and public health of the Republic of Uzbekistan, the Republican AIDS Center, the Women's Committee of the Republic of Uzbekistan and other ministries and departments.

The project will also take part as an observer and an auxiliary team of the UNDP Resident Representative in Uzbekistan within the framework of the Interagency Expert Council (IEC), which reviews the implementation of grants from the Global Fund to Fight HIV / AIDS, Tuberculosis and Malaria.

As part of the WHO-led Health Coordination Platform in Uzbekistan, the project will take part in regular meetings of international partners and potential donors, including UN agencies, USAID and the World Bank. This will allow eliminating duplication in the activities of international organizations, projects and will increase the coordination of efforts of partners in this area of development.

In the process of implementation, the project will also be able to apply the accumulated experience of the UNDP Regional Hub in Istanbul (HIV / AIDS Development, Health and Development Division), UNDP Geneva and Copenhagen units towards ensuring quality and drug compliance, organizing procurement and solving operational problems.

UNDP will work to engage a community of practitioners, experts, academia, NGOs.

Risks and Assumptions

The main risks of the project are changes in state policy and legislation on health care, the deficit of the state budget for the purchase of medicines, organizational and legal reforms and staff turnover. Also, changes in donor financial assistance, the dynamics of diseases, and the determinants of NCDs can pose risks to project activities. Market fluctuations, rising prices for medical supplies and delays in supplies due to administrative barriers may affect the third and fourth components of the project. Lack of proper coordination of donors and redistribution of financial resources, or delays in the allocation of state or donor resources may affect the dynamics of the implementation of the tasks and planned activities of the project.

The project team, UNDP and the national partner will monitor these risks and make decisions on them after discussion at the meeting of the Project Board or exchange of letters.

The project manager will update the risk table quarterly (attached), depending on the expansion of the project, based on the results of monitoring these risks and report on managing and minimizing the consequences of risks at a meeting of the Project Board.

Stakeholder Engagement

To ensure synergies and consolidate its efforts, the project will work closely with other ongoing UNDP projects, including:

The project will also complement its efforts with other projects funded by international donors, as well as with other international projects implemented in Uzbekistan in the field of improving the system of public services and regional development.

In this context, the project will also take part in meetings of the Interdepartmental Expert Council (IEC) within CCM platform to coordinate the efforts of international donors in Uzbekistan on the implementation of HIV/AIDS programs and the further development of the healthcare system in Uzbekistan.

South-South and Triangular Cooperation (SSC/TrC)

Within the project implementation, appropriate South-South opportunities will be considered, as well as opportunities for triangular cooperation based on the needs of partners. In particular, the project will organize study tours to countries in the CIS and Eastern Europe (Kazakhstan, Ukraine, Moldova, and others) with successful experience in implementing reforms in a transition economy, which also have proven experience in the provision of public services in the health sector. The project will also facilitate the participation of the national side in the events organized by the UNDP Regional Center in Istanbul, UNDP offices in Geneva and Copenhagen. Along with this, subject to the availability of funding, the project will organize procurement trainings for representatives of the national side under the CIPS program (Chartered Institute of Procurement and Supply, British Institute of Supply and Procurement), which issues various certificates and diplomas for procurement specialists depending on experience and position. Thus, the project will facilitate South-South cooperation to support the exchange of knowledge and experience.

Knowledge

During the project implementation period, a number of materials will be prepared, including brief analytical documents, research reports, concept documents, infographics, information materials, presentation materials, and methodological recommendations on various topical issues and areas of project activity. To the extent possible, the project will also organize presentations of its discussions with the general public and project stakeholders. Publications of the project will be distributed in the Republican AIDS Center, territorial departments of the Ministry of Health, as well as among other ministries and departments and NGOs by agreement and decision of the Project Board.

Sustainability and Scaling Up

UNDP has a proven track record of managing health programmes, including but not limited to procuring high-quality medicines and health products in more than 50 countries using open and transparent processes, and we are a strategic partner for these countries in sharing international best practices and development solutions in strengthening national health systems.

Since 2005, UNDP in Uzbekistan has been actively involved in the implementation of national HIV programs and projects, providing assistance and support in the procurement of antiretroviral drugs for the treatment of HIV infection, as well as diagnostic test systems and other medical supplies with funds from international donors, and since 2014 - also from the State budget on the basis of requests from national partners. UNDP has significant experience in procuring high-quality medicines, medical products and products for governments in more than 50 countries based on international principles of openness and transparency and is a strategic partner of states in implementing international best practices in the development of this sphere.

Large-scale procurement of medicines at the regional and global levels, as well as long-term contracts with leading world manufacturers and suppliers of medicines, allow UNDP to reduce the cost of orders, achieve the lowest prices for medicines and shorten the time for their delivery to the country of destination. So, in 2016, thanks to efficient and transparent, as well as cost-effective procurement procedures, UNDP saved almost USD 30 million for states. These savings, in agreement with national partners, can be reinvested to purchase additional drugs, expand access to drugs for vulnerable groups of the population, and strengthen the health system as a whole.

Cooperation with UNDP will enable Uzbekistan to generate a significant amount of savings, to ensure the reliable supply of quality health products, to improve access to essential health services for vulnerable groups, to strengthen the national supply chain systems and to build resilient health systems.

Moreover, UNDP Global Fund Partnership & Health Programme Implementation Support Team (HIST) in Geneva also provides a procurement platform using consolidated international procurement architecture and significant economies of scale to secure the best prices for WHO prequalified health products within a short timeframe.

At global and regional levels, UNDP has experience in developing government policies for NCDs. The project will draw on this available opportunity to examine, model and pilot NCD prevention initiatives and provide analytical support to the Government in developing solutions to regulate NCD determinants.

In solving the identified problems, the project will use existing long-term partnerships with the Ministry of Health of the Republic of Uzbekistan, RAC, regional administration and municipalities, which will allow the project to carry out the proposed activities as part of equal cooperation with the above institutions on all project components. This will also guarantee the sustainability of project results in the future, as the aforementioned state institutions will directly participate in the development and implementation of activities proposed under the project and will influence the process of implementing reforms in the future.

After strengthening national health capacities, the project will prepare a plan for transferring the results to national partners to ensure their sustainability and further management. Appropriate consultations and expert discussions will be held on scaling up successful pilot projects of the project at the national level.

4. IV. PROJECT MANAGEMENT

Cost Efficiency and Effectiveness

The main effectiveness of the Project will be ensured through strategic and fundamental reforms in key areas of the healthcare system - Management, Financing and Procurement.

As part of the first component, a pilot model of state-social partnership in the field of healthcare will be developed. Public and non-governmental non-profit organizations, working with patients with chronic diseases, with risk groups, and providing unique services to those who for various reasons cannot rely on help from the state, successfully supplement state healthcare services. The development of this mechanism will expand the range of healthcare services, including those provided by the private sector, as well as the systematic implementation of patronage and educational programs in the healthcare sector. The project will advise national partners on creating conditions for the involvement of NGOs, by reviewing legislation, developing proposals, and piloting a model.

As part of the second component of the project, the Project will develop measures for the prevention and early diagnosis of NCDs and oncological diseases, which, in turn, will significantly reduce treatment costs, eradicate the consequences, deaths and result in various state benefits. International best practice in tax policy regarding producers / importers of determinant goods and the formation of additional resources for the national health fund will be studied.

