Closure Stage Quality Assurance Report

Form Status: Approved			
Overall Rating:	Highly Satisfactory		
Decision:			
Portfolio/Project Number:	00109145		
Portfolio/Project Title:	Readiness and Preparatory Support		
Portfolio/Project Date:	2018-02-27 / 2019-08-27		

Strategic

Quality Rating: Exemplary

1. Did the project pro-actively identified changes to the external environment and incorporated them into the project strategy?

- ③ 3: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives, assumptions were tested to determine if the project's strategy was valid. There is some evidence that the project board considered the implications, and documented the changes needed to the project in response. (all must be true)
- 2: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives. There is some evidence that the project board discussed this, but relevant changes did not fully integrate in the project. (both must be true)
- 1: The project team considered relevant changes in the external environment since implementation began, but there is no evidence that the project team considered these changes to the project as a result.

Evidence:

A country portfolio was prepared through the prioritiz ation process by matching project impacts with coun try policy and objectives. in the field of environmenta I protection and climate change combat

2	GCFReadinessforAzerbaijanPRODOC_SIGN ED_4692_301 (https://intranet.undp.org/apps /ProjectQA/QAFormDocuments/GCFReadine ssforAzerbaijanPRODOC_SIGNED_4692_30 1.pdf)	chingiz.mammadov@undp.org	2/28/2020 10:15:00 AM

2. Was the project aligned with the thematic focus of the Strategic Plan?

- ③ 3: The project responded to at least one of the development settings as specified in the Strategic Plan (SP) and adopted at least one Signature Solution .The project's RRF included all the relevant SP output indicators. (all must be true)
- 2: The project responded to at least one of the developments settings1 as specified in the Strategic Plan. The project's RRF included at least one SP output indicator, if relevant. (both must be true)
- 1: While the project may have responded to a partner's identified need, this need falls outside of the UNDP Strategic Plan. Also select this option if none of the relevant SP indicators are included in the RRF.

The GCF Readiness project is in line with UNDP Str ategic Plan Output 1.4: "Scaled up action on climate change adaptation and mitigation across sectors tha t are funded and implemented".

The Readiness Project's Output is also in line with UNDP (SIX) Signature Solutions as

-ENVIRONMENT: nature-based solutions for develo pment

-Clean, affordable ENERGY

-Keeping people out of POVERTY

-Women's empowerment and GENDER equality

that are integrated responses to development again st which UNDP align resources and expertise, to ma ke a real impact.

Relevant

Quality Rating: Exemplary

3. Were the project's targeted groups systematically identified and engaged, with a priority focus on the discriminated and marginalized, to ensure the project remained relevant for them?

- 3: Systematic and structured feedback was collected over the project duration from a representative sample of beneficiaries, with a priority focus on the discriminated and marginalized, as part of the project's monitoring system. Representatives from the targeted groups were active members of the project's governance mechanism (i.e., the project board or equivalent) and there is credible evidence that their feedback informs project decision making. (all must be true)
- 2: Targeted groups were engaged in implementation and monitoring, with a priority focus on the discriminated and marginalized. Beneficiary feedback, which may be anecdotal, was collected regularly to ensure the project addressed local priorities. This information was used to inform project decision making. (all must be true to select this option)
- 1: Some beneficiary feedback may have been collected, but this information did not inform project decision making. This option should also be selected if no beneficiary feedback was collected
- Not Applicable

The Project was purely about preparing the office of the NDA to work with the GCF. Though, ultimately, th e project's successful implementation at the end ma y result in a better climate policy, by default at this st age there could not be marginalized or disenfranchis ed groups. Therefore, N/A option was selected.

#	File Name	Modified By	Modified On
No	documents available.		

4. Did the project generate knowledge, and lessons learned (i.e., what has worked and what has not) and has this knowledge informed management decisions to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk?

- S: Knowledge and lessons learned from internal or external sources (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned Workshops) backed by credible evidence from evaluation, corporate policies/strategies, analysis and monitoring were discussed in project board meetings and reflected in the minutes. There is clear evidence that changes were made to the project to ensure its continued relevance. (both must be true)
- 2: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true)
- 1: There is limited or no evidence that knowledge and lessons learned were collected by the project team.
 There is little or no evidence that this informed project decision making.

