

**Project implementation plan**  
Supporting rehabilitation of persons with disabilities caused by the war  
Project ID: 00132588

Baseline associated indicators and annual targets	PLANNED ACTIVITIES						Description	Revised KOREA Budget_2024	Revised GERMANY Budget_2024	TOTAL Revised budget 2024	Formulation from Initiation Plan
	Component #	List activity results and associated actions	Task	Activity ID	Account group	Account					
	<b>Outcome 1 - Government at all levels continues to function effectively, with reinforced capacities to lead crisis response, sustain public service provision, and coordinate the delivery of assistance and recovery efforts that leave no-one behind.</b>	Output 1. Government of Ukraine enabled to design new policies and regulations to better protect, respect and fulfill the rights of persons with disabilities, with the focus on rehabilitation						<b>4 912,36</b>	<b>0,00</b>	<b>4 912,36</b>	UNDP will provide technical expertise to the Ministry of Social Policy of Ukraine and Ministry of Health of Ukraine, to conduct rapid assessments of current policies regulating the sphere of social and medical services as well as referral paths and assistive technologies, and their different impact on women, men, boys and girls. UNDP will meanwhile provide advisory support and intra-government coordination and ensure consultations with Organizations of persons with disabilities (DPO), specifically women led. The assessment/s will identify the current challenges and gaps in the sphere of services provision exposed by the war, to guide simplification of procedures for services specifically focusing on the needs of PwDs. UNDP will also support the Ministry of Social Policy (lead), Ministry of Veterans and the Ministry of Health to conduct a nationwide survey, to inform long-term, cross-Government planning and decision-making at national and local level, presenting needs of PwDs, including gender disaggregated data on specific needs among women, girls, boys and men, as well as priorities and actions required to better support persons with disabilities in Ukraine, ensuring an inclusive and holistic approach. The information collected through the survey may lay the ground for development of a future national database/registry, ensuring standardized and centralized collection with sex-disaggregated data on victims of the conflict in Ukraine, including by cause of injury, to support further evidence-based policy making, targeted assistance and development of medical guarantee packages/victim assistance packages.

UNDP will work in partnership with major labour market actors and NGOs to identify and support livelihood initiatives for PWDs. Such initiatives include community initiatives to deliver professional training based on vocational education institutions and on-the-job training in local workshops. This is followed by additional support to promote job placement or self-employment opportunities, including raising motivation for entrepreneurial activities and social enterprise development; and agricultural livelihoods in rural areas. To ensure maximum accessibility, part-time remote training and flexible working opportunities should be implemented where feasible, with a specific focus on the specific needs of women with disabilities.

UNDP will also work to strengthen capacities of local authorities, vocational education and training system (hereinafter – VET system) and business community for inclusive vocational education and employment of PWDs, establishment of job creation schemes for PWDs for livelihood recovery, facilitate skills development, business support and access to finance, networks and markets.
