Brief Description

The UNDP Strategic Plan 2022 – 2025 embraces the complexity of development and commits the organization to helping countries find faster, more durable solutions to achieve Agenda 2030. We have an exciting opportunity to transform our collective approach by introducing new protocols, backed by evidence and practice, which accelerate the testing and dissemination of solutions within and across countries. This will enable the global community to collectively learn from local knowledge and ingenuity at a speed and at a scale that our societies and planet require.

The objective is to build a network of Country Accelerator Labs as the largest, fastest global learning network on development challenges. The network will surface and reinforce locally sourced solutions at scale while mobilizing a wide and dynamic partnership of actors contributing knowledge, resources and experience.

The Country Accelerator Labs is aligned to UNDP CPD 2023 – 2025 to achieve the following results:

Output 1: UNDP Country Offices and partners will have increased capability for scanning, sensemaking and experimentation for sustainable development solution.

Output 2: New sustainable development solutions will be scaled at country level as part of UNDP's country programme and operations, national policy and/or local markets.

Output 3: A core global level result will be that a global learning and scaling network is established and functioning.
