Mid-year Progress Report for 2026

Reporting period: January 1 to July 31, 2026

PROJECT SUMMARY INFORMATION

Project title	**EU-PH Green Economy Partnership: Green LGUs**
Quantum Project ID	01001427
Implementing partner	United Nations Development Programme
Responsible partner/s	United Nations Development Programme
Start Date	01 March 2024
Completion Date	31 August 2028
Total project fund (in USD)	$24,945,800.00
Annual project fund (2026)	$8,225,039
Annual expenditure for the reporting period[1] (as of 31 July 2026)	$1,919,123
Cumulative utilization for the project (as of 31 July 2026)	$8,514,288 (34% of total project fund)
Brief project description	Funded by a €60 million (P3.67 billion) grant from the European Union in the Philippines, the Green Economy Programme of the Philippines (GEPP) will run from 2023-2028 in collaboration with the national government, local government units (LGUs), and the private sector. The Programme links European and Filipino partners to foster a circular economy and the reduction of plastic waste. It also aims to improve energy efficiency, promote renewable energy use and climate change mitigation and adaptation. Using a whole-of-nation approach, the programme is focused on sustainable and inclusive growth through investments, technology transfer, and job creation. GEPP is implemented by UNDP Philippines, Germany's development agency GIZ, Expertise France (EF) with Global Green Growth Institute (GGGI) and the International Finance Corporation (IFC) of the World Bank Group. The Programme has 4 Specific Objectives (SOs) with the following lead agencies: SO1: Improved systemic circular economy and climate change policies and reduced GHG emissions (Department of Environment and Natural Resources (DENR) & GIZ) SO2: Enhanced practices of circular economy by LGUs in collaboration with the private sector and the civil society

[1] Expenditures per CPFR as of 31 Dec 2025.

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

	sector, with focus on youth and gender equality (Department of Interior and Local Government (DILG) and UNDP) SO3: Enhanced engagement of the private and financial sectors into circular, waste-reduction economy (Department of Trade and Industry (DTI) & EF & GGGI) SO4: Increased energy efficiency and renewable energy deployment (crosscutting) (Department of Energy (DoE) & IFC) The main objective of the Project is to enhance practices of circular economy by LGUs in collaboration with the private sector and the civil society sector, with focus on youth and gender equality. DILG and UNDP are co-leads for SO2 in partnership with 60 LGUs with core support designated for 20 key LGU partners (Tier 1 LGUs) and peripheral assistance for the remaining 40 Tier 2 LGUs. By the end of the project, these LGUs are expected to have developed and implemented CE action plans, with reduced waste generation and increased recycling rates, supported by enabling local policies and the active engagement of private sector and community stakeholders in circular economy initiatives. The project is also expected to generate socio-economic benefits, such as green jobs through promoting circular industries and businesses. It also aims to build capacity, knowledge, and skills among LGUs and stakeholders to sustain circular economy practices.
Location/s	The Green LGU project will support 60 LGUs in total, with core support designated for 20 key LGU partners (Tier 1 LGUs) and peripheral assistance for the remaining 40 Tier 2 LGUs. Tier 1 20 LGUs include: <u>First Batch Tier one 10 LGUs</u> ▪ Pasig, Quezon, and Caloocan, National Capital Region (3) ▪ City of Baguio, Cordillera Administrative Region (1) ▪ Puerto Princesa City, MIMAROPA (1) ▪ Iloilo City, Region 6 (Western Visayas) (1) ▪ City of Ormoc and Maasin City, Southern Leyte, Region 8 (Eastern Visayas) (1) ▪ Davao, and Island Garden City of Samal, Region 11 (Davao Region) (2) ▪ Del Carmen, Surigao del Norte, Region 13 (CARAGA) (1) <u>Second Batch Tier one 10 LGUs</u> City of San Carlos, Pangasinan, Region 1 (Ilocos Region) ▪ City of Ilagan, Isabela, Region 2 (Cagayan Valley) ▪ City of San Jose Del Monte, Bulacan, Region 3 (Central Luzon) ▪ City of Bacoor, Cavite, Region 4A (CALABARZON) ▪ City of Sorsogon, Sorsogon, Region 5 (Bicol Region) ▪ Maasin City, Southern Leyte, Region 8 (Eastern Visayas) ▪ Isabela City, Region 9 (Zamboanga Peninsula) ▪ Cagayan De Oro, Region 10 (Northern Mindanao) ▪ City of Koronadal, South Cotabato, Region 12 (SOCCSKSARGEN) ▪ Cotabato City, Bangsamoro Autonomous Region in Muslim Mindanao (BARMM)

1. PROJECT RESULTS

1.1. Key project outcome/output level results *(max 2,000 characters)*

Key Result 1: Increased capacity of LGUs

For **Tier 1A LGUs**, which commenced implementation in late 2025, the project focused on completing CE readiness through an integrated CE portfolio workplan covering knowledge and capacity, policy, business development, GEDSI inclusion, and systems strengthening. The focus is now shifting from readiness toward measurable results in waste reduction and diversion, GHG emissions reduction, and green job creation.

