## II. PURPOSE

*[To be completed in cooperation with UNDP Programme Analyst]*

### **1. Main objectives of the project:** *[as per the approved UNDP Country Programme Document and Country Programme Action Plan and/or project document]*

The overall objective of the project to contribute to sustainable livelihoods improvement and food security through the development of irrigated agriculture and the promotion of more sustainable management of corresponding watershed resources in the selected communities of Bolikhan and Viengthong Districts of Bolikhamxay Province.

### **2. How the project relates to United Nations Development Assistance Framework (UNDAF)?**

The project objectives and activities fully comply with UNDP's policies and strategies, specifically in the following key areas:

- **MDG – Goal 1** (Eradication of poverty and hunger) and **MDG Goal 7: Promote Environmental Sustainability:** the project is in line with the efforts to reduce poverty and hunger and will contribute the better management of natural resources supporting local agricultural production systems and livelihoods
- **UNDAF/CPD Outcome 1:** By 2015, the government ensures sustainable natural resources management through improved governance and community participation
- **UNDAF/CPD Output 7.3:** Communities are more engaged in the management of natural resources

### **3. How the project aims to support national development goals including the Millennium Development Goals (MDGs) and/or National Poverty Eradication Programme (NPEP)?**

The project objectives and activities fully comply with national policies and strategies, specifically in the following key areas:

-The **National Growth and Poverty Eradication Strategy (NGPES)** provides strategic guidance for the Government of Lao PDR (GoL) to secure future economic growth and achieve poverty eradication in a holistic and comprehensive manner. The Strategy is an operational guide toward for enhancing growth and development and reducing poverty, with the goal to eradicate poverty by 2020. The NGPES and other national policies identify household food insecurity as the most critical challenge to overcome in order to ensure the most basic level of secure and sustainable livelihoods for the majority of the Lao rural population. Widespread food insecurity coupled with high levels of acute and chronic malnutrition impedes social, human and economic development and contributes significantly to poverty. Food insecurity is defined by inadequate availability, access, utilization and stability. Shortfalls in these areas are commonplace and are most pronounced amongst farming households in rural areas. Many communities lack adequate coping strategies for the food-deficits and associated health problems that persist amongst large sections of the population. Food security concerns are entwined with issues throughout the CCA and are very closely tied to the topics discussed in the Crosscutting Development Issues chapter (particularly resettlement and UXO contamination). Food security is recognised as a critical national development challenge by the GoL in the NGPES. Tackling food insecurity will also contribute to achieving Millennium Development Goal (MDG) 1, Target 2 - halving the proportion of Lao people who suffer from hunger by 2015.

-The recently issued **7<sup>th</sup> NSEDP 2011–2015** is, as part of the long term goal of the country, to implement its policy of national development, achieve economic growth of at least 8% annually, reduce poverty, achieve the Millennium Development Goals by 2015 and construct basic infrastructure for industrialisation and modernisation in the times to come. The 7<sup>th</sup> NSEDP states the direction for Agriculture and Forestry sector "Systematically develop all aspects of agriculture and forestry in line with industrialisation and modernisation priorities in areas that have favourable conditions; ensure food security; promote commodity production for domestic use and export; improve productivity and enhance end-product quality".

The **Irrigated Agriculture Strategy** which set up a target in irrigation sector as "By 2015 the irrigated area in the dry season to be increased to 500 thousand hectares including 300 thousand hectares for dry season irrigated rice; wet season irrigated areas to be expanded to 9.5 hundred thousand hectares" through a measure "Promote irrigated farming systems to support production activities and improve productivity"

**3. List main three challenges (at most, if any) experienced during implementation. Note any steps already taken to solve problems. [There may be problems that are generic and not related to any specific output, or that apply to all of them. If the issues have been covered through the table in question 1 above, this section may be left empty.]**

1. Recruitment of both professional and supporting staff for the project took longer time than anticipated due to shortage of qualified technical specialists in the local labour market and competition from other development projects. To solve this problem the project decided to extend the application deadlines, to place the job advertisement in more local newspapers and to actively search for potential candidates.