Evidence:

- Involvement of stakeholders in the project from first days can lead to more stakeholders involvemen t;

- Awareness-raising in several regions outside th e capital may be helpful;
- Close cooperation with the NGO Council for mo re active participation of NGOs;

- Although project initiators submit concept propo sals at the conceptual level, they have limited opport unities to submit full project proposals in accordance with the GCF procedures

1	Reportonfinalprojectactivites4692_304 (http s://intranet.undp.org/apps/ProjectQA/QAFor mDocuments/Reportonfinalprojectactivites4 692_304.docx)	chingiz.mammadov@undp.org	2/28/2020 9:08:00 AM

5. Was the project sufficiently at scale, or is there potential to scale up in the future, to meaningfully contribute to development change?

- ③ 3: There was credible evidence that the project reached sufficient number of beneficiaries (either directly through significant coverage of target groups, or indirectly, through policy change) to meaningfully contribute to development change.
- 2: While the project was not considered at scale, there are explicit plans in place to scale up the project in the future (e.g. by extending its coverage or using project results to advocate for policy change).
- 1: The project was not at scale, and there are no plans to scale up the project in the future.

Evidence:

Stakeholders dealing with climate change, adaptatio n and mitigation issues were identified and listed. Fo r this, the existing institutional situation in the countr y related to climate change, legislation, potential ada ptation and mitigation measures against climate cha nge, and a 35% intended nationally determined cont ributions for 2030, etc. were evaluated in detail, and consequently, the following bodies were included in t he list of government shareholders: Ministry of Econ omy, Ministry of Agriculture, Ministry of Energy, Mini stry of Health, Ministry of Emergency Situations, Min istry of Communication, Transport and High Technol ogies, Ministry of Finance, State Statistics Committe e, State Committee for Family, Women and Child Aff airs, State Tourism Agency, State Agency of Azerbaij an Automobile Roads, Baku Transport Agency, Stat e Agency for Alternative and Renewable Energy So urces, Baku City Executive Power, Azerbaijan Natio nal Academy of Sciences, State Oil Company, Azerb aijan Airlines CJSC, Azerbaijan Caspian Shipping C JSC, Azerbaijan Railways CJSC, Azerbaijan Land R eclamation and Water Management OJSC, "Azeristil iktechizat" OJSC, "Azerishig" OJSC, "Azerenergy" O JSC, "Tamiz Shahar" OJSC and others.

6. Were the project's measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produced the intended effect? If not, evidence-based adjustments and changes were made.

Quality Rating: Satisfactory

③ 3: The project team gathered data and evidence through project monitoring on the relevance of the measures to address gender inequalities and empower women. Analysis of data and evidence were used to inform adjustments and changes, as appropriate. (both must be true)

- 2: The project team had some data and evidence on the relevance of the measures to address gender inequalities and empower women. There is evidence that at least some adjustments were made, as appropriate. (both must be true)
- 1: The project team had limited or no evidence on the relevance of measures to address gender inequalities and empowering women. No evidence of adjustments and/or changes made. This option should also be selected if the project has no measures to address gender inequalities and empower women relevant to the project results and activities.

Evidence:

Principled

Gender equality was mainstreamed into the entire pr oject cycle by the Project Gender Action Plan to enh ance the efficacy of the readiness and preparatory s upport for Azerbaijan to ensure that all activities are gender-responsive and co-benefits of women and m en are obtained. Gender mainstreaming is central to the Green Climate Fund's (GCF) objectives and guid ing principles. Engaging women and men of all age s as stakeholders in the design, development, and i mplementation of strategies is crucial to the success of the project. In addition, all stakeholders have bee n educated about the GCF's Governing Instruments and related policies on gender.

7. Were social and environmental impacts and risks successfully managed and monitored?

- 3: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for Substantial and High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed for identified risks through consultative process and implemented, resourced, and monitored. Risks effectively managed or mitigated. If there is a substantive change to the project or change in context that affects risk levels, the SESP was updated to reflect these changes. (all must be true)
- Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for Substantial and High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed, implemented and monitored for identified risks. OR project was categorized as Low risk through the SESP.
- 1: Social and environmental risks were tracked in the risk log. For projects categorized as High, Substantial, or Moderate Risk, there was no evidence that social and environmental assessments completed and/or management plans or measures development, implemented or monitored. There are substantive changes to the project or changes in the context but SESP was not updated. (any may be true)

Appropriate analyses and assessments conducted where required:

- Assessed and identified the main needs for instituti onal and individual capacity building of the NDA, in what relates to roles and responsibilities as the NDA of the GCF

- Analyzed the existing frameworks for national moni toring and oversight of climate finance

- Analyzed ongoing and planned national policies an d programs, strategies in consultation with the gover nment, civil society, representatives of women's grou ps and minority communities, indigenous groups, int ernational donors and private sector

- Analyzed gaps, barriers, and opportunities to devel op a private sector engagement strategy

8. Were grievance mechanisms available to project-affected people and were grievances (if any) addressed to ensure any perceived harm was effectively mitigated?