For **Tier 1B LGUs**, implementation commenced in early 2026, with priority given to finalizing CE portfolios and establishing the foundations for implementation. All ten LGUs finalized their CE portfolios and work plans, focusing on plastics, organics, and green tourism, and submitted these to DILG. Capacity was strengthened through training on circular food systems and financing, including a joint PPP workshop with Expertise France and the PPP Center.

Peer-to-peer exchanges, including learning visits to Baguio, Samal, and Davao, further supported knowledge transfer and replication.

Key result 2: Improved enabling policy and data management system for LGUs:

The project strengthened the evidence base for CE planning through completion of **Material Flow Analyses and plastics and organics value-chain mapping** for all ten Tier 1B LGUs. For Tier 1A, EPR readiness workshops were completed across all LGUs, supporting assessment of readiness and engagement of key stakeholders.

Digital monitoring dashboards are now being used by Tier 1A LCEATs to track implementation of their CE portfolios. Baguio, Del Carmen, and Maasin completed CE ordinances, while other LGUs initiated policy development. Baguio and Del Carmen also signed EPR partnership agreements with the private sector. Several LGUs also began integrating CE priorities into their Annual Investment Plans (AIP), Comprehensive Development Plans (CDP), and Local Disaster Risk Reduction Management Plan (LDRRMP).

Key result 3: Increased capacities of civil society, local communities and businesses through grants:

Civil society and private-sector engagement continued to expand. In 2026, the 27 CSOs and innovators, working across Tier 1A LGUs established a Community of Practice, providing a platform to exchange experiences, address common challenges, and identify opportunities for collaboration with LGUs and innovators.

In June, the second round of CSO-led grants and the Innovation Challenge grants was launched. These grants for Tier 1B opened opportunities for CSOs and private sector to drive inclusive CE initiatives and create scalable business opportunities.

Summary of Contributions

Top Key Results	Project Outputs	UNDP CPD

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

1. Increased capacity of local government units	Output 1: Improved capacities and tools of LGUs and stakeholders to design, implement, and monitor resilient and inclusive CE Output 3: Increased capacities of public and private stakeholders to finance gender-responsive and inclusive CE strategies and programs Output 6: Strengthened knowledge management, MERL, GEDSI, and safeguards systems to enable Circular Economy uptake by targeted LGUs	Indicator 3.1.2: Number of local governments with improved capacities to implement circular economy and sustainable urban development approaches
2. Improved enabling policy and data management system	Output 1: Improved capacities and tools of LGUs and stakeholders to design, implement, and monitor resilient and inclusive CE Output 2: Increased opportunities for LGUs to design and/or implement GEDSI-responsive local policies and regulations to enable circular economy and green growth:	Indicator 3.4.1: Number of policies, platforms and innovative finance instruments developed to increase public and private sector investments in resilience, low-carbon and natural resources and biodiversity conservation
3. Increased capacities of civil society, local communities and businesses through grants	Output 4: Increased technical and financial capacities of LGUs, civil society, marginalized groups, and private sector to implement innovative and inclusive circular economy solutions Output 5: Increased awareness of businesses, local communities, and other stakeholders on behaviors and practices enabling the transition to a green and circular economy	Indicator 2.1.2: Number of people benefiting from employment and livelihood support

Directions of change *These are overarching shifts UNDP aims to support in partner countries to achieve sustainable development.* (Select below all that apply.)	**Development enablers** *These are foundational capabilities that support and accelerate progress across all areas of development.* (Select below all that apply.)	**Moonshots** *These are ambitious, high-impact goals that UNDP aims to achieve globally by 2030 and are designed to catalyze large-scale change and bring the SDGs within reach.* (Select below all that apply.)
☒ Structural transformation *Structural transformation accelerated, particularly green, inclusive and digital transition* ☒ Gender and leaving no one behind *No-one left behind, centering on equitable access to opportunities and a rights-based approach to human agency and human development* ☐ Building resilience *Resilience built to respond to systemic uncertainty and risk*	☒ Strategic innovation *Empowering governments and communities to enhance the performance of entire systems, making them adaptive and resilient* ☒ Digitalization *Supporting countries to build inclusive, ethical, and sustainable digital societies* ☒ Development Financing *Partnering with governments and the private sector and other partners to align public finance and private capital flows with the SDGs and mobilize finance at scale*	☒ Helping 100 million people to escape out of multidimensional poverty ☒ Supporting 500 million people to gain access to energy ☐ Supporting 800 million people to participate in elections, many for the first time ☒ Promoting over US$1 trillion of public expenditure and private capital investment in the SDGs.

