Closure Stage Quality Assurance Report

Form Status: Approved		
Overall Rating:	Needs Improvement	
Decision:		
Portfolio/Project Number:	00097116	
Portfolio/Project Title:	Trade Capacity Development	
Portfolio/Project Date:	2019-05-01 / 2022-03-31	

Strategic	Quality Rating: Satisfactory
1. Did the project pro-actively identified strategy?	d changes to the external environment and incorporated them into the project

- 3: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives, assumptions were tested to determine if the project's strategy was valid. There is some evidence that the project board considered the implications, and documented the changes needed to the project in response. (all must be true)
- 2: The project team identified relevant changes in the external environment that may present new opportunities or threats to the project's ability to achieve its objectives. There is some evidence that the project board discussed this, but relevant changes did not fully integrate in the project. (both must be true)
- 1: The project team considered relevant changes in the external environment since implementation began, but there is no evidence that the project team considered these changes to the project as a result.

Throughout the project implementation, the project t eam identified relevant changes in the external envir onment, that may present new opportunities or threa ts to the project's ability to achieve its objectives. Th ese particularly were related to the need to adapt to COVID-19 pandemic restrictions (2020-2022). The i mpact of pandemic made the project re-consider the activities that were planned to be conducted physica Ily, but had to be conducted virtually. For example, th e organization of the training component was transfe rred from physical organization modality to the virtua I organization modality.

2. Was the project aligned with the thematic focus of the Strategic Plan?

- 3: The project responded to at least one of the development settings as specified in the Strategic Plan (SP) and adopted at least one Signature Solution .The project's RRF included all the relevant SP output indicators. (all must be true)
- 2: The project responded to at least one of the developments settings1 as specified in the Strategic Plan. The project's RRF included at least one SP output indicator, if relevant. (both must be true)
- 1: While the project may have responded to a partner's identified need, this need falls outside of the UNDP Strategic Plan. Also select this option if none of the relevant SP indicators are included in the RRF.

Evidence:

The project contributed to the Outcome 1 of the Stra tegic Plan "Structural transformation accelerated, pa rticularly green, inclusive, and digital transitions", Sig nature Solution 1: Poverty and Inequality, SP indicat or: People and institutions equipped with strengthen ed digital capabilities and opportunities to contribute to and benefit from inclusive digital societies

# File Name Modified By Modified On			
No documents available.			

The beneficiaries were engaged in monitoring of the project and its results via the Project Board meeting s. The information was used to inform project decisi on making.

4. Did the project generate knowledge, and lessons learned (i.e., what has worked and what has not) and has this knowledge informed management decisions to ensure the continued relevance of the project towards its stated objectives, the quality of its outputs and the management of risk?

- 3: Knowledge and lessons learned from internal or external sources (gained, for example, from Peer Assists, After Action Reviews or Lessons Learned Workshops) backed by credible evidence from evaluation, corporate policies/strategies, analysis and monitoring were discussed in project board meetings and reflected in the minutes. There is clear evidence that changes were made to the project to ensure its continued relevance. (both must be true)
 - 2: Knowledge and lessons learned backed by relatively limited evidence, drawn mainly from within the project, were considered by the project team. There is some evidence that changes were made to the project as a result to ensure its continued relevance. (both must be true)
- 1: There is limited or no evidence that knowledge and lessons learned were collected by the project team.
 There is little or no evidence that this informed project decision making.

The project analyzed the lessons learned drawn fro m the project implementation, and they have been c onsidered by the project team. The following lessons were learnt during project implementation:

• One of the lessons learned from this project is prov ision of digital infrastructure among national partner s. As digitilization expands globally and digital techn ologies are widely used, it is essential that digital eq uipment are available, internet communication is sta ble and all personnel is able to work with digital tech nology. In accordance with the new realities, it is nec essary to optimize the implementation of project acti vities in an online format, taking into account the prio rities of national partners.

• Balance of work and time allocated for training sho uld be flexible. Flexibility to provide mobile learning and training. Hence, rather than physical gathering a nd taking time of government officials, e-learning wit h or without instructor to be incorporated to projects. It is recommended expanding and deepening coope ration with educational and specialized organization s in the field of trade to further strengthen the huma n, institutional and research potential of the national partners.

• There is a need to continue partnerships with inter national organizations to implement the Foreign Tra de Strategy of Turkmenistan for the period 2021-203 0, taking into account the requirements of the WTO membership accession process.