- 3: Project-affected people actively informed of UNDP's Corporate Accountability Mechanism (SRM/SECU) and how to access it. If the project was categorized as High, Substantial, or Moderate Risk through the SESP, a project-level grievance mechanism was in place and project affected people informed. If grievances were received, they were effectively addressed in accordance with SRM Guidance. (all must be true)
- 2: Project-affected people informed of UNDP's Corporate Accountability Mechanism and how to access it. If the project was categorized as Substantial or High Risk through the SESP, a project -level grievance mechanism was in place and project affected people informed. If grievances were received, they were responded to but faced challenges in arriving at a resolution.
- Project-affected people was not informed of UNDP's Corporate Accountability Mechanism. If grievances were received, they were not responded to. (any may be true)

The affected people were informed of UNDP's Corp orate Accountability Mechanism and how to access i t.

Management	&	Monitoring
	-	

Quality Rating: Highly Satisfactory

9. Was the project's M&E Plan adequately implemented?

S: The project had a comprehensive and costed M&E plan. Baselines, targets and milestones were fully populated. Progress data against indicators in the project's RRF was reported regularly using credible data sources and collected according to the frequency stated in the Plan, including sex disaggregated data as relevant. Any evaluations conducted, if relevant, fully meet decentralized evaluation standards, including gender UNEG standards. Lessons learned, included during evaluations and/or After-Action Reviews, were used to take corrective actions when necessary. (all must be true)

- 2: The project costed M&E Plan, and most baselines and targets were populated. Progress data against indicators in the project's RRF was collected on a regular basis, although there was may be some slippage in following the frequency stated in the Plan and data sources was not always reliable. Any evaluations conducted, if relevant, met most decentralized evaluation standards. Lessons learned were captured but were used to take corrective actions. (all must be true)
- 1: The project had M&E Plan, but costs were not clearly planned and budgeted for, or were unrealistic. Progress data was not regularly collected against the indicators in the project's RRF. Evaluations did not meet decentralized evaluation standards. Lessons learned were rarely captured and used. Select this option also if the project did not have an M&E plan.

During the Project implementation, the Project Boar d has been created to exercise necessary oversight and guide the National Project Coordinator against p erformance objectives and targets set forth in the wo rk plan and inception workshop. The international an d national consultants worked under the supervision of UNDP Azerbaijan CO and were guided by the Nat ional Project Coordinator. The team of project expert s worked under the guidance and supervision of the office of the NDA and collaborated with all relevant n ational authorities, local communities, civil society or ganizations, academia, and businesses, thus, creati ng synergy and enhancing the overall performance of readiness activities.

File Name	Modified By	Modified On
-----------	-------------	-------------

10. Was the project's governance mechanism (i.e., the project board or equivalent) function as intended?

- S: The project's governance mechanism operated well, and was a model for other projects. It met in the agreed frequency stated in the project document and the minutes of the meetings were all on file. There was regular (at least annual) progress reporting to the project board or equivalent on results, risks and opportunities. It is clear that the project board explicitly reviewed and used evidence, including progress data, knowledge, lessons and evaluations, as the basis for informing management decisions (e.g., change in strategy, approach, work plan.) (all must be true to select this option)
- 2: The project's governance mechanism met in the agreed frequency and minutes of the meeting are on file. A project progress report was submitted to the project board or equivalent at least once per year, covering results, risks and opportunities. (both must be true to select this option)
- 1: The project's governance mechanism did not meet in the frequency stated in the project document over the past year and/or the project board or equivalent was not functioning as a decision-making body for the project as intended.

UNDP ensured the project monitoring and evaluatio n is done according to an agreed schedule, under th e guidance of the NDA and in line with UNDP and G CF requirements. On a quarterly basis (the middle of the month), the National Project Coordinator present ed to the Project Board a Report on the status of pro ject implementation. The report checked the implem entation of the activities against the targets set in the Log Frame

11. Were risks to the project adequately monitored and managed?

- 3: The project monitored risks every quarter and consulted with the key stakeholders, security advisors, to identify continuing and emerging risks to assess if the main assumptions remained valid. There is clear evidence that relevant management plans and mitigating measures were fully implemented to address each key project risk and were updated to reflect the latest risk assessment. (all must be true)
- 2: The project monitored risks every year, as evidenced by an updated risk log. Some updates were made to management plans and mitigation measures.
- 1: The risk log was not updated as required. There was may be some evidence that the project monitored risks that may affected the project's achievement of results, but there is no explicit evidence that management actions were taken to mitigate risks.