Key results on Gender Equality and Women's Empowerment

During the first half of the year, the project developed two information briefs on GEDSI in CE and Integrating Informal Waste Sector in CE. The below details emerging results from CSOs working with Tier 1A LGUs, related to gender equality and women's empowerment:

- **Ormoc:** Informal repair workers were organized into an association and provided a formal space to operate complete with tools and equipment
- **Del Carmen:** Five women's associations were supported in developing different types of livelihood enterprises practicing circular economy
- **Pasig**: There are two informal waste sector groups provided with seed capital for livelihood development to help in waste diversion activities. There are also three homeowner's association groups supported through livelihood activities
- **Quezon City**: 50 'paleros' or informal waste workers were formally organized and registered in DOLE. They were also provided with organization development trainings to form a cooperative.
- **Caloocan**: In 4 barangays, there are women's groups organized and trained in upcycling plastic sachets to wallets, purses, and bags
- **Puerto Princesa**: The CSO continues to support the operations of EcoKolek (a volunteer group of women in the city) to enhance waste collection activities
- **Iloilo:** There are two homeowner's associations with primarily women members supported through the provision of sewing machines to upcycle used clothes and linens from accommodation facilities.
- **Davao:** An association of primarily women PWD association was provided sewing machine to produce chairs, and table covers made from recycled cloth.
- **Samal:** A woman's group utilizing the plastic part of stickers were supported by the project to produce recycled bags.

2. CHALLENGES AND ISSUES *(max 2,000 characters).*

- **Identifying investment opportunities aligned with EU Global Gateway priorities:** CE investment is relatively new to many LGUs, making it challenging to identify viable, investment-ready opportunities. The project is supporting LGUs to understand investment requirements, develop viable business models and pathways, and connect opportunities with public and private financing.
- **Engaging an additional 40 LGUs and managing the workload:** The project is entering the next stage of engagement with 40 additional LGUs. Given available financial and human resources, the engagement strategy needs to remain realistic and manageable. However, staff transitions have caused delays and increased workloads for existing staff. The project will also explore measures to improve efficiency and keep workloads manageable.
- **Monitoring and documenting outcome-level results (MERL):** As the project moves toward outcome-level results, tracking waste avoidance, reduction and diversion, GHG emissions, and green jobs remains challenging due to limited baseline data, the absence of established measurement guidelines, and weak LGU data systems. The project is strengthening data collection and reporting approaches to better capture and document results.

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

- **Balancing SES compliance with delivery targets:** Compliance with UNDP's Social and Environmental Standards (SES) and Philippine environmental regulations requires additional assessments and site inspections. In some cases, sites required re-evaluation and further studies, extending timelines and delaying procurement of equipment and implementation of activities.
- **Challenges for LGUs to provide timely required documentation:** Many LGUs face challenges in providing accurate equipment specifications, facility plans and proof of property ownership, affecting delivery timelines. The project established a roster of specialists, including engineers, to support technology assessments, facility design and quality assurance. However, recruiting technical experts remains time-consuming.

3. NEXT STEPS AND WAYS FORWARD *(max 2,000 characters).*

The project will focus on moving from **CE readiness to implementation and measurable results**, while strengthening the foundations for sustainability and scale.