(see section "Lessons Learned" of the attached Ann ual Project Progress Report).

5. Was the project sufficiently at scale, or is there potential to scale up in the future, to meaningfully contribute to development change?

- 3: There was credible evidence that the project reached sufficient number of beneficiaries (either directly through significant coverage of target groups, or indirectly, through policy change) to meaningfully contribute to development change.
- 2: While the project was not considered at scale, there are explicit plans in place to scale up the project in the future (e.g. by extending its coverage or using project results to advocate for policy change).
- 1: The project was not at scale, and there are no plans to scale up the project in the future.

The project contributed in strengthening institutional and personnel trade capacity, building capacity to for mulate and implement trade-related policy measures and strengthening the applied scientific research ca pacity and improving the quality of education. During implementation of the project more that 140 speciali sts of state bodies of Turkmenistan such as Ministry of Trade and Foreign Economic Relations, State Co mmodity and Raw Materials Exchange, Chamber of Commerce and Industry, and the Union of Industriali sts and Entrepreneurs of Turkmenistan increased th eir knowledge in the field of trade-related policy.

Principled Quality Rating: Needs Improvement 6. Were the project's measures (through outputs, activities, indicators) to address gender inequalities and empower women relevant and produced the intended effect? If not, evidence-based adjustments and changes were made.

3: The project team gathered data and evidence through project monitoring on the relevance of the measures to address gender inequalities and empower women. Analysis of data and evidence were used to inform adjustments and changes, as appropriate. (both must be true)

2: The project team had some data and evidence on the relevance of the measures to address gender inequalities and empower women. There is evidence that at least some adjustments were made, as appropriate. (both must be true)

1: The project team had limited or no evidence on the relevance of measures to address gender inequalities and empowering women. No evidence of adjustments and/or changes made. This option should also be selected if the project has no measures to address gender inequalities and empower women relevant to the project results and activities.

Evidence:

Gender marker of project is GEN1. All project interv entions were organized in a manner to ensure equal participation of men and women.

7. Were social and environmental impacts and risks successfully managed and monitored?

- 3: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for Substantial and High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed for identified risks through consultative process and implemented, resourced, and monitored. Risks effectively managed or mitigated. If there is a substantive change to the project or change in context that affects risk levels, the SESP was updated to reflect these changes. (all must be true)
- 2: Social and environmental risks were tracked in the risk log. Appropriate assessments conducted where required (i.e., Environmental and Social Impact Assessment (ESIA) for Substantial and High risk projects and some level of social and environmental assessment for Moderate risk projects as identified through SESP). Relevant management plan(s) developed, implemented and monitored for identified risks. OR project was categorized as Low risk through the SESP.
- 1: Social and environmental risks were tracked in the risk log. For projects categorized as High, Substantial, or Moderate Risk, there was no evidence that social and environmental assessments completed and/or management plans or measures development, implemented or monitored. There are substantive changes to the project or changes in the context but SESP was not updated. (any may be true)

The project was categorized as "low risk project" thr ough the Social and Environmental Screening. Soci al and environmental risks were tracked during proje ct implementation. It was ensured that project activiti es do not harem the environment and take into consi derations the human-rights based approach. Project periodically updated the project's risk log on the pote ntial social impact and risks, including in ATLAS.

8. Were grievance mechanisms available to project-affected people and were grievances (if any) addressed to ensure any perceived harm was effectively mitigated?

- 3: Project-affected people actively informed of UNDP's Corporate Accountability Mechanism (SRM/SECU) and how to access it. If the project was categorized as High, Substantial, or Moderate Risk through the SESP, a project-level grievance mechanism was in place and project affected people informed. If grievances were received, they were effectively addressed in accordance with SRM Guidance. (all must be true)
- 2: Project-affected people informed of UNDP's Corporate Accountability Mechanism and how to access it. If the project was categorized as Substantial or High Risk through the SESP, a project -level grievance mechanism was in place and project affected people informed. If grievances were received, they were responded to but faced challenges in arriving at a resolution.
 - 1: Project-affected people was not informed of UNDP's Corporate Accountability Mechanism. If grievances were received, they were not responded to. (any may be true)

Evidence:

The project was assessed as a Low Social and Envi ronment Risks through the periodically updated risk I og. The stakeholders were informed of grievance m echanisms and the project has not experienced any grievances.