Evidence:

The project monitored risks on an annual basis. The project experienced an operational risk in the fir st-year of implementation. In April 2018 after the Pre sidential elections the Minister of MENR, who at the same time was the OFP for GEF has been replaced. After that, the NFP for the UNFCCC has been also r eplaced. It caused some delays with Project Implem entation. Due to very good working relations establis hed both with the office of NDA and the new NFP for UNFCCC, the Project Team was able to catch up an d compensate for the time initially lost.

13. Were project inputs procured and delivered on time to efficiently contribute to results?

- ③ 3: The project had a procurement plan and kept it updated. The project quarterly reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)
- 2: The project had updated procurement plan. The project annually reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)
- 1: The project did not have an updated procurement plan. The project team may or may not have reviewed operational bottlenecks to procuring inputs regularly, however management actions were not taken to address them.

The project coordinated activities with other projects to achieve cost efficiencies and following standard procurement rules.

15. Was the project on track and delivered its expected outputs?

Yes

O No

Evidence:

The project delivered a Country program Document - Strategic Framework with the Green Climate Fund (GCF), the National Designated Authority (NDA)/Foc al Point (FP).

An overarching objective of having a country progra m is fostering country ownership. To achieve this, co untry programs should be driven by a robust and incl usive engagement process that brings together key stakeholders across all levels of government, local a nd community-based institutions, the private sector, and civil society to put forward clear and country-ow ned priorities that GCF can support.

16. Were there regular reviews of the work plan to ensure that the project was on track to achieve the desired results, and to inform course corrections if needed?

- S: Quarterly progress data informed regular reviews of the project work plan to ensure that the activities implemented were most likely to achieve the desired results. There is evidence that data and lessons learned (including from evaluations /or After-Action Reviews) were used to inform course corrections, as needed. Any necessary budget revisions were made. (both must be true)
- 2: There was at least one review of the work plan per year with a view to assessing if project activities were on track to achieving the desired development results (i.e., outputs.) There may or may not be evidence that data or lessons learned were used to inform the review(s). Any necessary budget revisions have been made.
- 1: While the project team may have reviewed the work plan at least once over the past year to ensure outputs were delivered on time, no link was made to the delivery of desired development results. Select this option also if no review of the work plan by management took place.

UNDP ensured the project monitoring and evaluatio n is done according to an agreed schedule, under th e guidance of the NDA and in line with UNDP and G CF requirements. On a quarterly basis (in the middle of the month), the National Project Coordinator pres ented to the Project Board a Report on the status of project implementation. The report checked the impl ementation of the activities against the targets set in the Log Frame

17. Were the targeted groups systematically identified and engaged, prioritizing the marginalized and excluded, to ensure results were achieved as expected?

- 3: The project targeted specific groups and/or geographic areas, identified by using credible data sources on their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. There is clear evidence that the targeted groups were reached as intended. The project engaged regularly with targeted groups over the past year to assess whether they benefited as expected and adjustments were made if necessary, to refine targeting. (all must be true)
- 2: The project targeted specific groups and/or geographic areas, based on some evidence of their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work.
 Some evidence is provided to confirm that project beneficiaries are members of the targeted groups. There was some engagement with beneficiaries in the past year to assess whether they were benefiting as expected. (all must be true)
- 1: The project did not report on specific targeted groups. There is no evidence to confirm that project beneficiaries are populations have capacity needs or are deprived and/or excluded from development opportunities relevant to the project area of work. There is some engagement with beneficiaries to assess whether they benefited as expected, but it was limited or did not occurred in the past year.
- Not Applicable

The project was a policy-level project with the target being the Ministry of Ecology and Natural Resources and other agencies with the potential to work in the f uture with the GCF. By definition, there could not be marginalized or excluded groups included into the pr oject design, activities or target groups.

ŧ	File Name	Modified By	Modified On
10	documents available.		

Sustainability & National Ownership Quality Rating: Satisfactory 18. Were stakeholders and national partners fully engaged in the decision-making, implementation and monitoring of the project?