- **Accelerate implementation of CE portfolios:** Support Tier 1A LGUs to implement priority interventions and demonstrate measurable results in waste reduction and diversion, GHG emissions reduction, and green jobs. For Tier 1B, move from portfolio development to implementation, with priority interventions translated into concrete budgets, policies, and partnerships.
- **Strengthen policy and institutionalization:** Support LGUs to finalize and adopt CE ordinances, EPR readiness and operationalization and integrate CE priorities into CDPs, AIPs, SWM plans, and other instruments, ensuring ownership beyond the project.
- **Scale successful solutions:** Identify promising initiatives from grants, Innovation Challenge, behavior-change activities, and equipment support and develop pathways for replication and city-wide scale-up, particularly for household plastics, market organics, reuse and other high-impact waste streams.
- **Develop an investment pipeline**: Work with LGUs to identify and develop investment-ready CE opportunities, including viable business models and partnerships with the private sector and financing institutions, aligned with EU Global Gateway priorities.
- **Strengthen results measurement and learning**: Improve MERL systems and methodologies for tracking waste avoidance, reduction and diversion, GHG emissions, green jobs, and other outcome-level results, while strengthening LGU capacity to collect and report data.
- **Consolidate learning for replication:** Document results, lessons, and scalable models across Tier 1 LGUs and use these to inform Tier 2 replication and wider national CE learning and policy dialogue.
- **Deepen stakeholder engagement and inclusion:** Strengthen partnerships among LGUs, businesses, CSOs, communities, academia, and GEDSI groups, ensuring that women, youth, Indigenous Peoples, informal waste workers, PWDs, and other vulnerable groups participate in and benefit from the CE transition.

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

4. LESSONS LEARNED AND GOOD PRACTICES *(max 2,000 characters)*

Experience from project implementation demonstrates **that local ownership and institutional buy-in,** particularly from local chief executives (LCEs) and LCEAT members, are critical to the successful implementation and sustainability of circular economy initiatives. CE priorities should be institutionalized through local policies and plans, including CE ordinances, CDPs, AIPs, and SWM plans.

The transition requires the active engagement of all key stakeholders, including LGUs, citizens, academia, private sector, civil society, and GEDSI groups, with clear roles in planning and implementation. Project-supported interventions—including CSO and behavior-change grants, the Innovation Challenge, and equipment support—should be connected to the broader CE portfolio and LGU priorities to maximize their contribution to systemic change.

Going forward, the focus should **move beyond pilots toward scale**. Successful initiatives need to be expanded and integrated into city-wide systems to achieve measurable reductions in waste generation, increased diversion, GHG emissions reduction, and green job creation. Interventions should increasingly target major waste-generating sectors, particularly households, businesses, public markets, tourism establishments, and other high-volume generators.

CE interventions- including behavioral change-should b∑∑e strategically targeted at priority waste streams and consumption patterns and supported by systems, services, and incentives that enable sustained change. At the same time, the project should identify and operationalize investment opportunities by developing viable business models, mobilizing private-sector participation, and linking CE initiatives to public and private financing.

CE implementation should support an inclusive green transition, ensuring that women, youth, Indigenous Peoples, informal waste workers, PWDs, and other vulnerable groups can participate in and benefit from emerging green jobs and economic opportunities.

								Regenerative agri (Agrea), June 18 to 19 2026 Grants -- CSOs, Innovators
5.1.2. Number of people who have received relevant information on green and circular economy, sustainable consumption and production or sustainable development through the educational and communication strategies developed by the intervention. *Disaggregated by sex, age group and/or LGU*	2023	0	1500	907	5000 (2028)	2024: 0 2025: 3,448 2026: 907 Total:4,355	On-track	*Baguio: Pansa-nopen Tayo* IEC materials: according to the metrics of one PIO Facebook post, the video has been viewed close to 200,000 times to date. Based on the attendance sheet attendees are composed of: 207 males, 297 females, and 37 preferred not to say. Total number of people is 541. The women's month celebration in Baguio on March 8, 2025, which was attended by 1,700 individuals was a venue to promote gender and circular economy. The Local Inception Workshops for T1B LGUs —held in Maasin, San Carlos, Koronadal, and Cotabato City—provided an orientation on CE to a total of 301 participants. In Iloilo, a total of 786 participants attended related activities such as the "I Bike, We Farm" and CE orientation and training. In Puerto Princesa, 120 attended related activities such as the CE orientation. Output 5.1.2

Output 6	**Strengthened knowledge management, MERL, GEDSI and safeguards systems to enable Circular Economy uptake by targeted LGUs**							
Output Indicators	Baseline		Annual target (2026)	Mid-year Result (2026)	End-of-project target	Cumulative result	Status *(On-track, off-track, completed)*	Progress notes and links to MOVs
	Year	Value						
6.1.1. Number of LGUs that have exchanged knowledge and good practices through the peer-to-peer support and/or technical assistance strategy	2023	0	20	12	40 (2028)	2024: 0 2025: 10 2026: 12 Total: 22	Completed	All Tier 1A LGUs attended site visits in Pasig and QC to exchange knowledge on ICE hub activities, organics activities, etc.

