Closure Stage Quality Assurance Report

Form Status: Approved	
Overall Rating:	Highly Satisfactory
Decision:	
Portfolio/Project Number:	00100484
Portfolio/Project Title:	Support for the cultural heritage monuments V
Portfolio/Project Date:	2016-11-18 / 2020-05-31

Strategic

Quality Rating: Exemplary

- 1. Did the project pro-actively identified changes to the external environment and incorporated them into the project strategy?
- 3: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives, assumptions were tested to determine if the project's strategy was valid. There is some evidence that the project board considered the implications, and documented the changes needed to the project in response. (all must be true)
- 2: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives. There is some evidence that the project board discussed this, but relevant changes did not fully integrate in the project. (both must be true)
- 1: The project team considered relevant changes in the external environment since implementation began, but there is no evidence that the project team considered these changes to the project as a result.

Evidence:

Changes in in the external political and local context were identified and discussed on a weekly basis duri ng Project Board meetings. Minutes of meetings wer e kept and all decisions recorded. Lessons learned c ollected during this and previous phases of the programme were utilised as strategic inputs for adjustmen ts to activities in this phase of the programme.

1	Annex14_PSCMeetingMinutes_4305_301 (ht tps://intranet.undp.org/apps/ProjectQA/QAFo rmDocuments/Annex14_PSCMeetingMinutes _4305_301.pdf)	nilgun.arif@undp.org	2/25/2020 2:32:00 PM

- 2. Was the project aligned with the thematic focus of the Strategic Plan?
- 3: The project responded to at least one of the development settings as specified in the Strategic Plan (SP) and adopted at least one Signature Solution .The project's RRF included all the relevant SP output indicators. (all must be true)
- ② 2: The project responded to at least one of the developments settings1 as specified in the Strategic Plan. The project's RRF included at least one SP output indicator, if relevant. (both must be true)
- 1: While the project may have responded to a partner's identified need, this need falls outside of the UNDP Strategic Plan. Also select this option if none of the relevant SP indicators are included in the RRF.

The project was aligned with SP outcome 5.6 - Mec hanisms are enabled for consensus-building around contested priorities, and address specific tensions, t hrough inclusive and peaceful processes. This contributed to resilience building and democratic govern ance in Cyprus by providing support to the Bi-communal Technical Committee on Cultural Heritage, a loc al bi-communal mechanism for mediation and consensus building around cultural heritage preservation, so that it is able to perform its core confidence-building functions.

Relevant Quality Rating: Satisfactory

- 3. Were the project's targeted groups systematically identified and engaged, with a priority focus on the discriminated and marginalized, to ensure the project remained relevant for them?
- 3: Systematic and structured feedback was collected over the project duration from a representative sample of beneficiaries, with a priority focus on the discriminated and marginalized, as part of the project's monitoring system. Representatives from the targeted groups were active members of the project's governance mechanism (i.e., the project board or equivalent) and there is credible evidence that their feedback informs project decision making. (all must be true)
- 2: Targeted groups were engaged in implementation and monitoring, with a priority focus on the discriminated and marginalized. Beneficiary feedback, which may be anecdotal, was collected regularly to ensure the project addressed local priorities. This information was used to inform project decision making. (all must be true to select this option)
- 1: Some beneficiary feedback may have been collected, but this information did not inform project decision making. This option should also be selected if no beneficiary feedback was collected
- Not Applicable

The selection of heritage sites ensured a broad geo graphical distribution across Cyprus and representa tion of targeted community faiths in Cyprus to ensur e diversity and inclusion. During the project implem entation consultation meetings were held in particular selected cultural heritage sites with the participation of local stakeholders including community members from rural areas and different faiths. Based on less ons from this phase of the project, subsequent phases include a specific community engagement output with specified activities to improve engagement of targeted groups.

File Name Modified By Modified On 1 Openday_4305_303 (https://intranet.undp.or g/apps/ProjectQA/QAFormDocuments/Open day_4305_303.pdf) nilgun.arif@undp.org 2/25/2020 2:34:00 PM

- 4. Did the project generate knowledge, and lessons learned (i.e., what has worked and what has not) and has this knowledge informed management decisions to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk?
- 3: Knowledge and lessons learned from internal or external sources (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned Workshops) backed by credible evidence from evaluation, corporate policies/strategies, analysis and monitoring were discussed in project board meetings and reflected in the minutes. There is clear evidence that changes were made to the project to ensure its continued relevance. (both must be true)
- ②: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true)
- 1: There is limited or no evidence that knowledge and lessons learned were collected by the project team. There is little or no evidence that this informed project decision making.