- 3: Only national systems (i.e., procurement, monitoring, evaluation, etc.) were used to fully implement and monitor the project. All relevant stakeholders and partners were fully and actively engaged in the process, playing a lead role in project decision-making, implementation and monitoring. (both must be true)
- S: National systems (i.e., procurement, monitoring, evaluation, etc.) were used to implement and monitor the project (such as country office support or project systems) were also used, if necessary. All relevant stakeholders and partners were actively engaged in the process, playing an active role in project decision-making, implementation and monitoring. (both must be true)
- 1: There was relatively limited or no engagement with national stakeholders and partners in the decisionmaking, implementation and/or monitoring of the project.
- O Not Applicable

As this project was a DIM Project, mainly UNDP rule s and regulations were used. However, the national system was also involved, as the Project Team alwa ys checked the compatibility of the applied rules with the national requirements. In particular, when prepar ing the no-objection procedures, the rules of the nati onal revision system has been applied. Also, the sta keholders dealing with climate change, adaptation a nd mitigation issues were identified and listed. For th is, the existing institutional situation in the country rel ated to climate change, legislation, potential adaptati on and mitigation measures against climate change, and a 35% intended nationally determined contributi ons for 2030, etc. were evaluated in detail, and cons equently, the following bodies were included in the li st of government shareholders: Ministry of Economy, Ministry of Agriculture, Ministry of Energy, Ministry of Health, Ministry of Emergency Situations, Ministry of Communication, Transport and High Technologies, Ministry of Finance, State Statistics Committee, Stat e Committee for Family, Women and Child Affairs, S tate Tourism Agency, State Agency of Azerbaijan Au tomobile Roads, Baku Transport Agency, State Age ncy for Alternative and Renewable Energy Sources, Baku City Executive Power, Azerbaijan National Aca demy of Sciences, State Oil Company, Azerbaijan Ai rlines CJSC, Azerbaijan Caspian Shipping CJSC, Az erbaijan Railways CJSC, Azerbaijan Land Reclamati on and Water Management OJSC, "Azeristiliktechiza t" OJSC, "Azerishig" OJSC, "Azerenergy" OJSC, "Ta miz Shahar" OJSC; PORT OF BAKU; Azerbaijan In dustry Cooperation and others.

19. Were there regular monitoring of changes in capacities and performance of institutions and systems relevant to the project, as needed, and were the implementation arrangements⁸ adjusted according to changes in partner capacities?

- 3: Changes in capacities and performance of national institutions and systems were assessed/monitored using clear indicators, rigorous methods of data collection and credible data sources including relevant HACT assurance activities. Implementation arrangements were formally reviewed and adjusted, if needed, in agreement with partners according to changes in partner capacities. (all must be true)
- 2: Aspects of changes in capacities and performance of relevant national institutions and systems were monitored by the project using indicators and reasonably credible data sources including relevant HACT assurance activities. Some adjustment was made to implementation arrangements if needed to reflect changes in partner capacities. (all must be true)
- 1: Some aspects of changes in capacities and performance of relevant national institutions and systems may have been monitored by the project, however changes to implementation arrangements have not been considered. Also select this option if changes in capacities and performance of relevant national institutions and systems have not been monitored by the project.

O Not Applicable

Evidence:

The changes in capacities and performance of relev ant national institutions and systems were monitored by the project . In particular, the Needs Assessment of the MENR as the NDA for the GCF was assessed in the beginning. Then, necessary training, worksho p, study tours and other capacity-building activities were organized. Though the evaluations conducted at the end of each training the changes in the capaci ty of the MENR staff and other involved agencies we re monitored.

20. Were the transition and phase-out arrangements were reviewed and adjusted according to progress (including financial commitment and capacity).

- S: The project's governance mechanism regularly reviewed the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan. The plan was implemented as planned by the end of the project, taking into account any adjustments made during implementation. (both must be true)
- 2: There was a review of the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan.
- 1: The project may have had a sustainability plan but there was no review of this strategy after it was developed. Also select this option if the project did not have a sustainability strategy.

the implementation procedure regularly reviewed the project's sustainability plan and transition arrangeme nts, to ensure the activities are on track on in meetin g the requirements set out by the plan. The project i mplemented according to the initial plan, however, th ere were necessary adjustments depending on the e merging needs, hroughout the project implementatio n. For example, the template for the CPD has been changed at the very end of the Project. Though, it pu t additional pressure on the Project Team, necessary changes were taken into account and made.