10. Was the project's governance mechanism (i.e., the project board or equivalent) function as intended?

- 3: The project's governance mechanism operated well, and was a model for other projects. It met in the agreed frequency stated in the project document and the minutes of the meetings were all on file. There was regular (at least annual) progress reporting to the project board or equivalent on results, risks and opportunities. It is clear that the project board explicitly reviewed and used evidence, including progress data, knowledge, lessons and evaluations, as the basis for informing management decisions (e.g., change in strategy, approach, work plan.) (all must be true to select this option)
- 2: The project's governance mechanism met in the agreed frequency and minutes of the meeting are on file. A project progress report was submitted to the project board or equivalent at least once per year, covering results, risks and opportunities. (both must be true to select this option)

1: The project's governance mechanism did not meet in the frequency stated in the project document over the past year and/or the project board or equivalent was not functioning as a decision-making body for the project as intended.

During Project implementation period, the Project's Board met twice a year and the minutes of the meeti ngs are on file (attached). Regular annual progress r eporting to the project board is ensured. Mid-year m eetings were used to adjust the annual work plan de pending on the context evolution, such as COVID-19 pandemics in 2020, etc.

11. Were risks to the project adequately monitored and managed?

- 3: The project monitored risks every quarter and consulted with the key stakeholders, security advisors, to identify continuing and emerging risks to assess if the main assumptions remained valid. There is clear evidence that relevant management plans and mitigating measures were fully implemented to address each key project risk and were updated to reflect the latest risk assessment. (all must be true)
- 2: The project monitored risks every year, as evidenced by an updated risk log. Some updates were made to management plans and mitigation measures.
- 1: The risk log was not updated as required. There was may be some evidence that the project monitored risks that may affected the project's achievement of results, but there is no explicit evidence that management actions were taken to mitigate risks.

Project risks were monitored, updated regularly by t he Project Team (based on attached ProDoc Risk Lo g) and reported in the progress reports and UNDP ATLAS risk log.

13. V	Vere project inputs procured and delivered on time	e to efficiently contribute	e to results?	

- 3: The project had a procurement plan and kept it updated. The project quarterly reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)
- 2: The project had updated procurement plan. The project annually reviewed operational bottlenecks to procuring inputs in a timely manner and addressed them through appropriate management actions. (all must be true)
- 1: The project did not have an updated procurement plan. The project team may or may not have reviewed operational bottlenecks to procuring inputs regularly, however management actions were not taken to address them.

The procurement plan has been maintained through the CO Turkmenistan Service Center (online syste

m). It has been updated on annual basis for achievin

g the planned targets.

14. Was there regular monitoring and recording of cost efficiencies, taking into account the expected quality of results?

- 3: There is evidence that the project regularly reviewed costs against relevant comparators (e.g., other projects or country offices) or industry benchmarks to ensure the project maximized results delivered with given resources. The project actively coordinated with other relevant ongoing projects and initiatives (UNDP or other) to ensure complementarity and sought efficiencies wherever possible (e.g. joint activities.) (both must be true)
- 2: The project monitored its own costs and gave anecdotal examples of cost efficiencies (e.g., spending less to get the same result,) but there was no systematic analysis of costs and no link to the expected quality of results delivered. The project coordinated activities with other projects to achieve cost efficiency gains.
- 1: There is little or no evidence that the project monitored its own costs and considered ways to save money beyond following standard procurement rules.

The project closely monitored its costs to ensure the cost efficiency and provided examples of savings ob tained through the competitive procurement . Value f or money principle was always respected in any pro curement case. CO's and global LTAs are used for s treamlining the procurement processes. All savings have been redirected to additional activities upon na tional partner approval.

results, and to inform course corrections if needed?

- 3: Quarterly progress data informed regular reviews of the project work plan to ensure that the activities implemented were most likely to achieve the desired results. There is evidence that data and lessons learned (including from evaluations /or After-Action Reviews) were used to inform course corrections, as needed. Any necessary budget revisions were made. (both must be true)
- 2: There was at least one review of the work plan per year with a view to assessing if project activities were on track to achieving the desired development results (i.e., outputs.) There may or may not be evidence that data or lessons learned were used to inform the review(s). Any necessary budget revisions have been made.
 - 1: While the project team may have reviewed the work plan at least once over the past year to ensure outputs were delivered on time, no link was made to the delivery of desired development results. Select this option also if no review of the work plan by management took place.