The implementation of this project was informed by knowledge and lessons learned from previous phas es of the programme. The knowledge and lesson lea rned from this phase of the programme has informe d the design of subsequent future phases of the programme including the need to strengthen the engag ement of communities of the project and to build cap acity of stakeholders in the maintenance and up kee p of the conserved cultural heritage sites.

- 5. Was the project sufficiently at scale, or is there potential to scale up in the future, to meaningfully contribute to development change?
- 3: There was credible evidence that the project reached sufficient number of beneficiaries (either directly through significant coverage of target groups, or indirectly, through policy change) to meaningfully contribute to development change.
- 2: While the project was not considered at scale, there are explicit plans in place to scale up the project in the future (e.g. by extending its coverage or using project results to advocate for policy change).
- 1: The project was not at scale, and there are no plans to scale up the project in the future.

Evidence:

During the project implementation 11 culture sites w ere conserved and the design for an additional 14 sit es were completed. As such the project reached the target beneficiaries. In addition, the project has been scaled up under subsequent phases. In order to rea ch with and engage more people phase 6 and 7 of t his project included a strategy to undertake a larger number of smaller projects with greater impact rathe r than medium sized projects.

Principled Quality Rating: Satisfactory

- 6. Were the project's measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produced the intended effect? If not, evidence-based adjustments and changes were made.
- 3: The project team gathered data and evidence through project monitoring on the relevance of the measures to address gender inequalities and empower women. Analysis of data and evidence were used to inform adjustments and changes, as appropriate. (both must be true)
- 2: The project team had some data and evidence on the relevance of the measures to address gender inequalities and empower women. There is evidence that at least some adjustments were made, as appropriate. (both must be true)
- 1: The project team had limited or no evidence on the relevance of measures to address gender inequalities and empowering women. No evidence of adjustments and/or changes made. This option should also be selected if the project has no measures to address gender inequalities and empower women relevant to the project results and activities.

Evidence:

Whilst the UNDP PMO has achieved parity amongst local staff, the construction sector tends to be male d ominated, whilst representatives from the local com munities and religious communities are also under r epresented by women. Throughout the implementati on period the project made efforts to address this iss ue by collecting gender aggregated data to measure the participation of women in completion ceremonies and community engagement events.

Management Response:

Based on lessons learnt from this phase of the project subsequent phases include specific activities which will target the participation of women in particular providing opportunities for local women and women's community groups/NGOs to design and organise a series of events that focus on creating opportunities for expanding the role of women in the preservation and protection of both tangible and intangible cultura I heritage. In addition there is a requirement to include a ratio of at least 50% of women as part of the technical teams implementing the conservation works.

- 7. Were social and environmental impacts and risks successfully managed and monitored?
- 3: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for Substantial and High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed for identified risks through consultative process and implemented, resourced, and monitored. Risks effectively managed or mitigated. If there is a substantive change to the project or change in context that affects risk levels, the SESP was updated to reflect these changes. (all must be true)
- 2: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for Substantial and High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed, implemented and monitored for identified risks. OR project was categorized as Low risk through the SESP.
- 1: Social and environmental risks were tracked in the risk log. For projects categorized as High, Substantial, or Moderate Risk, there was no evidence that social and environmental assessments completed and/or management plans or measures development, implemented or monitored. There are substantive changes to the project or changes in the context but SESP was not updated. (any may be true)

Social and environment risks assessment was prepared and risks were monitored throughout the implementation of the project

8. Were grievance mechanisms available to project-affected people and were grievances (if any) addressed to ensure any perceived harm was effectively mitigated?

- 3: Project-affected people actively informed of UNDP's Corporate Accountability Mechanism (SRM/SECU) and how to access it. If the project was categorized as High, Substantial, or Moderate Risk through the SESP, a project-level grievance mechanism was in place and project affected people informed. If grievances were received, they were effectively addressed in accordance with SRM Guidance. (all must be true)
- ②: Project-affected people informed of UNDP's Corporate Accountability Mechanism and how to access it. If the project was categorized as Substantial or High Risk through the SESP, a project -level grievance mechanism was in place and project affected people informed. If grievances were received, they were responded to but faced challenges in arriving at a resolution.
- 1: Project-affected people was not informed of UNDP's Corporate Accountability Mechanism. If grievances were received, they were not responded to. (any may be true)

All people affected by the project including partners and beneficiaries were informed about UNDPs corp orate accountability mechanism.