Within the framework of the third and fourth components, the project will assist in increasing the capacity of national partners in effective centralized procurement planning, which will ensure a reduction in the cost of medicines, medical supplies, and transportation costs. A procurement forecasting system will prevent the shortage and excess of drugs (expiration, destruction, medical supplies and equipment). At the same time, centralized storage will allow for the reduction of rental / maintenance costs of local warehouses, as well as labor and utility costs. In such a supply chain management system, optimal conditions will be created for the storage of medicines, medical goods and equipment, and a centralized service for servicing equipment will be created.

The project will create a centralized system for the distribution and delivery of medicines and medical products, thereby there will be no need for each healthcare institution to cover transportation costs or maintain a separate garage.

Using the services of international purchasing agencies will ensure a downward trend in prices for medicines, medical products and equipment, as well as reduce the time for deliveries to the country.

Project Management

The project will be implemented under the National Implementation Modality (NIM) with UNDP CO's full support as per NIM guidelines. The National Agency of Project Management under the President of the Republic of Uzbekistan (NAPM) will be the Implementing Partner.

In accordance with the Letter of Agreement between UNDP and Ministry of Health/ Service of Sanitary and Epidemiological Welfare and Public Health of the Republic of Uzbekistan for the provision of support services, the UNDP Country Office in Uzbekistan may provide, at the request of the NAPM, the following support services for the activities of the project:

- (a) Identification and/or recruitment of project and programme personnel and consultants;
- (b) Identification and facilitation of training activities, seminars and workshops;
- (c) Procurement of goods and services;
- (d) Processing of payments, disbursements and other financial transactions;
- (e) Administrative services including travel authorization, visa requests and other arrangements;

Detailed description of services is provided in the Annex of this project document.

The procurement of goods and services and the recruitment of project personnel by the UNDP Country Office shall be in accordance with the UNDP regulations, rules, policies and procedures. The goods procured within

the framework of the Project and necessary for the implementation of its activities, in particular IT equipment, software & office furniture shall be transferred to the ownership of the Implementing Partner, unless the Project Board decides otherwise or the goods have been procured from the funds provided by third parties and the agreements with them stipulate other arrangements. The relevant provisions of the Standard Basic Assistance Agreement (SBAA) between the Government of Uzbekistan and UNDP, signed by the Parties on 10 June 1993, incl. the provisions on liability and privileges & immunities, shall apply to the provision of such support services. Any claim or dispute arising under or in connection with the provision of support services by the UNDP country office in accordance with this document shall be handled pursuant to the relevant provisions of the SBAA.

The geographical location of the project will be located both at the central and regional levels. The Ministry of Health will provide office space for the project, will provide full access for the project team and project visitors to the building. Moreover, the Ministry of Health will also provide separate support tools to ensure the full and uninterrupted operation of the project (including city telephone lines, equipment, electricity) and maintain external communications.

For its part, the project team will ensure proper administration, financial management, communication, monitoring and evaluation. The team will also be responsible for maintaining communication with representatives of key national, regional and local participants (stakeholders), for the timely organization of the Project Board, as well as ensuring synergies with similar UNDP projects and in the UN agency system.

The project team will also involve experts in the field of effective management with solid experience, with a full understanding of the local context. The proposed organizational structure of the project team has been carefully formed to cover the necessary level of management, coordination and policy guidance, technical knowledge, monitoring and communications.

Audit Arrangements: The Audit will be conducted in accordance with the established UNDP procedures set out in the Programming and Finance manuals by the legally recognized auditor.

Use of institutional logos on project deliverables: In order to accord proper acknowledgement to UNDP for providing funding, UNDP should appear on all relevant project publications, including among others, project hardware purchased with UNDP funds. Any citation on publications regarding projects funded by UNDP should also accord proper acknowledgement to UNDP. The UNDP logo should be more prominent — and separated from any other logo, if possible, as UN visibility is important for security purposes. The Project will not develop its own logo.

5. V. RESULTS FRAMEWORK

Intended outcome as specified in the UNSDCF Results and Resource Framework:

Outcome 4 - By 2025, the most vulnerable will benefit from increased access to gender-sensitive quality health care, education and social services

Outcome indicators as stated in the UNSDCF RRF, including baseline and targets:

Indicator 1: Percentage of adults and children requiring antiretroviral treatment who are taking antiretroviral treatment

Baseline data: 79.8% in 2014 (total number of people with HIV - 9588) Women - 49.9%, Men - 50.1%, Children under 15 years old inclusive - 36.7%

Target data: 90% by 2025

Indicator 2: Number of new HIV infections per 1,000 healthy people (NDSD 3.3.1)

Baseline: 0.132 - Men: 0.144 Women: 0.120 Under 17: 0.051 Over 18: 0.172 (2018) Target data: 0.1 by 2025

Indicator 3: Incidence of tuberculosis per 100,000 of population (3.3.2.1)

Initial data: people - 43 Men: 46.4 Women: 39.5 Under 14 years of age: 21.0 Ages from 15 to 17 years: 22.4 18 years and older: 53.9 (2018)

Target data: 37 by 2025

Indicator 4: Age-standardized mortality rate among the population aged 30-69 years from cardiovascular, malignant neoplasms, diabetes mellitus and chronic respiratory

diseases (NCSD 3.4.1.) Baseline: 264.9 (2018)

Target data: To be determined

Outcome indicators as stated in the UNDP Country Program Document RRF:

Indicator 1.2.3: Number of people (men and women) living with HIV who have access to antiretroviral treatment (IRRF 1.1.2.1)

Baseline (2020): 33,000 (men 50%, women 50%)

Target data (31.12.2024): 49,000 (men - 50%, women - 50%)

Applicable Output(s) from the UNDP Strategic Plan 2018-2021:

Outcome 1: Advance poverty eradication in all its forms and dimensions

Output 1.2.1 Capacities at national and sub-national levels strengthened to promote inclusive local economic development and deliver basic services including HIV and related services.

Project title and Atlas Project Number: Support to effective, resilient and inclusive governance systems for health, Project ID: 00119180, Outputs ID: 00115712, 00128573

6. VI. MONITORING AND EVALUATION

In accordance with UNDP's programming policies and procedures, the project will be monitored through the following monitoring and evaluation plans:

Monitoring Plan

Monitoring Activity	Purpose	Frequency	Expected Action	Partners (if joint)	Cost (if any)
Track results progress	Progress data against the results indicators in the RRF will be collected and analyzed to assess the progress of the project in achieving the agreed outputs.	Quarterly, or in the frequency required for each indicator.	Slower than expected progress will be addressed by project management.		
Monitor and Manage Risk	Identify specific risks that may threaten achievement of intended results. Identify and monitor risk management actions using a risk log. This includes monitoring measures and plans that may have been required as per UNDP's Social and Environmental Standards. Audits will be conducted in accordance with UNDP's audit policy to manage financial risk.	Quarterly	Risks are identified by project management and actions are taken to manage risk. The risk log is actively maintained to keep track of identified risks and actions taken.		
Learn	Knowledge, good practices and lessons will be captured regularly, as well as actively sourced from other projects and partners and integrated back into the project.	At least annually	Relevant lessons are captured by the project team and used to inform management decisions.		
Annual Project Quality Assurance	The quality of the project will be assessed against UNDP's quality standards to identify project strengths and weaknesses and to inform		Areas of strength and weakness will be reviewed by project management and used to inform		

	management decision making to improve the project.		decisions to improve project performance.	
Review and Make Course Corrections	Internal review of data and evidence from all monitoring actions to inform decision making.	At least annually	Performance data, risks, lessons and quality will be discussed by the project board and used to make course corrections.	
Project Report	A progress report will be presented to the Project Board and key stakeholders, consisting of progress data showing the results achieved against pre-defined annual targets at the output level, the annual project quality rating summary, an updated risk long with mitigation measures, and any evaluation or review reports prepared over the period.	Annually, and at the end of the project (final report)		
Project Review (Project Board)	The project's governance mechanism (i.e., project board) will hold regular project reviews to assess the performance of the project and review the Multi-Year Work Plan to ensure realistic budgeting over the life of the project. In the project's final year, the Project Board shall hold an end-of-project review to capture lessons learned and discuss opportunities for scaling up and to socialize project results and lessons learned with relevant audiences.	At least annually)	Any quality concerns or slower than expected progress should be discussed by the project board and management actions agreed to address the issues identified.	