The project was regularly reviewed the work plans in order to achieve the desired results, and made the n ecessary adjustments and budget revisions. Regular annual progress reporting to the project board was e nsured. Mid-year meetings were used to adjust the a nnual work as needed.

17. Were the targeted groups systematically identified and engaged, prioritizing the marginalized and excluded, to ensure results were achieved as expected?

Closure Print

- 3: The project targeted specific groups and/or geographic areas, identified by using credible data sources on their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work. There is clear evidence that the targeted groups were reached as intended. The project engaged regularly with targeted groups over the past year to assess whether they benefited as expected and adjustments were made if necessary, to refine targeting. (all must be true)
- 2: The project targeted specific groups and/or geographic areas, based on some evidence of their capacity needs, deprivation and/or exclusion from development opportunities relevant to the project's area of work.
 Some evidence is provided to confirm that project beneficiaries are members of the targeted groups. There was some engagement with beneficiaries in the past year to assess whether they were benefiting as expected. (all must be true)
- 1: The project did not report on specific targeted groups. There is no evidence to confirm that project beneficiaries are populations have capacity needs or are deprived and/or excluded from development opportunities relevant to the project area of work. There is some engagement with beneficiaries to assess whether they benefited as expected, but it was limited or did not occurred in the past year.

Not Applicable

Evidence:

The targeted groups are the staff of the national trad e organizations: Ministry of Trade and Foreign Econ omic Relations of Turkmenistan, State Commodity a nd Raw Materials Exchange of Turkmenistan, Cham ber of Commerce and Industry of Turkmenistan and Union of Industrialists and Entrepreneurs of Turkme nistan.

19. Were there regular monitoring of changes in capacities and performance of institutions and systems relevant to the project, as needed, and were the implementation arrangements⁸ adjusted according to changes in partner capacities?

- 3: Changes in capacities and performance of national institutions and systems were assessed/monitored using clear indicators, rigorous methods of data collection and credible data sources including relevant HACT assurance activities. Implementation arrangements were formally reviewed and adjusted, if needed, in agreement with partners according to changes in partner capacities. (all must be true)
- 2: Aspects of changes in capacities and performance of relevant national institutions and systems were monitored by the project using indicators and reasonably credible data sources including relevant HACT assurance activities. Some adjustment was made to implementation arrangements if needed to reflect changes in partner capacities. (all must be true)
 - 1: Some aspects of changes in capacities and performance of relevant national institutions and systems may have been monitored by the project, however changes to implementation arrangements have not been considered. Also select this option if changes in capacities and performance of relevant national institutions and systems have not been monitored by the project.
- Not Applicable

During the Project implementation, aspects of chang es in capacities and performance of relevant nationa l institutions have been monitored by the project usi ng indicators of the specialized RRF. Please see att ached Final Project Review Report, minutes of Proje ct Board meetings and completed QA for implement ation stage in system.

20. Were the transition and phase-out arrangements were reviewed and adjusted according to progress (including financial commitment and capacity).

- 3: The project's governance mechanism regularly reviewed the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan. The plan was implemented as planned by the end of the project, taking into account any adjustments made during implementation. (both must be true)
- 2: There was a review of the project's sustainability plan, including arrangements for transition and phase-out, to ensure the project remained on track in meeting the requirements set out by the plan.
- 1: The project may have had a sustainability plan but there was no review of this strategy after it was developed. Also select this option if the project did not have a sustainability strategy.

Project Board systematically reviewed the project's s ustainability, based on the progress reports attache d, as reflected in the Project Board meetings minute s (attached above). During the Final Project Review meeting between UNDP CO Turkmenistan and the Ministry of Trade and Foreign Economic Relations, it was decided to draft the next phase of the partnershi p with more concrete interventions related to current needs of the Ministry, including digitization for trade f acilitation. See attached below Final Project Board Meeting minutes.

QA Summary/Final Project Board Comments

On the project board meeting held on December 17, 2021, all project board members expressed satisfaction with th e implementation of the project as presented with the final project review. It was agreed that UNDP would prepare a nd submit project document for extension for three month till March 2022 for completion of planned project activities i n January 2022. Thus, UNDP will prepare and submit to the Ministry of Trade the new project proposal for future coo peration.