Management & Monitoring

Quality Rating: Highly Satisfactory

- 9. Was the project's M&E Plan adequately implemented?
- 3: The project had a comprehensive and costed M&E plan. Baselines, targets and milestones were fully populated. Progress data against indicators in the project's RRF was reported regularly using credible data sources and collected according to the frequency stated in the Plan, including sex disaggregated data as relevant. Any evaluations conducted, if relevant, fully meet decentralized evaluation standards, including gender UNEG standards. Lessons learned, included during evaluations and/or After-Action Reviews, were used to take corrective actions when necessary. (all must be true)
- 2: The project costed M&E Plan, and most baselines and targets were populated. Progress data against indicators in the project's RRF was collected on a regular basis, although there was may be some slippage in following the frequency stated in the Plan and data sources was not always reliable. Any evaluations conducted, if relevant, met most decentralized evaluation standards. Lessons learned were captured but were used to take corrective actions. (all must be true)
- 1: The project had M&E Plan, but costs were not clearly planned and budgeted for, or were unrealistic. Progress data was not regularly collected against the indicators in the project's RRF. Evaluations did not meet decentralized evaluation standards. Lessons learned were rarely captured and used. Select this option also if the project did not have an M&E plan.

Progress data was collected against the indicators in the project's RRF and reported regularly to donors a nd UNDP. Lessons Learned were captured and used in the development of future phases of the program me. No evaluation was carried out for this project as it was not a corporate requirement, however evaluations are planned for future phases of the project.

- 10. Was the project's governance mechanism (i.e., the project board or equivalent) function as intended?
- 3: The project's governance mechanism operated well, and was a model for other projects. It met in the agreed frequency stated in the project document and the minutes of the meetings were all on file. There was regular (at least annual) progress reporting to the project board or equivalent on results, risks and opportunities. It is clear that the project board explicitly reviewed and used evidence, including progress data, knowledge, lessons and evaluations, as the basis for informing management decisions (e.g., change in strategy, approach, work plan.) (all must be true to select this option)
- 2: The project's governance mechanism met in the agreed frequency and minutes of the meeting are on file. A project progress report was submitted to the project board or equivalent at least once per year, covering results, risks and opportunities. (both must be true to select this option)
- 1: The project's governance mechanism did not meet in the frequency stated in the project document over the past year and/or the project board or equivalent was not functioning as a decision-making body for the project as intended.

Evidence:

The project board met on a weekly basis and meetings were minuted. Annual progress reports were shared with donors, and included an analysis of the problems encountered and actions taken/proposed to overcome them based on data and accrued knowled ge. Work plans and activities were agreed upon and adjusted based on lessons learned and minuted at relevant project board meetings.

- 11. Were risks to the project adequately monitored and managed?
- 3: The project monitored risks every quarter and consulted with the key stakeholders, security advisors, to identify continuing and emerging risks to assess if the main assumptions remained valid. There is clear evidence that relevant management plans and mitigating measures were fully implemented to address each key project risk and were updated to reflect the latest risk assessment. (all must be true)
- ② 2: The project monitored risks every year, as evidenced by an updated risk log. Some updates were made to management plans and mitigation measures.
- 1: The risk log was not updated as required. There was may be some evidence that the project monitored risks that may affected the project's achievement of results, but there is no explicit evidence that management actions were taken to mitigate risks.

Risks were monitored on a regular basis, through the project board meetings. Mitigation measures including an analysis of the risks were discussed key stakeholders and minuted at relevant project board meetings.

14. Was there re	gular monitoring	and recording of	of cost efficiencies,	taking into account	the expected	quality of
results?						

- 3: There is evidence that the project regularly reviewed costs against relevant comparators (e.g., other projects or country offices) or industry benchmarks to ensure the project maximized results delivered with given resources. The project actively coordinated with other relevant ongoing projects and initiatives (UNDP or other) to ensure complementarity and sought efficiencies wherever possible (e.g. joint activities.) (both must be true)
- 2: The project monitored its own costs and gave anecdotal examples of cost efficiencies (e.g., spending less to get the same result,) but there was no systematic analysis of costs and no link to the expected quality of results delivered. The project coordinated activities with other projects to achieve cost efficiency gains.
- 1: There is little or no evidence that the project monitored its own costs and considered ways to save money beyond following standard procurement rules.

Project expenditure was monitored on a monthly bas is and financial reports detailing project expenditures were produced monthly and reported to the donor on an annual basis. Project costs were also reviewed in light of benchmarks and financial data gathered from previous phases of the project to ensure cost effectiveness.

