Description

Pacific Island Countries (PICs) consistently ranks as the most hazardous region in the World Risk Index for hazards, with Vanuatu consistently taking out the top position globally as the most hazard prone state in the world. Every year around half of the population of Vanuatu is impacted by either extreme climate related events resulting in high number of displacements.1 For Vanuatu, general climate change impacts and human rights especially raise concerns related to human security, and gender issues (namely related to women and children) are particularly more profound during times of disasters or sudden onset climatic hazards such as cyclones. As the impacts of climate change continue – and many families remain displaced – the importance of a coordinated response, with national standards related to displacement are more crucial than ever. Distinctively, the National Policy on Climate Change and Disaster Induced Displacement launched in 2018 sets out to address different aspects of climate related mobility – migration, displacement and planned relocation while also emphasizing an approach of durable solutions. The policy serves as a national roadmap towards mitigating challenges that have and will arise, but with strategic focus and clear plans. However, the combined impacts of simultaneous exposure to multiple disasters alongside limited capacity, governance and institutional barriers inhibit effective policy implementation. The project, "Advancing Durable Solutions to Internal Displacement in Vanuatu", co-implemented by IOM and UNDP in close partnership with the Government of Vanuatu, will address displacement needs that arise in the context of disasters, integrating development principles into the humanitarian response while enhancing the Government's capacity to address displacement risks and identify durable solutions. In line with the Action Agenda on Internal Displacement, the project will strengthen leadership in implementing solutions for Internally Displaced Persons (IDPs), across its institutional lines, adopting a "whole-of-government" and a "whole of UN" effort. Indeed, while the project is co-implemented by IOM and UNDP, together with RCO the two agencies will coordinate their work and integrate other UN agencies into this programme.

The joint programme will support the formalization of the National Durable Solutions Taskforce (established in March 2023) enhancing leadership capacity, governance, and institutional arrangements to identify, plan and coordinate displacement solutions. IOM will also support national solutions strategies that embed long-term solution efforts in the wider development and SDG plans of the country, particularly vis-à-vis the goal of Leaving No One Behind through the development of National Durable Solution Guidelines in line with international standards, while piloting implementation at the local level to advance durable solutions for IDPs. This will be complemented by the development of multi-year financing framework, legislative reviews to inform legal reform for identifying durable solutions and provide a catalytic impact of current and future programming. Alongside, UNDP will establish displacement data collection systems integrated with government data systems for informed development planning and decision making. The project will prioritize the views, needs, and capacities of IDPs and host communities and promote sustainable, nationally owned solutions through targeted capacity building at national and local levels to shape investments, and measure progress towards solutions. The joint programme will adhere to the principles of "leaving no one behind", incorporate human-rights and gender equality, and support youth, person with disabilities, while integrating environmental and social standards and contributions to UN coherence and efficiencies.

Universal Markers	**Gender Equality Marker**	**Risk**
	• GEM2 - GEWE is a significant objective of the Key Activity's overall intent	• Medium Risk
Optional Markers	**WB Income Category**	• Lower Middle Income
	UN LDC	• No

Narratives

Title	Text
Situation Analysis [max 3500 characters with spaces]	Climate change projections, even those within 1.5 degrees of global warming, suggest that Vanuatu faces several critical human security threats that are likely to intensify the drivers of migration, displacement, and planned relocation of communities (Pacific CF 2023 – 2027). Regrettably, the actual number of Ni-Vanuatu in protracted displacement is unknown, as there has been no national-level assessment conducted of protracted displacement. It is also not currently possible to determine whether the IDPs have an intention to return, and where returns have already occurred, or whether they are permanent or temporary. It is apparent from field visits to small communities of IDPs that self-supported local integration and in some cases, relocation, has already taken place and that IDPs continue to face significant and mutually reinforcing barriers to durable solutions, including land tenure, damage, or destruction of their primary residence from the latest twin cyclones, exhaustion or depletion of savings, limited access to essential services, loss of livelihoods, and loss of household items. Ensuring that gender-inclusive preventative measures, local integration, return or relocation can effectively take place is critical for these households to overcome displacement-related vulnerabilities. In addition, the most recent humanitarian relief response to the twin cyclones in March 2023 highlighted many gaps in the implementation of the policy, particularly as they pertain to durable solutions, though the event did raise political and government interest in the issue of development-led durable solutions for affected populations, with senior government stakeholders raising the need to address the root causes of displacement by looking beyond humanitarian approaches. Due to the cyclones' impact on the capital city of Vanuatu, Port Vila, of particular note was the issue of pendular displacement of populations living in hazardous urban areas who may have access to limited options to self-recover in safe locations. Against this backdrop, and in consideration of the UN Secretary-General's Action Agenda on Internal Displacement, this project will support the Government of Vanuatu to deliver on the objectives of the Taskforce as well as implement the National Policy on Climate Change and Disaster Induced Displacement. Under the overall outcome of the Pacific CF Strategic Priority 1: Planet, the project will contribute towards achieving the objective – "By 2027, people, communities and institutions are more empowered and resilient to face diverse shocks and stresses, especially related to climate variability impacts, and ecosystems and biodiversity are better protected, managed and restored."