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

								Various peer-to-peer exchanges have been carried out through EU-PH GEP activities such as piggy-backed field learning sessions during the Plastics (Sep 2025) and Organics (Mar 2026) Circularity Workshops. Baguio City likewise hosted Tier 1 LGUs for learning visits in its circularity sites. A benchmarking in Marikina City was held last 2 Jun 2026 participated by 17 people from the Tier 1B LGUs to site visit the city's central MRF and Barangay Concepcion Uno's Zero Waste and MRF site. Barangay Concepcion Uno conducts household collection of organic wastes and has a good example of materials recovery system. MOV: Output 6.1.1 (Attendance Sheets)
6.1.2. Number of good practices in CE, GEDSI and/or safeguards that have been documented and published in accessible knowledge portal	2023	0	3	2	20 (2028)	2024: 0 2025: 6 2026: Total: 6	Completed	Portfolio approach (localizing the approach) Baguio story (about Pansa-Nopen Tayo!) Ormoc story (about Kan) Learning from the experience of local chief executives (about Tier 1B) Innovation Challenge (about the launch) World Cities Day (about 3 cities)
6.1.3. Number of LGUs that have developed and/or updated their Disaster Risk Reduction (DRR) plans or strategies with the support of the intervention (Aligned with GERF 2.5.)	2023	0	1	1	3 (2028)	2024: 0 2025: 1 2026: Total: 1	On-track	Ormoc City BDRRM plan updating for 7 barangays; BDRRM plan of Alegria already developed and endorsed to City DRRMO for review. Upcoming: Ilagan City (DRR Plan assessment) and Isabela de Basilan (CE in CDRA) Link: Ormoc BDRRM

Lessons from Advancing Circular Economy in Philippine Cities: From Pilots to Institutionalizing Solutions	Reflects on lessons from the first ten Green LGUs, emphasizing strong national and local leadership, context-specific design, local ownership, sustained capacity-building, inclusion, and peer learning as foundations for circular economy transition. It argues that moving from pilots to institutionalized and scalable solutions will require stronger policies, viable business models, private-sector engagement, financing, and integration into long-term local development pathways.	**Case study**	31 January 2026	General	https://www.undp.org/philippines/blog/lessons-advancing-circular-economy-philippine-cities-pilots-institutionalizing-solutions
Power to Transform: Cities at the Frontlines of Food and Organic Waste Systems	Examines how Philippine cities can address organic waste as an interconnected climate, food-security, livelihood, and inclusion issue. It highlights learning exchanges and emerging city initiatives—including composting in Puerto Princesa, black soldier fly technology in Baguio, the BioBoost facility in Ormoc, and community-based agriculture in Iloilo—showing that effective circular food systems connect policy, infrastructure, technical capacity, and community action.	**Case study**	6 May 2026	General	https://www.undp.org/philippines/blog/power-transform-cities-frontlines-food-and-organic-waste-system
Circular Economy is Our Way of Life: How Ormoc	Highlights Ormoc City's progress in embedding circular economy principles into local plans, investments, barangay systems,	**Case study**	1 June 2026	General	https://www.undp.org/philippines/blog/circular-economy-our-way-life-how-ormoc-has-led-

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

Has Led the Inclusive Circular Economy Transition	education, livelihoods, and everyday community life. It features the city's circular economy resolution, enhanced material recovery systems, repair and recovery enterprises, organic waste facilities, and formal recognition of informal workers, illustrating how local leadership and partnerships can unite environmental protection, economic opportunity, and social inclusion.				inclusive-circular-economy-transition
From City Thinking to Collective Learning: Building Communities of Practice for Circular Cities	Explores how communities of practice and peer learning help cities turn isolated circular economy activities into sustained local systems. Drawing on the experiences of the 2025 Circular Solutions grantees and innovators, particularly in Caloocan and Iloilo, it highlights community-centered approaches to livelihoods, education, behavior change, and inclusive participation while introducing the 2026 CSO Grants for the second batch of Green LGUs.	**Case study**	8 July 2026	General	https://www.undp.org/philippines/blog/city-thinking-collective-learning-building-communities-practice-circular-cities
From Ideas to Implementation: Bringing Circular Innovations to Philippine Cities	Profiles the ten innovators selected through the 2025 Circular Solutions Innovation Challenge and the locally responsive solutions they are implementing across the first ten Green LGUs. The article demonstrates how enterprises, social innovators, and local governments are working together to test and scale solutions in plastic circularity, organic waste, sanitation, tourism, resource recovery, and green livelihoods.	**Case study**	15 July 2026	General	https://www.undp.org/philippines/blog/ideas-implementation-bringing-circular-innovations-philippine-cities
Making the Invisible Visible: Fostering Informal Workers' Participation in Ormoc City's Circular Economy	Documents Ormoc City's efforts to recognize and integrate waste pickers, environmental workers, and repair workers into its circular economy. Through formal recognition, representation in local governance, organizational strengthening, safer workplaces, equipment, and market access, the city shows how a just circular transition can improve livelihoods, social protection, working conditions, and the dignity of workers who have long supported local recovery and repair systems.	**Case study**	22 July 2026	General	https://www.undp.org/philippines/blog/making-invisible-visible-fostering-informal-workers-participation-ormoc-citys-circular-economy