Project Evaluation Plan

8. VIII. GOVERNANCE AND MANAGEMENT ARRANGEMENTS

The project will be implemented through National Implementation (NIM) modality with UNDP CO's full support, as per NIM guidelines. National Implementation Modality (NIM) has been selected in order to strengthen the local ownership and further foster engagement of national judicial authorities in the new project planning and execution. The Republican AIDS Center under the Ministry of Health will act as the Implementing Partner. The Ministry of Health will appoint a senior official to be the National Project Coordinator (NPC).

The project will be overseen and guided by Project Board (PB) as the main body responsible for overall direction and management of the project. It will consist of the Ministry of Health (MoH)/ Sanitary and Epidemiological Welfare and Public Health Services, Republican AIDS Center (Implementing Partner) or any authorized by MoH agency (Senior Beneficiary), UNDP (Senior Supplier) and representatives of donor organizations, supporting the project implementation.

The Project Board will be co-chaired by the Ministry of Health and UNDP. The Project Board will be responsible for making consensus-based management decisions for the project when guidance is required by the Project Manager, including recommendation for MoH/UNDP approval of project work plans, budget and revisions. In order to ensure UNDP's ultimate accountability, Project Board decisions should be made in accordance with standards that shall ensure best value for money, fairness, integrity, transparency and effective competition. In case a consensus cannot be reached within the Board, final decision shall rest with the UNDP Resident Representative.

The project reviews by the Project Boards are made at designated decision points during the running of the project, or as necessary when raised by the Project Manager or by the Project Assurance. The Project Board meets at least once a year, but it could meet virtually and more often as required. Based on the approved multi-year work plan or annual work plan (AWP), the Project Board may review and approve project plans when required and authorize any major deviation from these agreed plans. It ensures that required

resources are committed and arbitrates on any conflicts within the project or negotiates a solution to any problems between the projects and external bodies.

In the course of project implementation Project Board assumes the following specific duties:

- Overall guidance and direction to the project;
- Review of each stage and approval of progress;
- Review and approval of work-plans and any exception plan.

This Board contains three roles, including:

- 1) **Executive**: individual representing the project ownership and will chair the group. It is expected that the Ministry of Health will delegate and appoint a senior official to this role who will ensure the full government support and serve as National Project Coordinator (NPC);
- 2) **Senior Supplier**: UNDP (1 representative) representing the interests of the parties concerned which provide technical expertise to the project. The Senior Supplier's primary function within the Board is to provide guidance regarding the technical feasibility of the project. This role will rest with UNDP Uzbekistan represented by the UNDP RR/DRR or designated official. EU Delegation (1 representative) representing the parties concerned which provide funding for the implementation of the project. EU Delegation's primary function within the SC/PB will be to provide overall guidance regarding the project implementation and relevant policy dialogue with the Government of Uzbekistan. It will be represented by the Head of Cooperation or designated official.
- 3) **Senior Beneficiaries**: Republican AIDS Center under the Ministry of Health of the Republic of Uzbekistan representing the interests of those who will ultimately benefit from the project. The Senior Beneficiary's primary function within the Board is to ensure the realization of project results from the perspective of project beneficiaries.

Project Assurance is the responsibility of each Project Board member. However, the role can be delegated. The Project Assurance role supports the Project Board by carrying out objective and independent project oversight and monitoring functions. This role ensures appropriate project management milestones are managed and completed. UNDP will have a key role in the quality assurance of the project, including its Programme Team and relevant unit of CO Uzbekistan.

The Project Support role provides project administration, management and technical support to the Project Manager as required by the needs of the project. It is necessary to keep Project Support and Project Assurance roles separate in order to maintain the independence of Project Assurance.

The Project Board will convene at least annually to hold regular project reviews to assess the performance of the project, achievement of targets and review of the Multi-Year Work Plan to ensure realistic budgeting over the life of the project. In advance of such meetings, the project team will provide to the Project Board an Annual Review Briefing on the project's progress and financial expenditures/budget. The Project Board shall commission evaluations on the quality of project deliverables, sustainability of results, capture lessons learned and discuss opportunities for scaling up and sharing project results with relevant audiences. It will also assess the Final Project Review Report during a formal meeting organized at least one month prior to the completion date of the project.

UNDP will provide annual progress reports and final reports in line with the format agreed in writing during Project Board or Local Project Appraisal Committee meetings.

Key national government agencies, particularly the Cabinet of Ministers, Ministry of Finance, Agency for sanitary and epidemiological well-being, Agency for pharmaceutical industry development under the MoH, the Women's Committee of Uzbekistan and other government agencies may also attend the SC/PB meetings. Center "Oila", and other organizations like State Statistics Committee, and NGOs, academic institutions can attend the PB at the invitation of MoH. As such and to benefit from inputs and expertise of international organizations, the Project Board may invite upon agreement other key government agencies and development partners to join the Board as observers (1 representative from each agency).

9. IX. LEGAL CONTEXT

1. Legal Context:

- Country has signed the Standard Basic Assistance Agreement (SBAA)
- Country has signed UNDAF Legal Annex in 2016

2. Implementing Partner:

• Ministry of Health of the Republic of Uzbekistan (NIM)

This project document shall be the instrument referred to as such in Article 1 of the Standard Basic Assistance Agreement (SBAA) between the Government of Uzbekistan and UNDP, signed on June 10, 1993. All references in the SBAA to "Executing Agency" shall be deemed to refer to "Implementing Partner."

This project will be implemented by the NAPM ("National Implementing Partner") in accordance with its financial regulations, rules, practices and procedures only to the extent that they do not contravene the principles of the Financial Regulations and Rules of UNDP. Where the financial governance of an Implementing Partner does not provide the required guidance to ensure best value for money, fairness, integrity, transparency, and effective international competition, the financial governance of UNDP shall apply.