**4. Recommendations and proposed actions [Actions on any matter related to outcome, progress of outputs, and/or partnerships. Corrective measures. Responsibilities.]**

**5. Describe briefly key lessons learned during the quarter: [Lessons learned from addressing implementation constraints and knowledge gained from evaluations, technical reviews, and studies that have taken place in the course of the year]**

1. Strong technical and managerial support to the Project Office is critical for the start-up

activities for the project implementation.

## 6. Rating on progress towards results

6.1 Overall rating by Implementing Partner PAFO (Tick one category):  HS  S  MS  
 MU  U

Please justify your rating and address the following points in your comments. Please keep word count between 500 words minimum and 1200 words maximum.

1. Explain why you gave a specific rating.
2. Summarize annual progress and address timeliness of project output/activity completion in relation to quarterly work plan.
3. Outline the general status of project expenditures in relation to annual budgets, the effectiveness of project management units in guiding project implementation, the responsiveness of the project board in overseeing project implementation.
4. Outline action plan to address projects with IP rating of HU, U or MU.

### Rating Definitions

Highly Satisfactory (HS)	The project was managed in very effective and efficient manner in accordance with the work plan, schedule and budget. The project can be presented as "good practice".
Satisfactory (S)	The project was managed in a reasonably effective and efficient manner, largely in accordance with the work plan, schedule and budget.
Moderately Satisfactory (MS)	The project was managed in an acceptable manner but not fully in accordance with the work plan, schedule and budget.
Moderately Unsatisfactory (MU)	The project was managed in a marginally effective and responsive manner but not fully in accordance with the work plan, schedule and budget.
Unsatisfactory (U)	The project was managed in a less than effective manner due to internal or external factors and not in accordance with the work plan, schedule and budget.
Highly Unsatisfactory (HU)	The project was managed in an ineffective manner particularly due to internal factors and clearly not in accordance with the work plan, schedule and budget.

**REASONS:** The project progress is at a modest level because the project has completed the establishment of the Project Board and management team, undertaken the procurement of office equipment. The recruitment process for International and national supporting staff has been in progress. Some technical activities have been undertaken with noticeable progress.

#### IV. ADDITIONAL ACTIVITIES WHICH CONTRIBUTE TO THE OUTCOME AND/OR OUTPUTS

1. Provide information about any activities undertaken by the project that were NOT envisaged in the work plan but which contributed to the outcome and/or outputs? E.g. advocacy and policy dialogue.

#### V. FUTURE WORK PLAN

1. What are the priority actions planned for the following quarter to overcome constraints, build on achievements and partnership, and use of the lessons learned during the previous quarter?

**Planned Technical Activities:**

- 1) Watershed Management: Complete recruitment of a National Land use Consultant and initiate consultations for participatory land use planning process for developing of watershed management plan
- 2) Irrigation Rehabilitation: Initiate the bidding process for the construction/rehabilitation of the planned schemes and the mobilization and capacity building of Water User Groups.
- 3) Other activities such as agricultural extension and fisheries co-management will be initiated in Q1 2013, when the entire project management team (including the UNV) is on board.

**Planned Management Activities:**

- 1) Complete the planned recruitment of the following positions for SIRA Project Office:

- I. One National Irrigation Specialist
  - II. One Assistant Project Manager
  - III. One Project Accountant and Administration Officer
  - IV. One UNV
  - V. One National Land Use Consultant
  - VI. One National Fisheries Management Consultant
- 2) Organize the Project Inception Workshop
  - 3) Participate in UNDP Project Management and Orientation Training Workshop for Project management team and support staff
  - 4) Rehabilitate the Project Office at PAFO Bolikhamxay
  - 5) Complete planned procurement activities for office equipment and vehicles
  - 6) Prepare and submit the Q4 Project Progress Report and Annual Progress Report for 2012
  - 7) Revise AWP 2012 and prepare AWP and budget for 2013
  - 8) Conduct Project Monthly meetings and field visits
  - 9) Organize Project Annual Meeting/Board Meeting

2. List major adjustments in the strategies, targets or key outcomes and outputs planned.

No adjustment

3. Estimated total budget required for the following quarter:
