

Integrated Community Recovery & Stabilization

Early Recovery in North East Nigeria

United Nations Development Programme

Background

- Ngwom is an agrarian community in Mafa LGA – about 45kms from Maiduguri
- Prior to the insurgency, it is a hub for livestock and grain trading
- In September 2014 and again in 2016, NSAG attacked the town leaving high destruction in their wake leading to the complete desertion of the town by its inhabitants.

Empowered lives.
Resilient nations.

The Approach

- ❑ UNDP started intervention in Ngwom in February 2017 as the first pilot project to demonstrate integrated multi-sector approach for early recovery under UNDP Integrated Community Stabilization Programme (ICSP).
- ❑ The programme adopts a package of interventions in four areas:
 - **Livelihoods stabilization** infused with opportunities for immediate employment and income generation,
 - **Restoration of basic services** through the repair and reconstruction of infrastructure essential for the pursuit of a dignified life in communities that were devastated by conflict, and the strengthening of basic services provision,
 - Reinstating effective and accountable **local governance** systems through community participation and capacity building activities and
 - Rebuilding **social cohesion** through systematic social engagement and community security initiatives

The Interventions

Livelihoods

- 625 households were supported with rainy season agricultural inputs in 2017 and 2018
- 120 households received irrigation (dry season) farming inputs.
- 120 and 128 households were beneficiaries of livestock inputs and small business inputs respectively.
- A Village Savings and Loans Association was set up to provide a Community Based Social Safety Net Mechanism. So far, 390 persons have benefitted from this initiative.
- Lastly, solar lanterns donated by Panasonic corporation were distributed to 340 households.

Basic Services

- The following basic infrastructure were constructed to improve access to basic services;
 - 300 units of two bedroom houses
 - The Primary Health Clinic (Rehabilitated with technical support from WHO)
 - 288 market stalls
 - A Primary School comprising of 6 blocks of 12 classrooms, 6 offices and 6 stores with perimeter fence
 - A police station
 - Two solar powered water boreholes, and
 - Electric power transmission from Maiduguri

All of these were implemented using the Cash for Work modality that provided emergency employment to about 300 youth

The Intervention cntd...

Social Cohesion and Community Volunteerism

- 327 households engaged in voluntary planting of 400 economic and non-economic trees

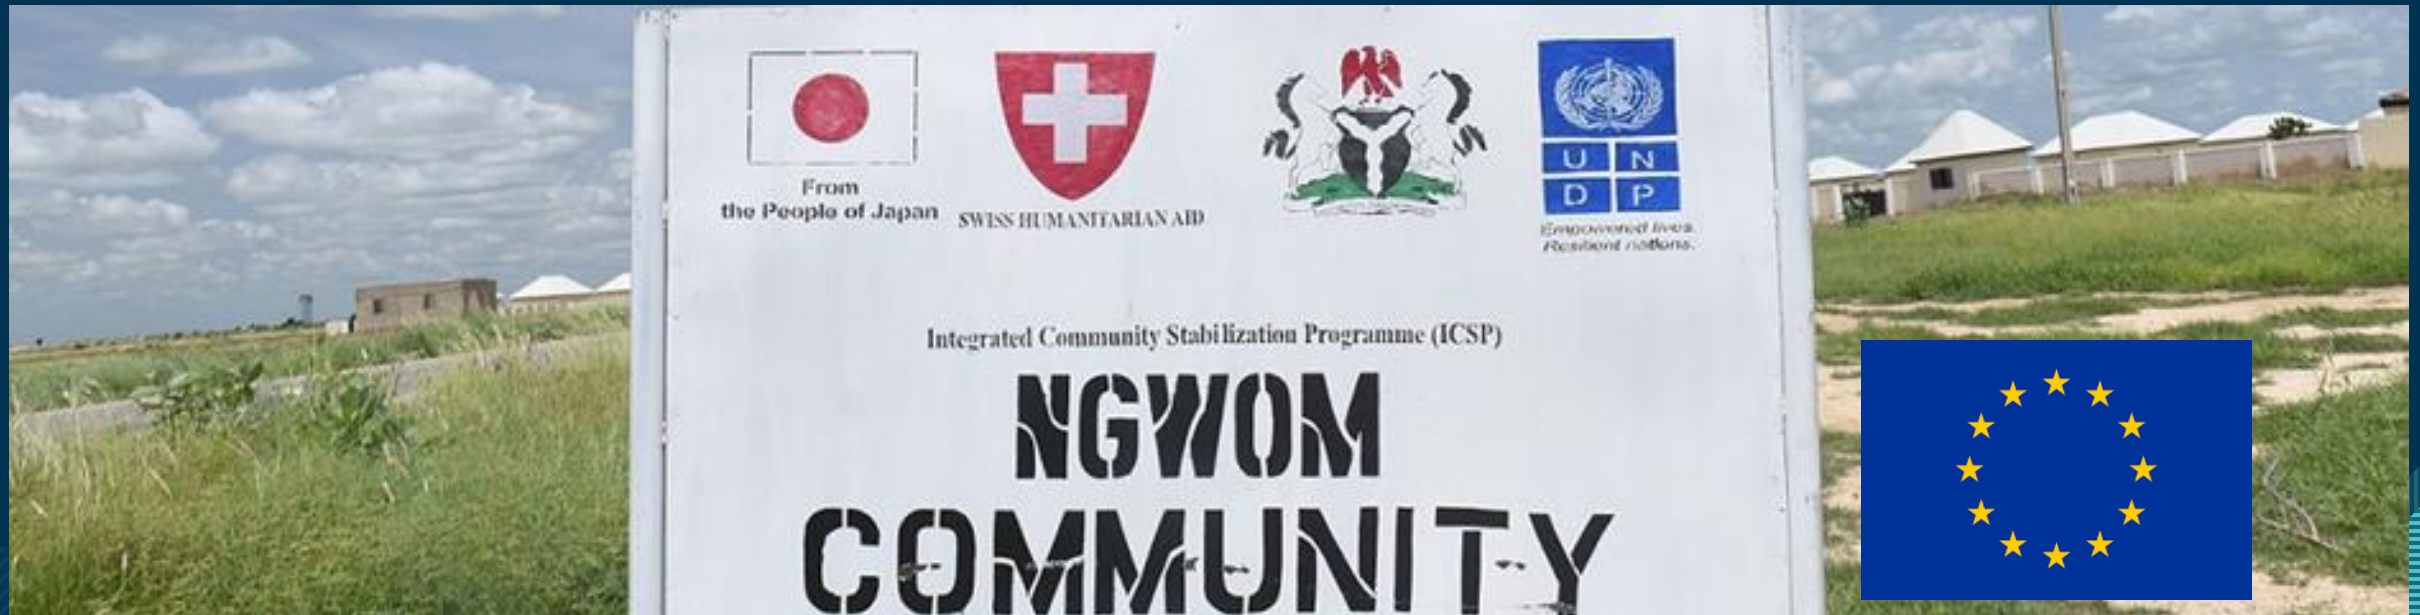

The Result

Donors

- ☐ UNDP
- ☐ Government of Japan
- ☐ Swiss Humanitarian Aid
- ☐ European Union
- ☐ ECHO
- ☐ Borno State Government