10. X. RISK MANAGEMENT

Government Entity (NIM)

- 1. Consistent with Article III of the SBAA, the responsibility for the safety and security of the Implementing Partner and its personnel and property, and of UNDP's property in the Implementing Partner's custody, rests with the Implementing Partner. To this end, the Implementing Partner shall:
 - a) put in place an appropriate security plan and maintain the security plan, taking into account the security situation in the country where the project is being carried;
 - b) assume all risks and liabilities related to the Implementing Partner's security, and the full implementation of the security plan.
- 2. UNDP reserves the right to verify whether such a plan is in place, and to suggest modifications to the plan when necessary. Failure to maintain and implement an appropriate security plan as required hereunder shall be deemed a breach of the Implementing Partner's obligations under this Project Document.
- 3. The Implementing Partner agrees to undertake all reasonable efforts to ensure that no UNDP funds received pursuant to the Project Document are used to provide support to individuals or entities associated with terrorism and that the recipients of any amounts provided by UNDP hereunder do not appear on the list maintained by the Security Council Committee established pursuant to resolution 1267 (1999). The list can be accessed via http://www.un.org/sc/committees/1267/aq sanctions list.shtml.
- 4. The Implementing Partner acknowledges and agrees that UNDP will not tolerate sexual harassment and sexual exploitation and abuse of anyone by the Implementing Partner, and each of its responsible parties, their respective sub-recipients and other entities involved in Project implementation, either as contractors or subcontractors and their personnel, and any individuals performing services for them under the Project Document.
 - a. In the implementation of the activities under this Project Document, the Implementing Partner, and each of its sub-parties referred to above, shall comply with the standards of conduct set forth in the Secretary General's Bulletin ST/SGB/2003/13 of 9 October 2003, concerning "Special measures for protection from sexual exploitation and sexual abuse" ("SEA").
 - b. Moreover, and without limitation to the application of other regulations, rules, policies and procedures bearing upon the performance of the activities under this Project Document, in the implementation of activities, the Implementing Partner, and each of its sub-parties referred to above, shall not engage in any form of sexual harassment ("SH"). SH is defined as any unwelcome

conduct of a sexual nature that might reasonably be expected or be perceived to cause offense or humiliation, when such conduct interferes with work, is made a condition of employment or creates an intimidating, hostile or offensive work environment.

- 5. a) In the performance of the activities under this Project Document, the Implementing Partner shall (with respect to its own activities), and shall require from its sub-parties referred to in paragraph 4 (with respect to their activities) that they have minimum standards and procedures in place, or a plan to develop and/or improve such standards and procedures in order to be able to take effective preventive and investigative action. These should include: policies on sexual harassment and sexual exploitation and abuse; policies on whistleblowing/protection against retaliation; and complaints, disciplinary and investigative mechanisms. In line with this, the Implementing Partner will and will require that such subparties will take all appropriate measures to:
 - i. Prevent its employees, agents or any other persons engaged to perform any services under this Project Document, from engaging in SH or SEA;
 - ii. Offer employees and associated personnel training on prevention and response to SH and SEA, where the Implementing Partner and its sub-parties referred to in paragraph 4 have not put in place its own training regarding the prevention of SH and SEA, the Implementing Partner and its sub-parties may use the training material available at UNDP;
 - iii. Report and monitor allegations of SH and SEA of which the Implementing Partner and its subparties referred to in paragraph 4 have been informed or have otherwise become aware, and status thereof;
 - iv. Refer victims/survivors of SH and SEA to safe and confidential victim assistance; and
 - v. Promptly and confidentially record and investigate any allegations credible enough to warrant an investigation of SH or SEA. The Implementing Partner shall advise UNDP of any such allegations received and investigations being conducted by itself or any of its sub-parties referred to in paragraph 4 with respect to their activities under the Project Document, and shall keep UNDP informed during the investigation by it or any of such sub-parties, to the extent that such notification (i) does not jeopardize the conduct of the investigation, including but not limited to the safety or security of persons, and/or (ii) is not in contravention of any laws applicable to it. Following the investigation, the Implementing Partner shall advise UNDP of any actions taken by it or any of the other entities further to the investigation.
 - b) The Implementing Partner shall establish that it has complied with the foregoing, to the satisfaction of UNDP, when requested by UNDP or any party acting on its behalf to provide such confirmation. Failure of the Implementing Partner, and each of its sub-parties referred to in paragraph 4, to comply with the foregoing, as determined by UNDP, shall be considered grounds for suspension or termination of the Project.
- 6. Social and environmental sustainability will be enhanced through the application of the UNDP Social and Environmental Standards (http://www.undp.org/ses) and related Accountability Mechanism (http://www.undp.org/secu-srm).
- 7. The Implementing Partner shall: (a) conduct project and programme-related activities in a manner consistent with the UNDP Social and Environmental Standards, (b) implement any management or mitigation plan prepared for the project or programme to comply with such standards, and (c) engage in a constructive and timely manner to address any concerns and complaints raised through the Accountability Mechanism. UNDP will seek to ensure that communities and other project stakeholders are informed of and have access to the Accountability Mechanism.
- 8. All signatories to the Project Document shall cooperate in good faith with any exercise to evaluate any programme or project-related commitments or compliance with the UNDP Social and Environmental Standards. This includes providing access to project sites, relevant personnel, information, and documentation.

- 9. The Implementing Partner will take appropriate steps to prevent misuse of funds, fraud or corruption, by its officials, consultants, responsible parties, subcontractors and sub-recipients in implementing the project or using UNDP funds. The Implementing Partner will ensure that its financial management, anti-corruption and anti-fraud policies are in place and enforced for all funding received from or through UNDP.
- 10. The requirements of the following documents, then in force at the time of signature of the Project Document, apply to the Implementing Partner: (a) UNDP Policy on Fraud and other Corrupt Practices and (b) UNDP Office of Audit and Investigations Investigation Guidelines. The Implementing Partner agrees to the requirements of the above documents, which are an integral part of this Project Document and are available online at www.uz.undp.org.
- 11. In the event that an investigation is required, UNDP has the obligation to conduct investigations relating to any aspect of UNDP projects and programmes. The Implementing Partner shall provide its full cooperation, including making available personnel, relevant documentation, and granting access to the Implementing Partner's (and its consultants', responsible parties', subcontractors' and sub-recipients') premises, for such purposes at reasonable times and on reasonable conditions as may be required for the purpose of an investigation. Should there be a limitation in meeting this obligation, UNDP shall consult with the Implementing Partner to find a solution.
- 12. The signatories to this Project Document will promptly inform one another in case of any incidence of inappropriate use of funds, or credible allegation of fraud or corruption with due confidentiality. Where the Implementing Partner becomes aware that a UNDP project or activity, in whole or in part, is the focus of investigation for alleged fraud/corruption, the Implementing Partner will inform the UNDP Resident Representative/Head of Office, who will promptly inform UNDP's Office of Audit and Investigations (OAI). The Implementing Partner shall provide regular updates to the head of UNDP in the country and OAI of the status of, and actions relating to, such investigation.
- 13. Should UNDP refer to the relevant national authorities for appropriate legal action any alleged wrongdoing relating to the project, the Government will ensure that the relevant national authorities shall actively investigate the same and take appropriate legal action against all individuals found to have participated in the wrongdoing, recover and return any recovered funds to UNDP.