9. PARTNERSHIPS

Name of Partner	Key Results achieved through Partnerships	Type of Partner	Type of Partnership Instrument
Exodus from Child Labor to Integration, Play Socialization and Education, Inc.	Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - Batang Idol para sa Disiplinadong Aksyon sa Circular Economy (BIDA-CE)	*Civil society*	Low Value Grant Agreement
Interfacing Development Interventions for Sustainability (IDIS) Inc.	Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - **EduCycle:** Transforming Mindsets and Markets for a Circular Economy Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - Tourism Reimagined: Empowering Tourism and Business Through Circular Economy and Behavioral Change	*Civil society*	Low Value Grant Agreement
San Remegio Agrarian Reform Beneficiaries Multi-Purpose Cooperative	Supporting the CE portfolio of the LGU through the Community Grant - **SAMAL GREENLOOP COLLECTIVE** (Engaging 5 GEDSI groups for multiple CE Initiatives)	*Civil society*	Low Value Grant Agreement
Zero Waste Baguio Incorporated	Supporting the CE portfolio of the LGU through the Community Grant - **TA ADI AY-AYYEW:** Enhancing the Waste Management System of 6 Barangays Towards a Circular Economy	*Civil society*	Low Value Grant Agreement
AGREA Agricultural Communities International Foundation Inc.	Supporting the CE portfolio of the LGU through the Community Grant - **Para sa Isla.** Engage and build the capacity of both the informal waste sector and GEDSI groups for circularity of tourism, plastics, and agri-wastes (organics).	*Civil society*	Low Value Grant Agreement
Agribusiness Federation of Multipurpose Cooperatives for Rural Empowerment (AFFIRE Coop)	Supporting the CE portfolio of the LGU through the Community Grant - Strengthening Opportunities to Unify Resilient Circular Economy in Ormoc city (SOURCE Ormoc)	*Civil society*	Low Value Grant Agreement
Project Zacchaeus Marketing Cooperative	Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - **Eco Kolek:** Advancing Social Behavior Change for Inclusive Circular Economy and Community Empowerment in Puerto Princesa, Palawan Supporting the CE portfolio of the LGU through the Community Grant - **Eco Kolek:** Advancing Community-Driven Circular Economy and Livelihoods through Inclusive Waste Diversion and Green Enterprise in Puerto Princesa, Palawan	*Civil society*	Low Value Grant Agreement

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

Name of Partner	Key Results achieved through Partnerships	Type of Partner	Type of Partnership Instrument
Lokal Lab Siargao Inc.	Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - **Turning the Tide: A Community-Led Circular Economy Campaign in Siargao**	*Civil society*	Low Value Grant Agreement
IGOROTA Foundation Inc.	Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - ***Pansa-nopen Tayo***: *Shonong ni Ili* towards Circular Economy	*Civil society*	Low Value Grant Agreement
Philippine Business for Social Progress	Supporting the CE portfolio of the LGU through the Community Grant - **Circular Economy for Caloocan City**: A Community-Based Initiative Promoting Inclusive, Sustainable, and Scalable Circular Economy Practices	*Civil society*	Low Value Grant Agreement
Bantay Dagat Volunteers Association of Davao	Supporting the CE portfolio of the LGU through the Community Grant - **GREEN CIRCULAR ECONOMY ADVOCATES** OF DAVAO	*Civil society*	Low Value Grant Agreement
Angat Pinas Inc.	Supporting the CE portfolio of the LGU through the Community Grant - **SALOG Iloilo City:** Strengthening Adaptive Livelihoods and Organizing Grassroots Circular Enterprises	*Civil society*	Low Value Grant Agreement
KILUS Foundation	Supporting the CE portfolio of the LGU through the Community Grant - **Sustainable Plastic Waste Livelihood Training & Leadership Development Program in Pasig City**: Focus on Women, PWDs, and Informal Waste Workers	*Civil society*	Low Value Grant Agreement
Ecological Waste Coalition of the Philippines, Inc.	Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - **Project ADVANCE**: Multi-sectoral and Grassroots-led Approach to Advance Circular Economy Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - Development of ICE Hub Learning Resources such as IEC Materials for a CE Enterprise Training Program involving Women, PWDs, and informal Waste Workers	*Civil society*	Low Value Grant Agreement
University of San Agustin Research and Development Foundation Inc.	Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - **Eco Spaces:** Igniting Change for an Inclusive, Circular, and Sustainable Future	*Civil society*	Low Value Grant Agreement
For Love of Mother Earth, Inc.	Supporting the CE portfolio of the LGU through the CE Education and Behavioral Change Grant - Driving Circularity in Communities: Empowering Women micro-entrepreneurs in Quezon City through skills training and education campaign	*Civil society*	Low Value Grant Agreement

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

Name of Partner	Key Results achieved through Partnerships	Type of Partner	Type of Partnership Instrument
Solid Waste Management Association of the Philippines	Supporting the CE portfolio of the LGU through the Community Grant - Social Inclusion and Food Rescue for Informal Waste Workers Within the Framework of Circular Economy in Selected Communities in Quezon City	*Civil society*	Low Value Grant Agreement

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

10. RISK MONITORING AND MANAGEMENT

Strategic level

Risk	Risk Level	Management and Mitigation Measures
1. 2025 local elections: possible changes in priorities and delays in decision-making arising from new LGU leadership	High	• Institutionalize CE policies and action plans through working with the Local Circular Economy Action Team (LCEAT) at the LGU level • Work closely with LCEAT, local chief executives, the legislative councils, and the responsible departments for CE implementation
2. CE portfolio work plans and solutions (e.g. digital ones) not endorsed by LGUs	Moderate	• Proactively involve the LCEAT in the planning process to ensure alignment with local government priorities and secure formal endorsement. • Formalization of Work Plans by LGUs and DILG.
3. Targeting numerous Circular Economy Areas for LGUs may divert resources and support limiting impacts	High	• Prioritize two material flows (plastics and organics) for circular economy interventions across the LGUs
4. Selection of Tier 2 LGUs far from Tier 1 LGU may divert project support, limiting project impacts	High	• Consider Inter-Local Cooperation (ILC) Approach to achieve economy of scale and scope
5. If SOs activities are not aligned, complementary or harmonized, this may lead to ineffective implementation of activities	Moderate	• Regular coordination and alignment among implementing partners • Joint planning, coordination, regular monitoring and harmonization of MERL frameworks and deliverables among the partners • Oversight to be provided by the Programme Steering Committee to ensure effective coordination and implementation across SOs
6. Disruption and delay of CE initiatives / projects due to inadequate agreements, unclear scope and delimitations between partners and 3rd party executing parties, incomplete turn-overs and responsibilities of partners involved in commissioning and operations of CE initiatives which will disrupt project implementations and delay project deliverables	Moderate	• Execution of agreements, capturing scope and delimitation of each Partner's engagement and provision of project continuity plans. Ensure private partners engaging with the lead institutions in the CE initiatives have required due diligence and rules of engagement considering geopolitics and institutional micro politics • Ensure in the screening process of partners that facilities/ properties where proposed projects will be commissioned are already secured with necessary documents or certifications required by regulatory agencies, as well as property authorization/ ownership or agreements • Partners must proceed to apply/ secure such authorizations and requirements if they have not yet obtained them prior to project implementation • Propose project sites that already have existing facilities that will no longer need property clearings, developments or additional component upgrades

Occupational Risk

Risk	Risk Level	Management and Mitigation Measures
7. Potential exclusion of vulnerable or marginalized groups including the informal sector	Moderate	• Initial mapping of stakeholders in each LGU • Stakeholder engagement plan • Grievance redress mechanism

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

8. Risks of limited women participation	Moderate	• Gender Analysis and Action Plan to ensure gender equality
9. Potential economic displacement of workers involved in linear businesses such as plastic manufacturing	Moderate	• Environment and Social Management Framework • Site-specific just transition strategies to address job loss impacts and propose inclusive measures • Capacity building of affected population • Ensure compliance with applicable labor regulations, including adherence to ILO conventions
10. Potential risks that workers involved in circular economy will not fully benefit from labor-related applicable regulations, resulting in violation of their labor rights	Moderate	
11. Potential risk on community's health and safety from nuisance, pollution and other hazards such as noise, ambient air conditions, and effluent concerns	Moderate	• Environment and Social Management Framework • Site-specific risk assessment and management • Compliance to SES Standard on Pollution Prevention and Resource Efficiency and Philippine environmental regulations • Develop occupational safety and health (OSH) plan • Ensure during screening that Partners are • Capacity building and uptraining on environmental management and pollution controls
12. Potential occupational health and safety risks to workers involved in circular economy activities	Moderate	