Rationale and theory of change [max 7000 characters with spaces]	Climate change projections, even those within 1.5 degrees of global warming, suggest that Vanuatu faces several critical human security threats that are likely to intensify the drivers of migration, displacement, and planned relocation of communities (Pacific CF 2023 – 2027). Regrettably, the actual number of Ni-Vanuatu in protracted displacement is unknown, as there has been no national-level assessment conducted of protracted displacement. It is also not currently possible to determine whether the IDPs have an intention to return, and where returns have already occurred, or whether they are permanent or temporary. It is apparent from field visits to small communities of IDPs that self-supported local integration and in some cases, relocation, has already taken place and that IDPs continue to face significant and mutually reinforcing barriers to durable solutions, including land tenure, damage, or destruction of their primary residence from the latest twin cyclones, exhaustion or depletion of savings, limited access to essential services, loss of livelihoods, and loss of household items. Ensuring that gender-inclusive preventative measures, local integration, return or relocation can effectively take place is critical for these households to overcome displacement-related vulnerabilities. In addition, the most recent humanitarian relief response to the twin cyclones in March 2023 highlighted many gaps in the implementation of the policy, particularly as they pertain to durable solutions, though the event did raise political and government interest in the issue of development-led durable solutions for affected populations, with senior government stakeholders raising the need to address the root causes of displacement by looking beyond humanitarian approaches. Due to the cyclones' impact on the capital city of Vanuatu, Port Vila, of particular note was the issue of pendular displacement of populations living in hazardous urban areas who may have access to limited options to self-recover in safe locations. Against this backdrop, and in consideration of the UN Secretary-General's Action Agenda on Internal Displacement, this project will support the Government of Vanuatu to deliver on the objectives of the Taskforce as well as implement the National Policy on Climate Change and Disaster Induced Displacement. Under the overall outcome of the Pacific CF Strategic Priority 1: Planet, the project will contribute towards achieving the objective – "By 2027, people, communities and institutions are more empowered and resilient to face diverse shocks and stresses, especially related to climate variability impacts, and ecosystems and biodiversity are better protected, managed and restored."
Sustainable, nationally-owned solutions [max 1500 characters with spaces]	The project will prioritize the views, needs, and capacities of IDPs and host communities and promote sustainable, nationally-owned solutions through consultations and targeted capacity building at national and local levels to shape investments, and measure progress towards solutions to displacement. The project will address the gaps more sustainably in knowledge and capacity and further contribute to the sustainability of interventions linking Vanuatu's efforts on advancing durable solutions, climate change and disaster and displacement risk management. The project will support the Government of Vanuatu to deliver on the objectives of the Durable Solutions Taskforce to support sustainability and ownership of all activities through the whole-of-government and whole-of-society approach as well as implement the National Policy on Climate Change and Disaster Induced Displacement. Consultations in the development of durable solutions guidelines will be made with local, sub-national and national actors, all parts of the IDP population, including women, children of a certain age and level of maturity, persons with special needs and persons who are potentially marginalized, this will ensure sustainability of the intervention. The project will also seeks to understand the relationship between climate change loss and damage and displacement, developing a grounded evidence base on the link to open up longer-term climate financing for the government of Vanuatu to address displacement risks and provide solutions.
Gender marker justification [max 1500 characters with spaces]	Across the project intervention, the needs of women, youth, people with disabilities, elderly and other vulnerable or minority groups are considered, and consultations with representative organizations will be held and their viewpoints incorporated into design where possible. Given the prevalence of GBV and low levels of women's leadership and participation in decision-making in Vanuatu, the project will promote women's full participation and women's leadership in the National Durable Solutions Taskforce as well as development of durable solutions guidelines to be gender-inclusive to contribute to accelerate progress towards gender equality and women's empowerment through the project. In addition, the project will promote gender balance and diversity in all activities and will collect disaggregated data by sex, age and vulnerability where it is relevant, including by engaging women and other marginalized groups in generating analysis and developing policy options.

