At least four criteria are rated Exemplary, and all criteria are rated High or Exemplary.	All criteria are rated Satisfactory or higher, and at least four criteria are rated High or Exemplary.	At least six criteria are rated Satisfactory or higher, and only one may be rated Needs Improvement. The Principled criterion must be rated Satisfactory or above.	At least three criteria are rated Satisfactory or higher, and only four criteria may be rated Needs Improvement.	One or more criteria are rated Inadequate, or five or more criteria are rated Needs Improvement.

## DECISION

- **APPROVE** – the project is of sufficient quality to be approved in its current form. Any management actions must be addressed in a timely manner.
- **APPROVE WITH QUALIFICATIONS** – the project has issues that must be addressed before the project document can be approved. Any management actions must be addressed in a timely manner.
- **DISAPPROVE** – the project has significant issues that should prevent the project from being approved as drafted.

## RATING CRITERIA

For all questions, select the option that best reflects the project

## STRATEGIC

1. Does the project specify how it will contribute to higher level change through linkage to the programme's Theory of Change?

- **3:** The project is clearly linked to the programme's theory of change. It has an explicit change pathway that explains how the project will contribute to outcome level change and why the project's strategy will likely lead to this change. This analysis is backed by credible evidence of what works effectively in this context and includes assumptions and risks.
- **2:** The project is clearly linked to the programme's theory of change. It has a change pathway that explains how the project will contribute to outcome-level change and why the project strategy will likely lead to this change.
- **1:** The project document may describe in generic terms how the project will contribute to development results, without an explicit link to the programme's theory of change.

*\*Note: Projects not contributing to a programme must have a project-specific Theory of Change. See alternative question under the lightbulb for these cases.*

### Evidence:

The project does not apply a standard ToC approach, but nonetheless puts forth a cause and effect relationship on how it will bring about positive change at the impact and outcome level.

The project will apply a systemic approach to understanding and addressing sustainable recovery from COVID, including making a stronger investment case for diverse sources of financing. The high uncertainty of the current crisis and its effects coupled with the pressures felt by local government, call for distribution of risk through the application of portfolio logic. UNDP is already applying portfolio investment logic and methodology in its work: addressing depopulation in Serbia, rethinking post-tourism economies in Thailand, accelerating governance portfolio in Malawi, and supporting seven countries around the world in the development of portfolios to address issues as diverse as future of work and COVID-19 recovery.

Here the project applies a two-pronged approach:

<sup>1</sup> The three development settings in UNDP's 2018-2021 Strategic Plan are: a) Eradicate poverty in all its forms and dimensions; b) Accelerate structural transformations for sustainable development; and c) Build resilience to shocks and crises

<sup>2</sup> The six Signature Solutions of UNDP's 2018-2021 Strategic Plan are: a) Keeping people out of poverty; b) Strengthen effective, inclusive and accountable governance; c) Enhance national prevention and recovery capacities for resilient societies; d) Promote nature based solutions for a sustainable planet; e) Close the energy gap; and f) Strengthen gender equality and the empowerment of women and girls.
