

Annex [#]. Social and Environmental Screening Template

The completed template, which constitutes the Social and Environmental Screening Report, must be included as an annex to the Project Document. Please refer to the Social and Environmental Screening Procedure for guidance on how to answer the 6 questions.]

Project Information	
1. Project Title	<i>Expansion of capacities of the Airports Tivat and Podgorica through the construction of temporary facilities</i>
2. Project Number	00109385
3. Location (Global/Region/Country)	Montenegro

Part A. Integrating Overarching Principles to Strengthen Social and Environmental Sustainability

QUESTION 1: How Does the Project Integrate the Overarching Principles in order to Strengthen Social and Environmental Sustainability?

Briefly describe in the space below how the Project mainstreams the human-rights based approach

The objective of this Project is to expand the space facilities of the Podgorica and Tivat airports, with their modern equipment, aiming at creating all the necessary preconditions for a comfortable, secure and efficient movement of goods, people and airport related services. This intervention will reduce harmful impacts on human health and security and by increasing efficiency support facilitated sustainable development by increasing employment opportunities and decreasing GHG emissions.

The Universal Declaration of Human Rights proclaimed by the General Assembly, contains a number of articles that are closely linked to the scope of the proposed project. These articles and the manner in which the project will ensure that the human-rights based approached is mainstreamed in the project, are the following:

Article 3. "Everyone has the right to life, liberty and security of person".

The project contributes to the protection of human health and security as well as the environmental wellbeing by reducing the impacts caused by GHG emissions, and their harmful effects on population health.

Article 23 (2) "Everyone has the right to work, to free choice of employment, to just and favorable conditions of work and to protection against unemployment".

The project will secure significant improvement in mobility in a sustainable and secure manner, leading to improved movement of goods and people in and out of country, increasing in country generated employment opportunities as well as out of country possibilities.

Briefly describe in the space below how the Project is likely to improve gender equality and women's empowerment

authoritative sources and/or indigenous peoples or local communities?			any effects on protected area due to significant distance?
3.2 Would the Project pose potential risks to community health and safety due to the transport, storage, and use and/or disposal of hazardous or dangerous materials (e.g. explosives, fuel and other chemicals during construction and operation)?		Low	Current facilities are storing jet fuel and the storage is regularly resupplied. This procedure is in detailed prescribed international rules and procedures and followed by ground teams at airports.
3.3 Does the Project involve large-scale infrastructure development (e.g. dams, roads, buildings)?	I = 1 P = 1	Low	Project will focus on creation of new infrastructure. The size of the intervention could not be considered large scale and it is done in line with national and international regulated procedures.
3.4 Would failure of structural elements of the Project pose risks to communities? (e.g. collapse of buildings or infrastructure)	I = 1 P = 1	Low	Due to high number of persons using the airports any structural failure would pose a risk. However, any work planned or done is implemented in line with national and international regulated procedures.
7.2 Would the proposed Project potentially result in the generation of waste (both hazardous and non-hazardous)?		Low	Improved infrastructure could lead to increase in number of users over the year leading to increase of waste. As mentioned earlier, any use and processes in airports are regulated and implemented in line with national and international regulated procedures.
QUESTION 4: What is the overall Project risk categorization?			
Select one (see SESP for guidance)			Comments
	<i>Low Risk</i>	<input checked="" type="checkbox"/>	
	<i>Moderate Risk</i>	<input type="checkbox"/>	
	<i>High Risk</i>	<input type="checkbox"/>	

- Prohibited grounds of discrimination include race, ethnicity, gender, age, language, disability, sexual orientation, religion, political or other opinion, national or social origin, geographical origin, property, birth or other status including as indigeneous person or as a member of a minority. References to "women and men" or similar is understood to include women and men, boys and girls, and other groups discriminated against based on their gender identities, such as transgender people and transsexuals.

Risks		Checklist Potential Social and Environmental Risks	
Principles 1: Human Rights	Answer (Yes/No)	Principle 2: Gender Equality and Women's Empowerment	
1. Could the Project lead to adverse impacts on enjoyment of the human rights (civil, political, economic, social or cultural) of the affected population and particularly of marginalized groups?	No	Is there a likelihood that the Project would have inequitable or discriminatory adverse impacts on affected populations, particularly people living in poverty or marginalized or excluded individuals or groups?	2. Is there a likelihood that the Project would have inequitable or discriminatory adverse impacts on affected populations, particularly people living in poverty or marginalized or excluded individuals or groups?
2. Could the Project potentially restrict availability, quality of and access to resources or basic services, in particular to marginalized individuals or groups?	No	Could the Project potentially restrict availability, quality of and access to resources or basic services, in particular to marginalized individuals or groups?	3. Could the Project potentially restrict availability, quality of and access to resources or basic services, in particular to marginalized individuals or groups?
3. Could the Project potentially affect particularly marginalized individuals or groups?	No	Is there a likelihood that the Project would have any potentially affected stakeholders, in particular marginalized groups, from fully participating in decisions that may affect them?	4. Is there a likelihood that the Project would exclude any potential stakeholders, in particular marginalized groups, from fully participating in decisions that may affect them?
4. Could the Project measures or mechanisms in place to respond to local community grievances?	No	Is there a risk that duty-bearers do not have the capacity to meet their obligations in the Project?	5. Are there measures or mechanisms in place to have local communities or individuals, given the opportunity, raised human rights concerns regarding the Project during the stakeholder engagement process?
5. Are there measures or mechanisms in place to have local communities or individuals, given the opportunity, raise human rights concerns regarding the Project during the stakeholder engagement process?	No	Is there a risk that rights-holders do not have the capacity to claim their rights?	6. Is there a risk that duty-bearers do not have the capacity to meet their obligations in the Project?
6. Is there a risk that duty-bearers do not have the capacity to meet their obligations in the Project?	No	Have local communities or individuals, given the opportunity, raised human rights concerns regarding the Project during the stakeholder engagement process?	7. Is there a risk that rights-holders do not have the capacity to claim their rights?
7. Is there a risk that rights-holders do not have the capacity to claim their rights?	No	Have local communities or individuals, given the opportunity, raise human rights concerns regarding the Project during the stakeholder engagement process?	8. Have local communities or individuals, given the opportunity, raise human rights concerns regarding the Project during the stakeholder engagement process?
8. Have local communities or individuals, given the opportunity, raise human rights concerns regarding the Project during the stakeholder engagement process?	No	Is there a risk that the Project would exacerbate conflicts among and/or the risk of violence to project-affected communities and individuals?	9. Is there a risk that the Project would exacerbate conflicts among and/or the risk of violence to project-affected communities and individuals?
9. Is there a risk that the Project would exacerbate conflicts among and/or the risk of violence to project-affected communities and individuals?	No	Would the Project potentially reproduce and/or the situation of women and girls?	1. Is there a likelihood that the proposed Project would have adverse impacts on gender equality and/or the situation of women and girls?
1. Is there a likelihood that the proposed Project would have adverse impacts on gender equality and/or the situation of women and girls?	No	Would the Project potentially reinforce discrimination against women based on gender, especially regarding participation in design and	2. Would the Project potentially reinforce discrimination against women based on gender, especially regarding participation in design and

2 In regards to CO₂, significant emissions corresponds generally to more than 25,000 tons per year (from both direct and indirect sources). [The Guidance Note on Climate Change Mitigation and Adaptation provides additional information on GHG emissions].