Accountability to displaced persons [max 1500 characters with spaces]	The project will seek inputs from IDPs on the design of relevant project activities and will effectively and transparently share information throughout project phases. The project will proactively engage and consult with community, civil society and customary leaders who will ensure inclusive representation in conversations on displacement and durable solutions from IDPs or at-risk communities, women, youth, people with disabilities, elderly and other vulnerable or minority groups. Indeed, displaced people – as well as displacement-affected communities – will be engaged in the development of the Displacement Solutions Roadmap, with both rights-based and culture-centered guidance and safeguards for solutions provision. More broadly, engagement of at-risk communities will be central in linking adaptation and risk reduction to the solutions roadmap. Furthermore, the project is designed to mainstream a conflict- and gender-sensitive approach, which includes Do No Harm principles and policies, accountability to affected populations (AAP) and stakeholders, inclusive participation, and empowerment across all project components.
Steering and management arrangements [max 1500 characters with spaces]	A Programme Steering Committee (PSC) will be formed at programme inception, comprising the UN Resident Coordinator's Office in Fiji (which coordinates UN programming in Vanuatu), IOM and UNDP with consideration of gender balance, to provide oversight of programme activities in consultation and liaison with other existing coordination mechanisms. Other key stakeholders will include the Vanuatu Durable Solutions Taskforce, IDSF JP Steering Committee, Ministry of Climate Change, and Ministry of Internal Affairs. The partners will utilize the PSC to meet quarterly for purposes of programme updates, planning, and progress review, including monitoring implementation, human rights and gender impacts, and risk management. The PSC will be convened and chaired by IOM. IOM's Programme Manager will hold overall responsibility for programme coordination in consultation with UNDP and the PSC, including reporting and evaluation. To coordinate with governments, civil society organizations, and other key actors, IOM and UNDP will coordinate closely with the Vanuatu Durable Solutions Taskforce and share regular updates with PSC members to ensure coordination and complementarity of the programme and contribution to national priorities on durable solutions. IOM and UNDP as the key implementing agencies will meet regularly with each other. IOM as Lead Agency will seek to ensure work plans are being followed. The PSC will hold an inception meeting which will also include the finalization of the PSC Terms of Reference and detailed work plan for the activities contained within. Where possible, PSC meetings will be organized in coordination with the Taskforce meeting to ensure efficient collaboration with government structures.

Complementary roles and responsibilities among PUNOs [max 1500 characters with spaces]	The programme will be implemented by IOM and UNDP, between which there is substantial presence, existing initiatives and comparative advantages in Vanuatu. IOM will act as Convening UN Organisation. IOM offices are supported by IOM Australia and Coordinator for the Pacific, which provides support in financial and programmatic reporting, and IOM's Regional Office in Bangkok which provides additional technical support via regional thematic experts in the areas of durable solutions, disaster risk reduction, migration, environment, and climate change. The IOM office in Vanuatu with existing national programmes as well as multi-partner programmes across the Pacific creates a network that will allow IOM to effectively manage the programme activities. IOM Vanuatu is a small but growing mission that has a strong strategic role in supporting both government and non-government partners through its role as co-lead on the Displacement and Evacuation Centre Management Cluster, which also operates as a coordination body for displacement-related programming between partners in peace times. The organization works across displacement management, emergency response, strengthening displacement preparedness systems and approaches, applied research on displacement impacts to cultural and social systems and climate mobility planning. In addition, IOM has strong relationships with the Government of Vanuatu including holding the position of co-chair of the Durable Solutions Taskforce with the Ministry of Climate Change which will allow it to facilitate efficient coordination, learn from and guide best practice durable solutions in Vanuatu and report the outcomes and results of this IDSF-funded programme. UNDP supports Vanuatu through climate resilience, environmental conservation, healthcare, and economic development initiatives, strengthening the nation's resilience and promoting sustainable growth. UNDP has supported the government in developing key national data systems, through restructuring of the Civil Registry, introducing identity management and legal reforms; the introduction and dissemination of National ID Card; the development of a new integrated identity system database and data protection reforms; and building Vanuatu's population register. UNDP also works closely to build the resilience, promote adaptation, and lower displacement risks of vulnerable areas and communities through integrated approaches to sustain livelihoods, food production, ensure biodiversity conservation and reduce land degradation. UNDP is also a key partner in supporting risk-informed development approaches and mainstreaming GESI through different levels of government, working especially closely with sub-national government actors including Provincial Governments, Area Administrators and Area Secretaries. UNDP's role in the joint project will, therefore, be to ensure integration of displacement solutions specific systems within risk-informed development systems and policy to promote displacement-responsive development planning. On data, UNDP will ensure the interoperability of data systems, especially a) the integrated identity management system and Vanuatu Population Register (RV5), b) the new national village register and c) the Geospatial population/demographics mapping. UNDP will also draw on regionally developed knowledge products and approaches to examine the linkages between loss and damage and dispalcement within the Vanuatu context, as well as exploring how vertical funds associated with loss and damage might be used to support integrated programming on displacement risk. This will be complimentary to legislative analysis for durable solutions pathways with a focus on ensuring (some) social and political rights for displaced populations. Through close links to local administrations, UNDP will also ensure there is whole-of-government ownership mechanisms to deliver durable solutions in Vanuatu. Both partners are currently implementing activities in Vanuatu resulting in strong ties with the respective governments and local stakeholders, which will also support extending the relevant programme activities including in remote locations in Vanuatu. Implementing partners involved in the joint programme include the relevant Ministries or Departments in the Government of Vanuatu including but not limited to the Ministry of Climate Change, Vanuatu Association of NGOs (VANGO), Department of Urban Affairs and Planning (DUAP) UN Resident Coordinator's Office (RCO), National Advisory Board (NAB) Secretariat, Vanuatu Meteorology and Geohazards Department (VMGD), Department of Strategic Planning, Policy and Aid Coordination (DSPPAC).

