**Project Title: Energy and waste solutions - Sustainable Recovery of Lebanon from the Beirut Explosion – Activity 9**

**Project number: 00077650 – Output number 00090039**

**Implementing Partner: UNDP (DIM)**

**Start Date: March 2021 End Date: 31 July 2022**

### Brief Description

The Beirut Port explosions occurred as Lebanon had been in the midst of a multi-faceted crisis since October 2019, with an accelerating economic and financial crisis that has since led to increasing levels of poverty and food insecurity, further compounding structural gender inequalities and needs among the Lebanese and non-Lebanese communities alike, including the significant refugee populations. In addition, increasing COVID-19 transmission is straining the country's health systems while also damaging country's tourism and service sector due to the sequence of lockdown measures.

Within this context, the project will support the sustainable recovery of Lebanon after the massive explosion occurred on August 4, 2020 amidst the economic crisis and COVID-19 pandemic. More specifically, the project will support the country's recovery effort from the devastating explosion via 1) disaster risk management coordination and support in relation to the blast as well as COVID-19 pandemic, and 2) disaster waste management, specifically on e-waste.
