**PROJECT DOCUMENT***[Bangladesh]***Budget Revision D**

**Project Title:** Enhancing adaptive capacities of coastal communities, especially women, to cope with climate change induced salinity

**Project Number:** 00110816, Award Id 00112175

**Implementing Partner:** Ministry of Women and Children Affairs (MoWCA)

**\*Start Date:** 01 January 2019 **End Date:** 31 December 2024 **PAC Meeting date:** 25 October 2018

**Brief Description**

*The proposed project will empower target communities, especially women, as 'change-agents' to plan, implement, and manage resilient livelihoods and drinking water solutions. The project will enable those communities to address climate change risks on livelihood and drinking water security to promote synergistic co-benefits. It will enhance the adaptive capacities of these communities in the face of worsening impacts of climate-change induced salinity on their freshwater resources which in turn adversely affect livelihood and drinking water requirements. The project contributes towards GoB's achievement of priorities outlined in the Nationally Determined Contributions (NDC) and its climate change strategies. The project objective speaks to the top five key near-term areas of intervention identified by the INDC to address adverse impacts of climate change including: 1) Food security, livelihood and health protection (incl. water security); 2) Comprehensive disaster management, 3) Coastal Zone Management, including Salinity Intrusion control, 4) Flood Control and Erosion protection, 5) Building Climate Resilient Infrastructure. Directly aligned to six of the fourteen broad adaptation actions*

**Contributing Outcome (CPD):**

*Enhance effective management of the natural and man-made environment focusing on improved sustainability and increased resilience of vulnerable individuals and groups*

Indicative Output(s) with gender marker<sup>2</sup>: GEN3

CPD Output 3.1: Government institutions have improved capacities, and institutional and legal frameworks to respond to and ensure resilient recovery from earthquakes, weather extremes, and environmental emergencies.

CPD Output 3.2: The Government has the capacity to set up regulatory and to implement a range of pro-poor, resilience-focused green economic initiatives.

### Guideline

- Use the table above. Expand it, if needed. Info in *Italic* is shown as an example.
- Add all field monitoring visits **planned in 2021. Plan is tentative due to the COVID-19 situation.**
- **Add only M&E-related field visits.** DO NOT ADD any other field visit for attending a workshop/meeting, which is not relevant to M&E.
- M&E-related field visits include but are not limited to: **progress monitoring, results/data verification, data quality check, survey preparation, field testing of survey instruments, enumerator’s training, and data collection monitoring.**
- **Describe a methodology briefly**, if the purpose of field visit is progress monitoring or results/data verification, or data quality check. It cannot be a rigorous method due to limited time of a field visit, but a rapid method should be identified before going to the field.