- 12. Project Quality Assurance Report
- 13. Social and Environmental Screening Template
- 14. Risk Analysis
- **15.** Project Board Terms of Reference and TORs of key management positions
- 16. Standard letter of agreement (LoA) for the provision of support services
- 17. Roles and responsibilities of the parties in procuring medical supplies and other services

Annex 3. Risk Analysis

Project Title: «Support to effective, resilient and inclusive governance systems for health»

Project ID: 00119180

Updated on: 22.12.2021

#	Description	Risk Category	Impact & Likelihood, Risk Level	Risk Treatment / Management Measures	Risk Owner. лицо
1.	Structural reform and management change in the Ministry of Health of the Republic of Uzbekistan and structural departments/agencies resulting in review of established and signed Agreements	Organizational	Probability = 3 Impact = 4	Monitoring of internal dynamics in the country, reform agenda in health sector, maintaining close strategic partnership with the Ministry of Health and its management, reflecting the agreements and priority areas of cooperation in written correspondence, official letters, better linkage and synergy of UNDP activities with national reform agenda, preparation and advancing UNDP value proposition in health procurement, organization of periodic meetings with MoH senior management and UNDP RR.	Project Manager/Health Programme Coordinator
2.	Delays in disbursement of funds or installment as per Agreement	Financial	Probability = 3 Impact = 5	Do not start procurement activities and processes without receiving of funds, in case of delays communication and reminders via official correspondence, organization of the meeting with senior management	Project Manager/Health Programme Coordinator and Operations team
3.	Delay in placing order and delivering medicines and other health products to Uzbekistan in view of late transfer of funds or installments	Operational	Probability = 5 Impact = 5	Maintaining regular communication with partners and reminding the importance of timely disbursement of funds, notification about completion of the first part of activities in advance.	Project Manager/Health Programme Coordinator alongside with GF/HIST team
4.	Need for additional funds and procurement of additional health products in case of sudden and unexpected increase in the spread of HIV in Uzbekistan	Operational	Probability = 2 Impact = 4	Verification of demand forecast plan through data triangulation, participation in joint monitoring activities of HIV surveillance, stock-management, collaboration and cooperation with other UN agencies and development partners	Project Manager/Health Programme Coordinator
5.	Price increase for ARV medicines and other health products due to renewal of global LTAs	Operational	Probability = 2 Impact = 3	Regular communication with GF/HIST team and receiving alerts in advance	Project Manager/Health Programme Coordinator alongside with GF/HIST team

6.	Unexpected global shortage or stock-out for specific health products under LTAs (due to API or closure of production facilities for ex.) and consequent delays in delivery to Uzbekistan	Social and Environmental/Str ategic	Probability = 2 Impact = 5	Regular communication with GF/HIST team for any updates on ongoing, expected or probable global shortage or stock-out, request for guidance for consequent action and transparent communication with national partner	Project Manager/Health Programme Coordinator alongside with GF/HIST team
7.	Stock-out of ARV medicines, test kits, reagents and other health products at central level due to either late transfer of funds, late submission of requests or inappropriate quantification;	Operational	Probability = 4 Impact = 5	Communicating to RAC the need and importance of provision of timely and correct estimation of needs, funds and perform verification and quality check of shared demand forecast plan and stock level at, central warehouse.	Project Manager/Health Programme Coordinator alongside with GF/HIST team
8.	Changes in treatment regimens for patients receiving ARV treatment	Strategic	Probability = 3 Impact = 5	Joint review of the plan of providing ARVT each 6 month. In case change in treatment regimen occurs, through close contact and consultation with RAC, establish a transition plan to avoid ineffective use of health products. Moreover, communicate and agree with RAC to provide enough time to procure the new products required.	Project Manager/Health Programme Coordinator alongside with GF/HIST team
9.	Unreliable quantification or increase in the number of patients taking ARV therapy on an annual basis;	Strategic	Probability = 2 Impact = 5	Data triangulation and support to improve quantification exercise	Project Manager/Health Programme Coordinator
10.	Budget availability and lack of funds to deliver project's components on government- social partnership, NCDs and national health procurement system.;	Financial	Probability = 4 Impact = 5	Monitoring of donor announcements about accepting applications, preparation of proposals for major donors (global / regional programs, UK Foreign Office, EU, IDB, etc.), including jointly with national partners	Cluster on Good Governance, Policy and Communication/UNDP CO Senior Management
11.	Lack of national ownership and funds to further develop national health procurement system	Political	Probability = 2 Impact = 4	Liaising closely with national partners to promote the benefits of applying international benchmarks, best practices, including from neighboring regions, and cost-saving opportunities	Project Manager/Cluster on Good Governance, Policy and Communication
12.	Absence of reliable statistical data on NCDs	Organizational	Probability = 2 Impact = 3	Qualitative research, assessments and situation analysis of data availability and desk analysis using the Joint UNDP-WHO NCD Investment Task Force	Project Manager/Cluster on Good Governance, Policy and Communication

13.	The proposed model on government-social partnership is not supported by the Government due to lack of interest and few number of NGOs at the regional level	Strategic	Probability = 3 Impact = 3	Engagement of national partners in decision-making and early pilot phase, presentation of cost-efficiency and social benefits, community advocacy plan to engage more NGOs	Project Manager/Cluster on Good Governance, Policy and Communication
14.	Change in local exchange rate against the US dollar	Financial	Probability = 2 Impact = 2	Monitoring the dynamics and fluctuations of the exchange rate and informing partners before the transfer of funds and close coordination with UNDP departments	Operations Unit
15.	Due to restrictive measures related to the prevention of COVID-19 in Uzbekistan, the number of cases of initiation of ARV treatment in new patients during the quarantine period is decreasing, which affects treatment coverage	Organizational	Probability = 3 Impact = 4	Consider, together with national partners, a plan to start ART and a drug procurement plan. Recommend national partners to develop a mechanism for organizing treatment in quarantine conditions	Project Manager, Good Governance, Policy and Communication Facilitation Cluster, UNDP
16.	Due to restrictive measures related to the prevention of COVID-19 in the world, the cost of transporting drugs and goods is increasing	Organizational	Probability = 3 Impact = 3	Advance planning and tendering, cargo transportation by land or sea, procurement consolidation	Project Manager / Health Program Coordinator with UNDP GF-funded Health Projects Support Team (UNDP GF / HIST)
17.	Lack of stocks of ARV drugs, test kits, reagents and other medical devices due to restrictive measures related to the prevention of COVID-19 in the world and Uzbekistan	Organizational	Probability = 3 Impact = 4	Regular communication with the GF / HIST team to obtain up-to-date information on current, expected or probable global shortages or shortages. Involving HIST in solving problem situations.	Project Manager / UNDP Good Governance, Policy and Communication Facilitation Cluster / UNDP Country Office Management

Annex 4. Terms of Reference of Project Board, Key Management Positions and Project Team

I. PROJECT BOARD

Overall responsibilities

The Project Board is the group responsible for making by consensus management decisions for a project when guidance is required by the Project Manager, including recommendation for UNDP/MoH approval of project plans and revisions. In order to ensure UNDP's ultimate accountability, Project Board decisions should be made in accordance with standards that shall ensure best value to money, fairness, integrity, transparency and effective international competition. In case a consensus cannot be reached, final decision shall rest with the UNDP Resident Representative. Project reviews by this group are made at designated decision points during the running of a project, or as necessary when raised by the Project Manager. This group is consulted by the Project Manager for decisions when (Project Manager tolerances (normally in terms of time and budget) have been exceeded.

Based on the approved annual work plan (AWP), the Project Board may review and approve project quarterly plans when required and authorize any major deviation from these agreed quarterly plans. It is the authority that signs off the completion of each quarterly plan as well as authorizes the start of the next quarterly plan. It ensures that required resources are committed and arbitrates on any conflicts within the project or negotiates a solution to any problems between the project and external bodies. In addition, it approves the appointment and responsibilities of the Project Manager and any delegation of its Project Assurance responsibilities.

Composition and organization: This group contains three roles, including:

- 1) **Executive**: individual representing the project ownership to chair the group.
- 2) **Senior Supplier**: individual or group representing the interests of the parties concerned which provide funding and/or technical expertise to the project. The Senior Supplier's primary function within the Board is to provide guidance regarding the technical feasibility of the project.
- 3) **Senior Beneficiary**: individual or group of individuals representing the interests of those who will ultimately benefit from the project. The Senior Beneficiary's primary function within the Board is to ensure the realization of project results from the perspective of project beneficiaries.

Potential members of the Project Board are reviewed and recommended for approval during the Project Appraisal Committee (PAC) meeting. Efforts should be made to the extent possible to ensure gender balance among the members of the Project Board.

I. Specific responsibilities:

1. Initiating a project:

- Agree on PM's responsibilities, as well as the responsibilities of the other members of the Project Management team;
- Delegate any Project Assurance function as appropriate;
- Review and appraise detailed Project Plan and AWP, including Atlas reports covering activity definition, quality criteria, issue log, updated risk log and the monitoring and communication plan.

2. Running a project:

- Provide overall guidance and direction to the project, ensuring it remains within any specified constraints;
- Address project issues as raised by the Project Manager;
- Provide guidance and agree on possible countermeasures/management actions to address specific risks;
- Agree on Project Manager's tolerances in the Annual Work Plan and quarterly plans when required;
- Conduct regular meetings to review the Project Quarterly Progress Report and provide direction and recommendations to ensure that the agreed deliverables are produced satisfactorily according to plans;

- Review Combined Delivery Reports (CDR) prior to certification by the Implementing Partner;
- Appraise the Project Annual Review Report, make recommendations for the next AWP, and inform the Outcome Board about the results of the review;
- Review and approve end project report, make recommendations for follow-on actions;
- Provide ad-hoc direction and advice for exception situations when project manager's tolerances are exceeded;
- Assess and decide on project changes through revisions.

3. Closing a project:

- Assure that all Project deliverables have been produced satisfactorily;
- Review and approve the Final Project Review Report, including Lessons-learned;
 Make recommendations for follow-on actions to be submitted to the Outcome Board.

II. EXECUTIVE - NATIONAL PROJECT COORDINATOR

The Executive is ultimately responsible for the project, supported by the Senior Beneficiary and Senior Supplier. The Executive's role is to ensure that the project is focused throughout its life cycle on achieving its objectives and delivering outputs that will contribute to higher level outcomes. The Executive has to ensure that the project gives value for money, ensuring a cost-conscious approach to the project, balancing the demands of the beneficiary and supplier.

Specific Responsibilities (as part of the above responsibilities for the Project Board)

- Ensure that there is a coherent project organization structure and logical set of plans;
- Set tolerances in the AWP and other plans as required for the Project Manager;
- Monitor and control the progress of the project at a strategic level;
- Ensure that risks are being tracked and mitigated as effectively as possible;
- Brief Outcome Board and relevant stakeholders about project progress;
- Organize and chair Project Board meetings.

If the project warrants it, the Executive may delegate some responsibility for the project assurance functions.

III. SENIOR BENEFICIARY

The Senior Beneficiary is responsible for validating the needs and for monitoring that the solution will meet those needs within the constraints of the project. This role represents the interests of all those who will benefit from the project, or those for whom the deliverables resulting from activities will achieve specific output targets. The Senior Beneficiary role monitors progress against targets and quality criteria. This role may require more than one person to cover all the beneficiary interests. For the sake of effectiveness, the role should not be split between too many people.

Specific Responsibilities (as part of the above responsibilities for the Project Board)

- Ensure the expected output(s) and related activities of the project are well defined;
- Make sure that progress towards the outputs required by the beneficiaries remains consistent from the beneficiary perspective;
- Promote and maintain focus on the expected project output(s);
- Prioritize and contribute beneficiaries' opinions on Project Board decisions on whether to implement recommendations on proposed changes;
- Resolve priority conflicts.

The assurance responsibilities of the Senior Beneficiary are to check that:

- Specification of the Beneficiary's needs is accurate, complete and unambiguous;
- Implementation of activities at all stages is monitored to ensure that they will meet the beneficiary's needs and are progressing towards that target;
- Impact of potential changes is evaluated from the beneficiary point of view;
- Risks to the beneficiaries are frequently monitored.

Where the project's size, complexity or importance warrants it, the Senior Beneficiary may delegate the responsibility and authority for some of the assurance responsibilities.

IV. SENIOR SUPPLIER

The Senior Supplier represents the interests of the parties which provide funding and/or technical expertise to the project (designing, developing, facilitating, procuring, implementing). The Senior Supplier's primary function within the Board is to provide guidance regarding the technical feasibility of the project. The Senior Supplier role must have the authority to commit or acquire supplier resources required.

Specific Responsibilities (as part of the above responsibilities for the Project Board)

- Make sure that progress towards the outputs remains consistent from the supplier perspective;
- Promote and maintain focus on the expected project output(s) from the point of view of supplier management;
- Ensure that the supplier resources required for the project are made available;
- Contribute supplier opinions on Project Board decisions on whether to implement recommendations on proposed changes;
- Arbitrate on, and ensure resolution of, any supplier priority or resource conflicts.

The supplier assurance role responsibilities are to:

- Advise on the selection of strategy, design and methods to carry out project activities;
- Ensure that any standards defined for the project are met and used to good effect;
- Monitor potential changes and their impact on the quality of deliverables from a supplier perspective;
- Monitor any risks in the implementation aspects of the project.

If warranted, some of this assurance responsibility may be delegated.

V. PROJECT MANAGER

Overall responsibilities

The Project Manager has the authority to run the project on a day-to-day basis on behalf of the Project Board within the constraints laid down by the Board. The Project Manager is responsible for day-to-day management and decision-making for the project. Project Manager's prime responsibility is to ensure that the project produces the results specified in the project document, to the required standard of quality and within the specified constraints of time and cost.

Prior to the approval of the project, the project manager role is the UNDP staff member responsible for project management functions during formulation until the PM is in place.

Specific responsibilities would include:

Overall project management:

- Manage the realization of project outputs through activities;
- Provide direction and guidance to project team/responsible parties;
- Liaise with the Project Board or its appointed Project Assurance roles to assure the overall direction and integrity of the project;
- Identify and obtain any support and advice required for the management, planning and control of the project;
- Responsible for project administration;
- Liaise with any suppliers;
- May also perform Team Manager and Project Support roles.

Running a project

• Plan the activities of the project and monitor progress against the initial quality criteria;

- Mobilize goods and services to initiative activities, including drafting TORs and work specifications;
- Monitor events as determined in the Monitoring & Communication Plan, and update the plan as required;
- Manage requests for the provision of financial resources by UNDP, using advance of funds, direct payments, or reimbursement using the FACE (Fund Authorization and Certificate of Expenditures);
- Monitor financial resources and accounting to ensure accuracy and reliability of financial reports;
- Manage and monitor the project risks as initially identified in the Project Brief appraised by the PAC, submit new risks to the Project Board for consideration and decision on possible actions if required; update the status of these risks by maintaining the Project Risks Log;
- Be responsible for managing issues and requests for change by maintaining an Issues Log;
- Prepare the Project Quarterly Progress Report (progress against planned activities, update on Risks and Issues, expenditures) and submit the report to the Project Board and Project Assurance;
- Prepare the Annual Review Report, and submit the report to the Project Board and the Outcome Board;
- Based on the review, prepare the AWP for the following year, as well as Quarterly Plans if required.

Closing a Project

- Prepare Final Project Review Reports to be submitted to the Project Board and the Outcome Board;
- Identify follow-on actions and submit them for consideration to the Project Board;
- Manage the transfer of project deliverables, documents, files, equipment and materials to national beneficiaries;
- Prepare final CDR/FACE for signature by UNDP and the Implementing Partner.

VI. PROJECT ASSURANCE

Overall responsibility: Project Assurance is the responsibility of each Project Board member; however, the role can be delegated. The Project Assurance role supports the Project Board by carrying out objective and independent project oversight and monitoring functions. This role ensures appropriate project management milestones are managed and completed.

Project Assurance has to be independent of the PM; therefore, the Project Board cannot delegate any of its assurance responsibilities to the PM. A UNDP Programme Officer typically holds the Project Assurance role.

The implementation of the assurance responsibilities needs to answer the question "What is to be assured?". The following list includes the key suggested aspects that need to be checked by the Project Assurance throughout the project as part of ensuring that it remains relevant, follows the approved plans and continues to meet the planned targets with quality:

- Maintenance of thorough liaison throughout the project between the members of the Project Board;
- Beneficiary needs and expectations are being met or managed;
- Risks are being controlled;
- Adherence to the Project Justification (Business Case);
- Projects fit with the overall Country Programme;
- The right people are being involved;
- An acceptable solution is being developed;
- The project remains viable;
- The scope of the project is not "creeping upwards" unnoticed;
- Internal and external communications are working;
- Applicable UNDP rules and regulations are being observed;

- Any legislative constraints are being observed;
- Adherence to RMG monitoring and reporting requirements and standards;
- Quality management procedures are properly followed;
- Project Board's decisions are followed and revisions are managed in line with the required procedures.

Specific responsibilities would include:

1. Initiating a project

- Ensure that project outputs definitions and activity definition including description and quality criteria have been properly recorded in the Atlas Project Management module to facilitate monitoring and reporting;
- Ensure that people concerned are fully informed about the project;
- Ensure that all preparatory activities, including training for project staff, logistic supports are timely carried out.

2. Running a project

- Ensure that funds are made available to the project;
- Ensure that risks and issues are properly managed, and that the logs in Atlas are regularly updated;
- Ensure that critical project information is monitored and updated in Atlas, using the Activity Quality log in particular;
- Ensure that Project Quarterly Progress Reports are prepared and submitted on time, and according to standards in terms of format and content quality;
- Ensure that CDRs and FACE are prepared and submitted to the Project Board and Outcome Board;
- Perform oversight activities, such as periodic monitoring visits and "spot checks";
- Ensure that the Project Data Quality Dashboard remains "green".

3. Closing a project

- Ensure that the project is operationally closed in Atlas;
- Ensure that all financial transactions are in Atlas based on final accounting of expenditures;
- Ensure that project accounts are closed and status set in Atlas accordingly.

VII. PROJECT SUPPORT

Overall responsibilities: The Project Support role provides project administration, management and technical support to the Project Manager as required by the needs of the individual project or Project Manager. The provision of any Project Support on a formal basis is optional. It is necessary to keep Project Support and Project Assurance roles separate in order to maintain the independence of Project Assurance.

Specific responsibilities: Some specific tasks of the Project Support would include:

Provision of administrative services:

- Set up and maintain project files;
- Collect project related information data;
- Update plans;
- Administer the quality review process;
- Administer Project Board meetings.

Project documentation management:

- Administer project revision control;
- Establish document control procedures;
- Compile, copy and distribute all project reports.

Financial Management, Monitoring and reporting

- Assist in the financial management tasks under the responsibility of the Project Manager;
- Provide support in the use of Atlas for monitoring and reporting.

Provision of technical support services

- Provide technical advices;
- Review technical reports;
- Monitor technical activities carried out by responsible parties

Annex 6. Roles and responsibilities of the parties in procuring medical supplies and other services

Transfer of Procured Goods and Services

The main steps for the transfer of medicines and medical and non-medical products by UNDP to the national side (to the Republican AIDS Center or the Ministry of Health).

- 1. After the delivery of medicines, medical and non-medical products (hereinafter referred to as the "Goods") in the country, UNDP carries out the necessary procedures to obtain the conclusions of the competent authorities for customs clearance of goods (SES, Veterinary control, Uzbekexpertiza, Uzstandart, etc.), certification at the Main Directorate for Quality Control of Medicines and Medical Equipment at the Ministry of Health of the Republic of Uzbekistan.
- 2. Upon receipt of all necessary permits, storage of goods is carried out in a customs warehouse contracted by UNDP in accordance with internal procedures and rules. Upon completion of all procedures related to obtaining permits, including customs clearance and obtaining a Certificate of Conformity, UNDP prepares documents for the transfer of the Goods to the balance of the Republican AIDS Center (hereinafter "RAC"). After agreeing on the documents for transfer with the Ministry of Health and the RAC, the documents are signed by both parties and a transfer date is set. Signing by the Ministry of Health and the RAC means the signing of the transfer documents, including the Power of Attorney issued to the responsible employee.
- 3. By the time of transfer and delivery, UNDP transports the goods from the customs warehouse to the central warehouse on its own and / or, if necessary, with the assistance of the RAC. The transfer of goods is carried out at the territory of the central warehouse, with which UNDP has entered into a lease agreement for storing goods transferred to the balance of the Republican AIDS Center under the joint program, in accordance with internal procedures and rules. The acceptance of the goods by the Republican AIDS Center is carried out by a responsible officer in whose name the power of attorney is issued.
- 4. The RAC accepts the responsibility for the quality, including compliance with storage conditions and terms, quantity, taking into account distribution, transfer, etc. with observance of the rules of FIFO and FEFO, after receipt and transfer of goods.
- 5. UNDP pays the cost of renting a warehouse for the centralized storage of RAC goods, and, as required, will provide technical assistance in warehouse management.

Hiring Consultants

Republican AIDS Center

The Republican AIDS Center submits the terms of reference, which contains a complete list of requirements for hiring a consultant:

- a) general information for the position
 - Name for the position
 - Duration / terms of the contract
 - Main place of work (city, district) in the territory of the Republic of Uzbekistan
 - Suggested places to visit
- b) General information on the context of work, the purpose of the assignment;
- c) scope of work containing an adequate description of the services or activities to be performed;
- d) clear definition of tasks / results, time frame and payment scheme in% terms;
- e) The main characteristics for a consultant
 - Education
 - Degree of competence and qualifications, work experience

Knowledge of languages

f) budget line and remuneration amount approved by the trilateral co-financing agreement budget;

The Republican AIDS Center assists in obtaining written permission from the Ministry of Health for a consultant to work in Uzbekistan.

The Republican AIDS Center bears full responsibility for the stay of the consultant on the territory of the Republic of Uzbekistan, provides access to Ministries and Departments, and is also responsible for organizing meetings with National Partners.

United Nations Development Programme

After receiving the request, UNDP preliminarily reviews the TOR for compliance with the requirements, after which it starts hiring consultants, in accordance with the UNDP rules and procedures, observing all the requirements described in the terms of reference.

Upon completion of the assignment, an interim and / or final report is submitted to the Project Manager and UNDP Project Coordinator, which is pre-approved by the RAC and national partners.

After receiving the report from the Consultant, UNDP proceeds to pay the fee, in accordance with the requirements and procedures of UNDP. The amount of the fee is determined by the consultant at the recruitment stage and should be in line with the budget of the tripartite co-financing agreement.

If the financial proposal of consultants exceeds the budget, UNDP notifies RAC, which determines further actions: a) allocates an additional budget, b) revises the terms of reference, which is sent to UNDP for hiring a consultant.

Financial Reporting

Upon the written request of the Principal Recipient, on a quarterly basis, UNDP will prepare and submit the following reports:

- Detailed Account Activity Analysis Report;
- Commitment Report;
- The balance of the project at the end of the reporting period.