Standardard 3: Community Health, Safety and Working Conditions	
2.3	Is the proposed Project likely to directly or indirectly increase social and environmental vulnerability to climate change now or in the future (also known as maladaptive practices)?
No	For example, changes to land use planning may encourage further development of floodplains, potentially increasing the population's vulnerability to climate change, specifically flooding.
2.2	Would the potential outcomes of the Project be sensitive or vulnerable to potential impacts of climate change?
No	Would the proposed Project result in significant greenhouse gas emissions or may exacerbate climate change?
Standardard 2: Climate Change Mitigation and Adaptation	
2.1	Will the proposed Project result in significant greenhouse gas emissions or may exacerbate climate change?
No.	Will the proposed Project result in significant greenhouse gas emissions or may exacerbate climate change?
2.1.1	Would the Project result in secondary or cumulative impacts of multiple activities (even if not in the same forested area are planned, then need to be considered. Also, if similar developments are indirect, secondary, or induced impacts that along the route, potentially in sensitive areas. These generate unplanned commercial development or generate encroachment on lands by illegal settlers (e.g. felling of trees, earthworks, potential generation of trunks), The new road may also relocate direct environmental and social impacts (e.g. felling of trees, earthworks, potential generation of trunks), The new road through forested lands will known existing or planned activities in the area? Would it generate cumulative impacts with other lead to adverse social and environmental effects, or consequences of development activities which could consequence of development activities which could generate direct environmental and social impacts (e.g. felling of trees, earthworks, potential generation of trunks), The new road through forested lands will known existing or planned activities in the area?
2.1.2	Would the Project result in secondary or transboundary or global environmental concerns?
No	Would the Project generate potential adverse commercial development (e.g. collection and/or harvesting, resources?) (e.g. collection and/or harvesting, resources?) (e.g. collection and/or harvesting, resources?)
1.8	Does the Project involve significant extraction, diversion or containment of surface or ground water?
No	For example, construction of dams, reservoirs, river basins developments, groundwater extraction, diversion or containment of surface or ground water?
1.9	Does the Project involve utilization of genetic resources? (e.g. collection and/or harvesting, resources?)
No	Does the Project involve utilization of genetic resources? (e.g. collection and/or harvesting, resources?)
1.10	Would the Project generate potential adverse transboundary or global environmental concerns?
No	Would the Project result in secondary or cumulative impacts of multiple activities (even if not in the same forested area are planned, then need to be considered. Also, if similar developments
1.11	Would the Project result in secondary or cumulative impacts of multiple activities (even if not in the same forested area are planned, then need to be considered. Also, if similar developments are indirect, secondary, or induced impacts that along the route, potentially in sensitive areas. These generate unplanned commercial development or generate encroachment on lands by illegal settlers (e.g. felling of trees, earthworks, potential generation of trunks), The new road may also relocate direct environmental and social impacts (e.g. felling of trees, earthworks, potential generation of trunks), The new road through forested lands will known existing or planned activities in the area? Would it generate cumulative impacts with other lead to adverse social and environmental effects, or consequences of development activities which could consequence of development activities which could generate direct environmental and social impacts (e.g. felling of trees, earthworks, potential generation of trunks), The new road through forested lands will known existing or planned activities in the area?)
2	Does the proposed Project likely to directly or indirectly increase social and environmental vulnerability to climate change now or in the future (also known as maladaptive practices)?
No	For example, changes to land use planning may encourage further development of floodplains, potentially increasing the population's vulnerability to climate change, specifically flooding.

residence, or location without the provision of, and access to, appropriate forms of legal or other protections.
groups, or communities from homes and/or lands and common property resources that were occupied or depended upon, thus eliminating the ability of an individual, group, or community to reside or work in a particular dwelling,
3 Forced evictions include acts and/or omissions involving the coerced or involuntary displacement of individuals,

Standard 6: Indigenous Peoples	
5.1 Would the Project potentially involve temporary or permanent and full or partial physical displacement?	No
5.2 Would the Project possibly result in economic displacement (e.g., loss of assets or access to resources due to land acquisition or access restrictions – even in the absence of physical relocation)?	No
5.3 Is there a risk that the Project would lead to forced evictions? ³	No
5.4 Would the proposed Project possibly affect land tenure arrangements and/or community rights to land, territories and/or resources?	No
6.1 Are indigenous peoples present in the Project area (including Project area of influence)?	No
6.2 Is it likely that the Project or portions of the Project will be located on lands and territories claimed by indigenous peoples?	No
6.3 Would the proposed Project potentially affect the legal titles to such areas?	No
6.4 Has there been an absence of culturally appropriate consultations carried out with the objective of achieving FPLIC on matters that may affect the rights of indigenous peoples?	No
6.4 Does the proposed Project involve the utilization and/or commercial development of natural resources on lands and territories claimed by indigenous peoples concerned?	No
6.5 Is there a potential for forced eviction of the whole or partial physical or economic displacement of indigenous peoples?	No
6.6 Would the Project adversely affect the rights of indigenous peoples as defined by them?	No
6.7 Would the Project potentially affect the traditional livelihoods, physical and cultural survival of indigenous peoples?	No