Monitoring, learning, and reporting [max 3000 characters with spaces]	Under the leadership of IOM as the lead PUNO, monitoring will be carried out in accordance with the national context, a results-based management method will be applied, with overall coordination by the UN system as well as coordinated regularly through the PSC established under the programme. This will aim to ensure the programme activities, expenditures and results are on track in accordance with the proposed workplan and results matrix. During the first quarter of programme implementation, IOM and UNDP will develop a detailed programme implementation work plan and results matrix in coordination with programme stakeholders at the planned inception workshop, as well as developing a detailed monitoring plan which will guide monitoring efforts, for approval by the PSC. The results matrix will be the overarching document to guide this, as it outlines the outputs, activities and indicators, including data collection methods and sources. Staffing costs have been included in the monitoring and evaluation budget to support the associated data collection and monitoring efforts. Where necessary, field visits, and regular reviews by IOM and UNDP will support monitoring and learning in the joint programme. Monitoring will also capture risk management to ensure that they are addressed without affecting implementation, as well as monitoring financial expenditure, including burn rates and identifying the need for any budget revisions. Monitoring will ensure the programmes adherence to the principles of “leaving no one behind”, incorporate of human-rights, positive results towards youth, support for the towards persons with disabilities, integration of environmental and social standards and contributions to UN coherence and efficiencies. Ongoing and deliberate monitoring will enable the partners to adjust the implementation strategy or approach as needed, including coordinating with the IDSF Fund and the Government of Vanuatu. Specifically, monitoring will be captured in line with the indicators described in the results matrix. These indicators have been designed with efficiency in mind, so the programme manager and stakeholders can capture data as part of programme implementation without unnecessary additional expenditure where possible. Project monitoring and evaluation costs have also been allocated for ongoing project monitoring by the PSC and project staff, with technical support from IOM’s monitoring and evaluation team based in Canberra and Bangkok and an end of programme evaluation by an external evaluator. IOM and UNDP consolidate inputs to provide 6-month project progress information based on project indicators and expenditures at project outcome level. Additionally, partners will submit annual and final reports on program activities to the Secretariat in line with the approved format including the analysis of how the outputs and outcomes have contributed to the Fund's overall impact and contributions to the Pacific CF and Global SDGs. In tandem, IOM and UNDP will submit annual and final financial reports providing information on the use of financial resources against the outputs and outcomes in the agreed results framework.
Evaluation [max 1500 characters with spaces]	The programme budget includes dedicated funds for an end-of-project evaluation. A formal evaluation plan and terms of reference will be developed by the PSC including the IDSF Secretariat, with reference to the UN Evaluation Group’s Norms and Standards for Evaluation Guidance. A baseline assessment will be conducted within the first quarter of the programme delivery, with a joint final independent evaluation undertaken within six months after the completion of the programme. The purpose of the final evaluation will be to extract lessons learned from programme implementation as well as to enhance accountability of the programme towards the donor and beneficiaries, as well as the implementing governments. The evaluation will be participatory, and the evaluator/s will consult with programme stakeholders including IDPs and host communities, internally displaced women and children to capture their views and feedback. The results of this evaluation will be validated at a workshop with implementing partners and other key stakeholders identified throughout the programme implementation, with learning products shared with those who are potentially engaged in follow-up or related activities. The evaluation will assess the programme’ s impact, effectiveness, sustainability, efficiency, and relevance, as well as impact on the human rights and application of a gender-response and leaving no one behind lens. The evaluation findings will inform future durable solutions interventions in Vanuatu to facilitate IDP solutions for longer term development planning and financing. Close coordination with the Government and other stakeholders will also support the use of the evaluation findings in embedding long-term solution efforts in the wider development and SDG plans of the country, particularly vis-à-vis the goal of Leaving No One Behind. Results of the final evaluation will further support the Fund’s objective of a catalytic impact of current and future programming.

