NOTE TO FILE

Project Title: Supporting Resilience to Shocks and Stresses in Iraq (FFS South Initiative Project)
Project ID: 01000844
Subject: Justification for Non-Availability of Progress Reports
Date: June 17, 2026

This Note to File is prepared to document the reason for the absence of project progress reports for the above-mentioned project.

The project was established under the UNDP Iraq portfolio with the objective of supporting resilience to shocks and stresses in the southern governorates of Iraq. However, implementation of project activities has not commenced to date due to the pending receipt of the anticipated Government of Iraq funding contribution, which constitutes the primary source of project financing. The Project Document envisages implementation subject to the availability and receipt of the required funding resources.

As of the date of this note:

- Project implementation has not started.
- No programmatic activities have been undertaken.
- No outputs or deliverables have been generated.
- No implementation-related expenditure has been incurred; and
- No results data are available for reporting purposes.

Consequently, no narrative progress reports have been prepared or uploaded, as there has been no implementation progress to report during the reporting period.

The project team will initiate regular progress reporting in accordance with UNDP corporate requirements once funding is received, implementation activities commence, and reportable results are generated.