- 16. Were there regular reviews of the work plan to ensure that the project was on track to achieve the desired results, and to inform course corrections if needed?
- 3: Quarterly progress data informed regular reviews of the project work plan to ensure that the activities implemented were most likely to achieve the desired results. There is evidence that data and lessons learned (including from evaluations /or After-Action Reviews) were used to inform course corrections, as needed. Any necessary budget revisions were made. (both must be true)
- 2: There was at least one review of the work plan per year with a view to assessing if project activities were on track to achieving the desired development results (i.e., outputs.) There may or may not be evidence that data or lessons learned were used to inform the review(s). Any necessary budget revisions have been made.
- 1: While the project team may have reviewed the work plan at least once over the past year to ensure outputs were delivered on time, no link was made to the delivery of desired development results. Select this option also if no review of the work plan by management took place.

Activities and progress towards towards results were reviewed through weekly project board meetings. Th is ensured that activities remained on track and informed any changes needed.

17. Were the targeted groups systematically identified and engaged, prioritizing the marginalized and excluded, to ensure results were achieved as expected?

0	3: The project targeted specific groups and/or geographic areas, identified by using credible data sources on
	their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area
	of work. There is clear evidence that the targeted groups were reached as intended. The project engaged
	regularly with targeted groups over the past year to assess whether they benefited as expected and
	adjustments were made if necessary, to refine targeting. (all must be true)

- ②: The project targeted specific groups and/or geographic areas, based on some evidence of their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. Some evidence is provided to confirm that project beneficiaries are members of the targeted groups. There was some engagement with beneficiaries in the past year to assess whether they were benefiting as expected. (all must be true)
- 1: The project did not report on specific targeted groups. There is no evidence to confirm that project beneficiaries are populations have capacity needs or are deprived and/or excluded from development opportunities relevant to the project area of work. There is some engagement with beneficiaries to assess whether they benefited as expected, but it was limited or did not occurred in the past year.
- Not Applicable

The project targeted all community faiths in Cyprus to ensure diversity and inclusion. During the project implementation assessment meetings were held wit h community members in villages and towns where cultural heritage sites were being restored. In addition target groups were engaged in completion ceremonies and open days.

Sustainability & National Ownership Quality Rating: Exemplary

18. Were stakeholders and national partners fully engaged in the decision-making, implementation and monitoring of the project?

- 3: Only national systems (i.e., procurement, monitoring, evaluation, etc.) were used to fully implement and monitor the project. All relevant stakeholders and partners were fully and actively engaged in the process, playing a lead role in project decision-making, implementation and monitoring. (both must be true)
- 2: National systems (i.e., procurement, monitoring, evaluation, etc.) were used to implement and monitor the project (such as country office support or project systems) were also used, if necessary. All relevant stakeholders and partners were actively engaged in the process, playing an active role in project decision-making, implementation and monitoring. (both must be true)
- 1: There was relatively limited or no engagement with national stakeholders and partners in the decision-making, implementation and/or monitoring of the project.
- Not Applicable

The Technical Committee on Cultural Heritage (TCC H) which is made of representatives from both communities and appointed by the leaders of the Greek Cypriot and Turkish Cypriot communities as the key national partners, were fully involved in the impleme ntation of the project through weekly project board meetings and site monitoring visits and played a leading role in decision making and monitoring. In addition, the advisory board to the TCCH as key stockhold ers in the project, also undertook regular monitoring visits.

- adjustments made during implementation. (both must be true)
- 2: There was a review of the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan.
- 1: The project may have had a sustainability plan but there was no review of this strategy after it was developed. Also select this option if the project did not have a sustainability strategy.

Throughout the implementation period of this and previous phases of the project UNDP worked very closely with the Technical Committee on Cultural Heritage and its Advisory Board to establish a modus operandi that improves horizontal flows of communications between different stakeholders and facilitate decision taking. As such the governance structure is the result of a five-year-long capacity building process undertaken by UNDP that has resulted in better main streamed communications, more efficient and effective structured participation of local partners, and increased local ownership of all projects and activities. In accordance with this governance structure the conserved sites are handed to the TCCH as part of the phase out plan

QA Summary/Final Project Board Comments

The project was completed on time and within budget and achieved the expected results. The project has since bee n scaled through two additional phases - Cultural Heritage phase 6 and phase 7. Lessons learned and knowledge ac quired from implementation of this project has been utilised with the design of the subsequent stages of the project.