SDG Targets

Target	Description
Main Goals	
Goal 10. Reduce inequality within and among countries	
TARGET_10.7	10.7 Facilitate orderly, safe, regular and responsible migration and mobility of people, including through the implementation of planned and well-managed migration policies
Goal 13. Take urgent action to combat climate change and its impacts2	

Target	Description
TARGET_13.2	13.2 Integrate climate change measures into national policies, strategies and planning
TARGET_13.3	13.3 Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning
TARGET_13.b	13.b Promote mechanisms for raising capacity for effective climate change-related planning and management in least developed countries and small island developing States, including focusing on women, youth and local and marginalized communities
Goal 17. Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development	
TARGET_17.14	17.14 Enhance policy coherence for sustainable development
TARGET_17.16	17.16 Enhance the Global Partnership for Sustainable Development, complemented by multi-stakeholder partnerships that mobilize and share knowledge, expertise, technology and financial resources, to support the achievement of the Sustainable Development Goals in all countries, in particular developing countries

SDG Indicators

Indicator Code	Description
C100702	10.7.2 Number of countries that have implemented well-managed migration policies
C130201	13.2.1 Number of countries that have communicated the establishment or operationalization of an integrated policy/strategy/plan which increases their ability to adapt to the adverse impacts of climate change, and foster climate resilience and low greenhou
C130302	13.3.2 Number of countries that have communicated the strengthening of institutional, systemic and individual capacity-building to implement adaptation, mitigation and technology transfer, and development actions
C130b01	13.b.1 Number of least developed countries and small island developing States that are receiving specialized support, and amount of support, including finance, technology and capacity-building, for mechanisms for raising capacities for effective climate c
C171401	17.14.1 Number of countries with mechanisms in place to enhance policy coherence of sustainable development
C171601	17.16.1 Number of countries reporting progress in multi-stakeholder development effectiveness monitoring frameworks that support the achievement of the sustainable development goals

Contribution to SDGs

Participating Organization	% TARGET_13.2	% TARGET_10.7	% TARGET_17.14	% TARGET_13.b	% TARGET_17.16	% TARGET_13.3	% Total

Project Results

Outcome	Output	Description
Output 1. Government of Vanuatu has strong leadership, governance and financing arrangements to identify and plan and implement solutions to displacement at the central level.		
	1.1 Strengthened leadership, governance and institutional arrangements to identify, plan and coordinate solutions to displacement.	

Activities

Title	Description	Lead Participating Organization	Participating Organization	Other Organizations
Activity 1 Support the formalisation of a multi-sectoral gender-inclusive governance mechanism, including designating a lead coordinating ministry, to progress national leadership on identifying and planning for displacement solutions		IOM - IOM (International Organization for Migration)		
Activity 2 Undertake departmental review and analysis in collaboration with government, to establish institutional hub to coordinate activities in this area, and assess sustainability measures		IOM - IOM (International Organization for Migration)		

	1.2 Community, civil society and customary leaders are gender-balanced, engaged, consulted and trained to inform government and community decisions and processes.

Outcome	Output	Description
	Activities	

Title	Description	Lead Participating Organization	Participating Organization	Other Organizations
Activity 1 Convene forum/s and/or consultation sessions to ensure inclusive representation in national conversations on displacement and durable solutions from IDPs or at-risk communities, and other vulnerable or minority groups		IOM - IOM (International Organization for Migration)		
Activity 2 Undertake provincial, area council and community-based awareness-building and consultation to inform the development of durable solutions guidelines in a gender-inclusive manner.		IOM - IOM (International Organization for Migration)		

	1.3 Displacement Solutions Roadmap developed for priority location/s and/or population/s and fiscal and legislative options are outlined.	

Outcome	Output	Description
	Activities	

Title	Description	Lead Participating Organization	Participating Organization	Other Organizations
Activity 1 Consult at the provincial, area council and community levels to consultation to confirm the interest of priority locations in pilot project/s.		IOM - IOM (International Organization for Migration)		
Activity 2 Support the government to design a Roadmap for Durable Solutions Pathways for the selected displacement issue in priority location/s or population/s, including potential interventions.		IOM - IOM (International Organization for Migration)		
Activity 3 Develop a joint financing strategy with relevant government stakeholders and partners, embedded in the roadmap.		IOM - IOM (International Organization for Migration)		
Activity 4 Undertake legislative analysis for durable solutions pathways (e.g. land acquisition pathways or other required analyses) and outline options or potentially required amendments for GoV to consider in decision-making.		IOM - IOM (International Organization for Migration)		
Activity 5 Convene an awareness session on the risk and conflict screening process for the Displacement Solutions Roadmap.		IOM - IOM (International Organization for Migration)		

	1.4 Rights & culture-centered guidelines and safeguards for durable solutions (return and/or local integration and/or resettlement / relocation) are developed and inform implementation of durable solutions planning and interventions.

<tr><td>Activity 2 Outline culturally-appropriate, gender sensitive approaches and pathways utilising holistic perspectives, indigenous customary networks and systems, traditional land management and negotiation pathways and conflict resolution processes</td><td></td><td>IOM - IOM (International Organization for Migration)</td><td></td><td></td></tr>
</table></td></tr>
<tr><td>Output 2. Government has a sound evidence base and displacement data collection system with which to make informed decisions to find solutions to displacement and mitigate risks of future displacement.</td><td></td><td></td></tr>
<tr><td></td><td>2.1 Develop profile of historical, current and future climate and disaster-induced displacement types, locations and lessons learned across Vanuatu, considering slow and rapid-onset hazards.</td><td></td></tr>
</table>