Social and environmental risks of CE activities

Risk	Risk Level	Management and Mitigation Measures
13. Circular economy activities and waste infrastructure may be vulnerable to impact of disaster and climate change	Moderate	• Environment and Social Management Framework • Site-specific assessment and management • Compliance to Standard 8 of SES and Philippine environmental regulations • Mainstream DRR/resilience in the development and implementation of project activities • For sites prone to flooding, options include looking for alternative sites, or raising elevation of buildings or platform for equipment or increasing drainage capacity
14. Local circular economy policies, strategies and plans may inadvertently cause environmental and social impacts	Moderate	• Ensure alignment of CE polices, strategies and action plans with Philippines' Nationally Determined Contribution (NDC), National Plan of Action for the Prevention, Reduction and Management of Marine Litter (NPOA-ML), Extended Producer Responsibility (EPR), and Philippine Action Plan for Sustainable Consumption and Production (PAP4SCP) • Ensure participation of local stakeholders and informed by data to ensure smooth transition to CE • Apply precautionary approach in all project undertakings
15. Endangerment/ decrease in biodiversity index of flora or fauna used as organic feedstock in lieu of single use plastics	Moderate	• Conduct baseline biodiversity index study of flora or fauna used for feedstock / raw materials • Ensure that harvesting does not surpass or tip over the sustainable growth of the species by conducting demand and supply analysis to strategize harvesting modes and volumes necessary for production • Maximize use of harvested resources to refrain from material wastage

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

16. Greenwashing in green tourism as part of circular economy initiatives. Misleading objectives and outcome on the environmental promotion and sustainability of the proposed eco-tourism,	Moderate	• Secure certification of applicable tourism accreditations or certifications from applicable scoping regulatory agencies in order to mainstream compliance and green practices towards circular economy • Ensure partner has auditable, reportable and measurable Sustainability reports or annual environmental performance reports for transparency on targets of circular or green economy practices of the partner institutions • Ensure practice of green procurement • Ensure use of alternative energies whenever possible to refrain from unnecessary bulk diversion of supply towards commercial needs from residential
17. Circular economy activities may expose workforce to occupational and work-related hazards and risks which may lead to fatality or accidents	Moderate	• Use of Personal Protective Equipment (PPE) to protect workforce from inhalation of emissions coming from the equipment operation • Provision of proper ventilation and/or blower in order to improve work environments and adjacent community's ambient air.
18. Generation of air pollutants such as noise, amplification of vibration and organic/ inorganic emissions	Moderate	• Ensure IEC campaigns in different channels to streamline awareness for the community regarding the incoming operation of equipment/ facilities • Strategizing schedule of operations ensuring no saturation of activities happen during sensitive hours as per NPCC 1980, Provide barriers to deflect noise from the receptors • Consider impact zoning such as placing equipment/ facilities in areas where receptors have organic buffers like trees, greeneries, or areas where receptors are mostly in secondary or indirect impact zones.
19. Generation of effluent/ wastewater due to washwater or processed water in relation to operating such equipment/ facilities	Moderate	• Provision of wastewater or effluent facilities in project sites • Disposal of process water or effluent water through accredited and acceptable service provider • Secure possible permits necessary for effluent management and in charge from regulatory agencies

Risks related to Knowledge and capacity

Risk	Risk Level	Management and Mitigation Measures
20. The LGUs has limited capacity to use and sustain interventions provided by the project and remains unused.	Low	• LGUs will be consulted about their technological and digital needs and be assessed in their capacities. All interventions will be customized based on the needs of each LGU and prepare equivalent non-digital solutions.
21. There may be gaps in knowledge and capacity to meet project implementation outputs within the timeframe given existing workload and resource constraints, delaying the achievement of project milestones.	Moderate	• Enhance technical and administrative support to LGUs to ensure completion of activities and alignment with project objectives.

Docusign Envelope ID: C4F36626-9A3F-834C-81B9-A79CCC98989B

22. Increasing reliance on AI tools and platforms for project implementations and its pre-requisites creating complacency, erosion of human oversight amongst project members, which may lead to deskilling and displacement of human workforce and defeating purpose of green jobs	Low	• Create internal policy, regulations managing automation bias of users, and enhance basic AI-based tool ethical standards. Define clear AI-based tool utilization and boundaries of human vis-a-vis automation management
