Brief Description

The objective of the project is to improve implementation of MEAs in Serbia by strengthening consultative processes and integrating MEA provisions into high-priority policies and programs at national and municipal levels. The project will strengthen participation in MEAs through targeted research, a comprehensive overview of MEA issues and activities, and ongoing input from civil society. It will also enable national and local government units to include global environmental considerations in selected reports and strategies. Finally, it will develop capacity in key target groups (Members of Parliament, youth, and university and mid-career students) to understand and participate in activities that benefit the global environment.

In 2022, the focus of the project will be on continuation of capacity building of key target groups for environmental management and it will include further development of tools for information sharing.

Agreed by Ministry of Environmental Protection