Outcome	Output	Description

Activities

Title	Description	Lead Participating Organization	Participating Organization	Other Organizations
Activity 1 Develop data model to facilitate forecasting and predictive analytics to capture future climate displacement and mobility patterns forecast (modelling + qualitative stress test) over the short-, medium- and long-term		UNDP - UNDP (United Nations Development Programme (UNDP))		
Activity 2 Carry out an Inclusive analysis of the potential losses and damages from climate change-driven displacement and projected impacts of climate mobility across socio-economic and non-economic variables		UNDP - UNDP (United Nations Development Programme (UNDP))		

2.2 Displacement data collection systems established and integrated with government data systems for development planning (population, demographics, risks/vulnerability indicators)

Activities

Title	Description	Lead Participating Organization	Participating Organization	Other Organizations
Activity 1 Develop a strategy for displacement data integration in national data management systems, informed by technical work to ensure the interoperability of displacement data sources and tracking with other government systems		UNDP - UNDP (United Nations Development Programme (UNDP))		
Activity 2 Implement displacement data ingtegration strategy		UNDP - UNDP (United Nations Development Programme (UNDP))		
Activity 3 Activity 3 Develop systems for decentralised data collection through capacity building with area adminstrators and build capacities for data collection		UNDP - UNDP (United Nations Development Programme (UNDP))		

Outcome	Output	Description
Output 3 Local-level governance and planning mechanisms on solutions to displacement are established, with systematic and meaningful engagement of civil society and affected communities		
	3.1 Local authorities are capacitated in durable solutions planning with gender-inclusive manner in areas of origin/return to prevent repeat disaster displacement.	

Outcome	Output	Description

Activities

Title	Description	Lead Participating Organization	Participating Organization	Other Organizations
Activity 1 Develop required tools and related training for implementation of durable solution guidelines and ensure integration of processes and tools into decentralised planning system with gender-inclusive manner.		IOM - IOM (International Organization for Migration)		
Activity 2 Adapt integrated tools for targeted vulnerability, gender mainstreaming, risk reduction and adaptation planning to support durable solutions planning.		IOM - IOM (International Organization for Migration)		
Activity 2 Adapt integrated tools for targeted vulnerability, gender mainstreaming, risk reduction and adaptation planning to support durable solutions planning.		UNDP - UNDP (United Nations Development Programme (UNDP))		
Activity 3 Undertake targeted capacity building and training for local authorities on the operationalisation of durable solutions guidelines, as well as risk reduction and adapation planning for local authorities		IOM - IOM (International Organization for Migration)		
Activity 3 Undertake targeted capacity building and training for local authorities on the operationalisation of durable solutions guidelines, as well as risk reduction and adapation planning for local authorities		UNDP - UNDP (United Nations Development Programme (UNDP))		

	3.2 Support local governments to pilot gender-sensitive durable solutions guidelines and interventions and improve implementation practice.	

Outcome	Output	Description

Activities

Title	Description	Lead Participating Organization	Participating Organization	Other Organizations
Activity 1 Support local authorities to pilot operationalisation of guidelines (or part of) in collaboration with community/ies and to assist them in community-based assessments and planning to identify preferred durable solutions pathways		IOM - IOM (International Organization for Migration)		
Activity 1 Support local authorities to pilot operationalisation of guidelines (or part of) in collaboration with community/ies and to assist them in community-based assessments and planning to identify preferred durable solutions pathways		UNDP - UNDP (United Nations Development Programme (UNDP))		
Activity 2 Support local authorities and community/ies to lead and implement in collaboration with community/ies appropriate multi-sectoral gender-sensitive durable solutions interventions as decided upon in collaboration with government and communities		IOM - IOM (International Organization for Migration)		
Activity 2 Support local authorities and community/ies to lead and implement in collaboration with community/ies appropriate multi-sectoral gender-sensitive durable solutions interventions as decided upon in collaboration with government and communities		UNDP - UNDP (United Nations Development Programme (UNDP))		

Outcome	Output		Description		
	Activity 3 Utilise learnings from community level pilot/s to update the durable solutions or planning guidelines and inform development of SOPs or other relevant operational documents o tools on durable solutions identification and planning, and further		IOM - IOM (International Organization for Migration)

Indicator Title	Component Title	Description	Means of Verification	Category	Cycle	Scope	Value Type	Baseline Value	Baseline Year	Target Value	Target Year	Linked Outcome / Output
# of government data systems reflecting displacement and solutions data		Indicator for Output 2	Review of data system frontend used by practitioners	Other	Every two years	Country	Number	0	2024	3	2025	**Outcome :** Output 2. Government has a sound evidence base and displacement data collection system with which to make informed decisions to find solutions to displacement and mitigate risks of future displacement. **Output:** 2.2 Displacement data collection systems established and integrated with government data systems for development planning (population, demographics, risks/vulnerability indicators)
	No components available.											