The prepared reports will be sent by e-mail to the Project Manager of the RC AIDS / PIU, with a copy to the financial expert of the RC AIDS / PIU.

Covering Daily and Travel Costs for Local and International Consultants without Fee Payment

Republican AIDS Center / Ministry of Health

Republican AIDS Center / Ministry of Health is requesting assistance in the payment of daily subsistence and travel expenses for consultants.

The request includes the following information:

- Name, position
- Purpose of the trip
- country / city of obtaining a visa;
- country / city of departure and destination;
- exact dates of the business trip;
- indicates the budget line and the amount of per diem and travel expenses approved by the budget of the tripartite co-financing agreement (travel expenses of all staff and non-staff employees of partner organizations represented by the Ministry of Health, the Republican AIDS Centre, Sanitary and Epidemiological Welfare and Public Health Service of the Republic of Uzbekistan, Republican Specialized Scientific Practical Medical Center of Phthisiology and

Pulmonology will be paid in accordance with the established rates of these organizations). National partners are required to inform on rates' changes accordingly.

The Republican AIDS Center assists in obtaining a written work permit from the Ministry of Health in obtaining a visa for a consultant in Uzbekistan.

United Nations Development Programme

Upon receipt of the request, UNDP commences work to provide the following services:

- a) registration of an entry visa
- b) purchase of air / railway. tickets
- c) calculation and payment of per diem and / or travel expenses will be carried out in accordance with the norms established by the budget of the Co-Financing Agreement.

Payment of per diem and travel expenses to local consultants:

- 80% of the daily expenses are paid before the start of the business trip;
- 20% of daily expenses and travel expenses (taxi) are paid at the end of the trip and upon submission of the program report to the Republican AIDS Center and the UNDP Project Manager, as well as financial documents F10 form and a boarding pass in case of air travel;

Per diem and travel expenses for international consultants:

- 80% of the daily expenses are paid before the trip to Uzbekistan;
- 20% of daily expenses are paid at the end of the trip and upon submission of the program report to the Republican AIDS Center and the UNDP Project Manager, as well as financial documents - F10 form, in case of air travel - boarding pass;

In accordance with this document, UNDP Country Office in Uzbekistan:

- 1. Will assist the Ministry of Health in the implementation of measures under the Decree of the President of the Republic of Uzbekistan No. 3800 dated June 22, 2018 "On additional measures to counter the spread of the disease caused by the human immunodeficiency virus and the prevention of nosocomial infections", in particular, will provide support services for organizing procurement activities. At the same time, the list of medicines and medical goods will be developed in accordance with their specifications, calculations and delivery period according to the channels of receipt of funds (state and other) in the national health system;
- 2. Provision of technical and expert support in planning and forecasting the country's need for ARV drugs, diagnostic test systems, consumables and other medical goods by concluding contracts with experts and organizing joint field events;
- 3. Organization of procurement, delivery, customs clearance and certification of ARV drugs, diagnostic test systems and other medical devices;
- 4. Assistance in the organization of planning, prevention, treatment and monitoring and evaluation activities, including for the verification of warehouses, the solution of organizational issues for the travel of national partners, in particular by hiring experts, solving logistical issues, processing travel and other expenses related to travel for performing the above tasks;
- 5. Assistance in organizing capacity building activities in the area of HIV / AIDS prevention, treatment, procurement, project management, and monitoring and evaluation;
- 6. Solving organizational issues within the framework of monitoring and assessment visits to the regions of the country;
- Assistance in attracting international and national experts in the implementation of the Project through the execution of contracts and payments, based to the request of the Republican AIDS Center;

- 7. Provides warehousing and proper storage conditions for medicines and goods;
- 8. Within 5 working days, takes ownership of medicines and medical goods that have passed customs clearance at the customs warehouse by signing the Acceptance and Transfer Act, for the purpose of further transportation to the central warehouse for storage and distribution to final recipients;
- 9. Is solely responsible for the overall management of the warehouse and distribution of medical supplies within the country and prior to transfer to end users;
- 10. Take full responsibility for the quality of medicines and other medical products from the moment of transfer of ownership to the Ministry of Health;
- 11. Regularly convenes and takes part in coordination meetings and meetings to assess the progress of the project and the services provided under this Agreement.

UNDP undertakes to:

- Purchase and supply goods in accordance with the list of medicines and medical devices, the specified quantity and quality requirements agreed with the Ministry of Health (including requirements for the language of labels and packaging, if necessary) and in accordance with UNDP quality assurance requirements that comply with international standards and the Global Fund quality assurance policy;
 - 1.1. Conduct a bidding process at the international level or use the mechanism of existing UNDP long-term contracts with suppliers;

- 1.2. Place orders for the supply of goods, services, cargo and insurance, the conclusion of contracts with suppliers;
- 1.3. Rent a warehouse, where they will be delivered and where centralized storage will be carried out after the signing of the Acceptance Act between the UNDP and the Ministry of Health;
- 1.4. Monitor orders, concluded contracts, work of suppliers;
- 2. Provide regular updates of information for the Ministry of Health on the progress of procurement, inform about possible requests and / or actions required by the Ministry of Health in relation to the procurement of specific goods or product categories;
- 3. Keep records on purchases and other activities within the project;
- 4. Ensure payments under concluded contracts in accordance with UNDP rules and procedures and on the basis of acts of completion or invoices duly signed by the recipient of the goods and / or services;
- 5. Submit regular financial statements and other reports to the Ministry of Health in accordance with this Agreement;
- 6. Form a project team, consisting of the following staff units, to ensure the implementation of activities under this Agreement (according to the budget):

Transfer of medicines, medical and non-medical items from UNDP to the Republican AIDS Center

- After the arrival of medicines, medical and non-medical products in the country (hereinafter referred
 to as the "Goods"), UNDP carries out the necessary procedures to obtain the conclusions of the
 competent authorities for customs clearance of goods (SES, Veterinary, Uzbekexpertiza, Uzstandart,
 etc.), certification at the Main Directorate on quality control of medicines and medical equipment
 under the Ministry of Health of the Republic of Uzbekistan (State Unitary Enterprise "State Center
 for Expertise and Standardization of Medicines, Medical Products and Medical Equipment" of the
 Agency for the Development of the Pharmaceutical Industry under the Ministry of Health of the
 Republic of Uzbekistan).
- 2. Upon receipt of all necessary permits, storage of goods is carried out in a customs warehouse hired by UNDP in accordance with internal procedures and rules. Upon completion of all procedures related to obtaining permits, including customs clearance and obtaining a Certificate of Conformity, UNDP prepares documents for the transfer of goods to the Ministry of Health. The date of the transfer of goods is assigned following the results of the agreement on the conditions of transfer and the Acceptance and Transfer Act.
- 3. By the time of acceptance and transfer, UNDP transports the goods to be transferred from the customs warehouse to the central warehouse on its own and / or, if necessary, with the assistance of the Ministry of Health. The transfer of goods is carried out in the territory of the central warehouse, with which UNDP has entered into a lease for storage of goods transferred to the Ministry of Health under the joint program, in accordance with internal procedures and rules. Receipt from the Ministry of Health is carried out by the responsible officer in whose name the power of attorney is issued.
- 4. After acceptance and transfer of goods, responsibility for their quality, including compliance with the conditions and storage periods, quantity, taking into account distribution, transfer, etc. subject to FEFO rules is certainly borne by the Ministry of Health. After the Ministry of Health has accepted the goods from UNDP in due course, UNDP disclaims further responsibility.