Indicator Title	Component Title	Description	Means of Verification	Category	Cycle	Scope	Value Type	Baseline Value	Baseline Year	Target Value	Target Year	Linked Outcome / Output
# of reports accounting for climate change and disaster risks to future displacement		Indicator for Output 2	Project implementation/progress updates	Other	Every two years	Country	Number	0	2024	1	2024	**Outcome :** Output 2. Government has a sound evidence base and displacement data collection system with which to make informed decisions to find solutions to displacement and mitigate risks of future displacement. **Output:** 2.1 Develop profile of historical, current and future climate and disaster-induced displacement types, locations and lessons learned across Vanuatu, considering slow and rapid-onset hazards.
	No components available.											

Indicator Title	Component Title	Description	Means of Verification	Category	Cycle	Scope	Value Type	Baseline Value	Baseline Year	Target Value	Target Year	Linked Outcome / Output
# of pilot initiatives on implementing durable solutions to advance IDP solutions		Indicator for Output 3	Project document/ pilot initiative supporting documents	Other	Every two years	Country	Number	0	2024	1	2025	**Outcome :** Output 3 Local-level governance and planning mechanisms on solutions to displacement are established, with systematic and meaningful engagement of civil society and affected communities **Output:** 3.2 Support local governments to pilot gender-sensitive durable solutions guidelines and interventions and improve implementation practice.
	No components available.											

Indicator Title	Component Title	Description	Means of Verification	Category	Cycle	Scope	Value Type	Baseline Value	Baseline Year	Target Value	Target Year	Linked Outcome / Output
# of capacity building initiatives for government officials on operationalising durable solutions guidelines		Indicator for Output 3	Training documents/ project reports	Other	Every two years	Country	Text	0	2024	TBD	2025	**Outcome :** Output 3 Local-level governance and planning mechanisms on solutions to displacement are established, with systematic and meaningful engagement of civil society and affected communities **Output:** 3.1 Local authorities are capacitated in durable solutions planning with gender-inclusive manner in areas of origin/return to prevent repeat disaster displacement.
	No components available.											

Risks

Event	Category	Level	Likelihood	Impact	Mitigating Measures	Risk Owner
Disasters during project implementation		Very High	Very Likely	Extreme	Ensure business continuity plans are in place for all programme offices. Maintain good programme records to ensure continuity as soon as possible after disaster impacts are resolved.	IOM and UNDP
Delays in recruitment of technical experts	• Operational • Organizational	Medium	Possible	Major	Include sufficient preparatory and inception phase to ensure staff and experts are onboarded in a timely manner.	IOM and UNDP

Change in political and government leadership	• Political	Medium	Unlikely	Major	Continuous engagement and coordination with government including all relevant departments and ministries.	IOM and UNDP
Change in government priorities or lack of ownership and uptake on project activities	• Strategic	Medium	Possible	Extreme	Continuous engagement and coordination with government over the course of implementation to strengthen ownership.	IOM and UNDP

Budget by UNSDG Categories: Over all

Budget Lines	Description	IOM (7%) *	UNDP (7%) *	Total
1. Staff and other personnel		$201,000.00	$80,000.00	$281,000.00
2. Supplies, Commodities, Materials		$14,595.55	$0.00	$14,595.55
3. Equipment, Vehicles, and Furniture, incl. Depreciation		$5,096.00	$0.00	$5,096.00

Programme Outcome Costs

Outcome	Output	Activity	Implementing Agent	Time Frame						
				2024				2025		
				1	2	3	4	1	2	3
Output 1. Government of Vanuatu has strong leadership, governance and financing arrangements to identify and plan and implement solutions to displacement at the central level.										
	1.1 Strengthened leadership, governance and institutional arrangements to identify, plan and coordinate solutions to displacement.									
		Activity 1 Support the formalisation of a multi-sectoral gender-inclusive governance mechanism, including designating a lead coordinating ministry, to progress national leadership on identifying and planning for displacement solutions								
			IOM	☑	☑	☑	☑	☑	☑	☑
		Activity 2 Undertake departmental review and analysis in collaboration with government, to establish institutional hub to coordinate activities in this area, and assess sustainability measures								
			IOM	☑	☑	☑	☑	☐	☐	☐
	1.2 Community, civil society and customary leaders are gender-balanced, engaged, consulted and trained to inform government and community decisions and processes.									
		Activity 1 Convene forum/s and/or consultation sessions to ensure inclusive representation in national conversations on displacement and durable solutions from IDPs or at-risk communities, and other vulnerable or minority groups								
			IOM	☑	☑	☑	☑	☑	☑	☑
		Activity 2 Undertake provincial, area council and community-based awareness-building and consultation to inform the development of durable solutions guidelines in a gender-inclusive manner.								
			IOM	☐	☐	☑	☑	☑	☑	☐
	1.3 Displacement Solutions Roadmap developed for priority location/s and/or population/s and fiscal and legislative options are outlined.									
		Activity 1 Consult at the provincial, area council and community levels to consultation to confirm the interest of priority locations in pilot project/s.								
			IOM	☐	☐	☑	☑	☐	☐	☐
		Activity 2 Support the government to design a Roadmap for Durable Solutions Pathways for the selected displacement issue in priority location/s or population/s, including potential interventions.								
			IOM	☐	☐	☑	☑	☐	☐	☐
		Activity 3 Develop a joint financing strategy with relevant government stakeholders and partners, embedded in the roadmap.								
			IOM	☐	☐	☑	☑	☑	☐	☐
		Activity 4 Undertake legislative analysis for durable solutions pathways (e.g. land acquisition pathways or other required analyses) and outline options or potentially required amendments for GoV to consider in decision-making.								
			IOM	☐	☐	☑	☑	☑	☑	☐

Outcome	Output	Activity	Implementing Agent	Time Frame						
				2024				2025		
				1	2	3	4	1	2	3
		Activity 5 Convene an awareness session on the risk and conflict screening process for the Displacement Solutions Roadmap.								
			IOM	☐	☐	☑	☑	☐	☐	☐
	1.4 Rights & culture-centered guidelines and safeguards for durable solutions (return and/or local integration and/or resettlement / relocation) are developed and inform implementation of durable solutions planning and interventions.									
		Activity 1 Develop, in consultation with government, guidelines for preferred durable solution pathway/s with gender-sensitive manner.								
			IOM	☐	☐	☐	☑	☑	☑	☐
		Activity 2 Outline culturally-appropriate, gender sensitive approaches and pathways utilising holistic perspectives, indigenous customary networks and systems, traditional land management and negotiation pathways and conflict resolution processes								
			IOM	☐	☐	☐	☑	☑	☑	☐
Output 2. Government has a sound evidence base and displacement data collection system with which to make informed decisions to find solutions to displacement and mitigate risks of future displacement.										
	2.1 Develop profile of historical, current and future climate and disaster-induced displacement types, locations and lessons learned across Vanuatu, considering slow and rapid-onset hazards.									
		Activity 1 Develop data model to facilitate forecasting and predictive analytics to capture future climate displacement and mobility patterns forecast (modelling + qualitative stress test) over the short-, medium- and long-term								
			UNDP	☑	☑	☑	☑	☐	☐	☐
		Activity 2 Carry out an Inclusive analysis of the potential losses and damages from climate change-driven displacement and projected impacts of climate mobility across socio-economic and non-economic variables								
			UNDP	☐	☐	☑	☑	☑	☐	☐
	2.2 Displacement data collection systems established and integrated with government data systems for development planning (population, demographics, risks/vulnerability indicators)									
		Activity 1 Develop a strategy for displacement data integration in national data management systems, informed by technical work to ensure the interoperability of displacement data sources and tracking with other government systems								
			UNDP	☑	☑	☑	☐	☐	☐	☐
		Activity 2 Implement displacement data ingtegration strategy								
			UNDP	☐	☐	☐	☑	☑	☑	☐
		Activity 3 Activity 3 Develop systems for decentralised data collection through capacity building with area adminstrators and build capacities for data collection								
			UNDP	☐	☐	☐	☑	☑	☑	☐
Output 3 Local-level governance and planning mechanisms on solutions to displacement are established, with systematic and meaningful engagement of civil society and affected communities										
	3.1 Local authorities are capacitated in durable solutions planning with gender-inclusive manner in areas of origin/return to prevent repeat disaster displacement.									
		Activity 1 Develop required tools and related training for implementation of durable solution guidelines and ensure integration of processes and tools into decentralised planning system with gender-inclusive manner.								
			IOM	☐	☐	☐	☐	☐	☑	☑
		Activity 2 Adapt integrated tools for targeted vulnerability, gender mainstreaming, risk reduction and adaptation planning to support durable solutions planning.								
			IOM	☐	☐	☐	☐	☐	☑	☑
		Activity 2 Adapt integrated tools for targeted vulnerability, gender mainstreaming, risk reduction and adaptation planning to support durable solutions planning.								
			UNDP	☐	☐	☐	☐	☐	☑	☑
		Activity 3 Undertake targeted capacity building and training for local authorities on the operationalisation of durable solutions guidelines, as well as risk reduction and adapation planning for local authorities								
			IOM	☐	☐	☐	☐	☐	☑	☑
		Activity 3 Undertake targeted capacity building and training for local authorities on the operationalisation of durable solutions guidelines, as well as risk reduction and adapation planning for local authorities								
			UNDP	☐	☐	☐	☐	☐	☑	☑
	3.2 Support local governments to pilot gender-sensitive durable solutions guidelines and interventions and improve implementation practice.									
		Activity 1 Support local authorities to pilot operationalisation of guidelines (or part of) in collaboration with community/ies and to assist them in community-based assessments and planning to identify preferred durable solutions pathways								
			IOM	☐	☐	☐	☐	☐	☑	☑
